

Tamago Ai

The Ideal Tool For Scalping Strategic Trading

TUTORIAL

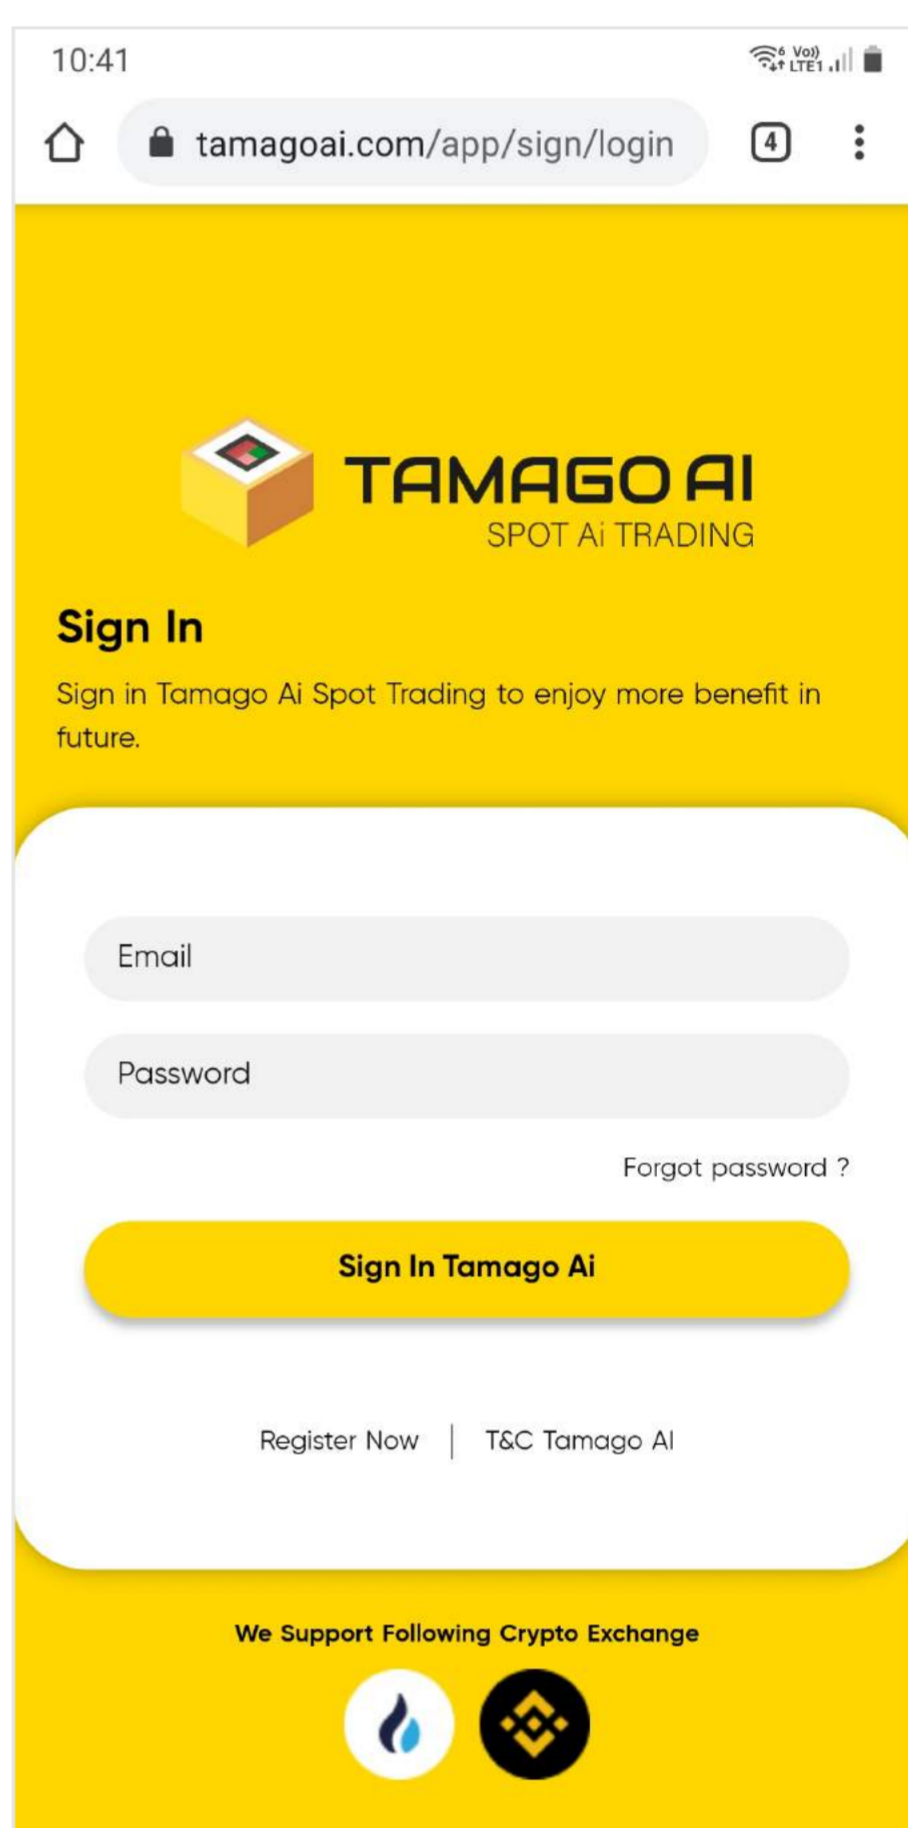

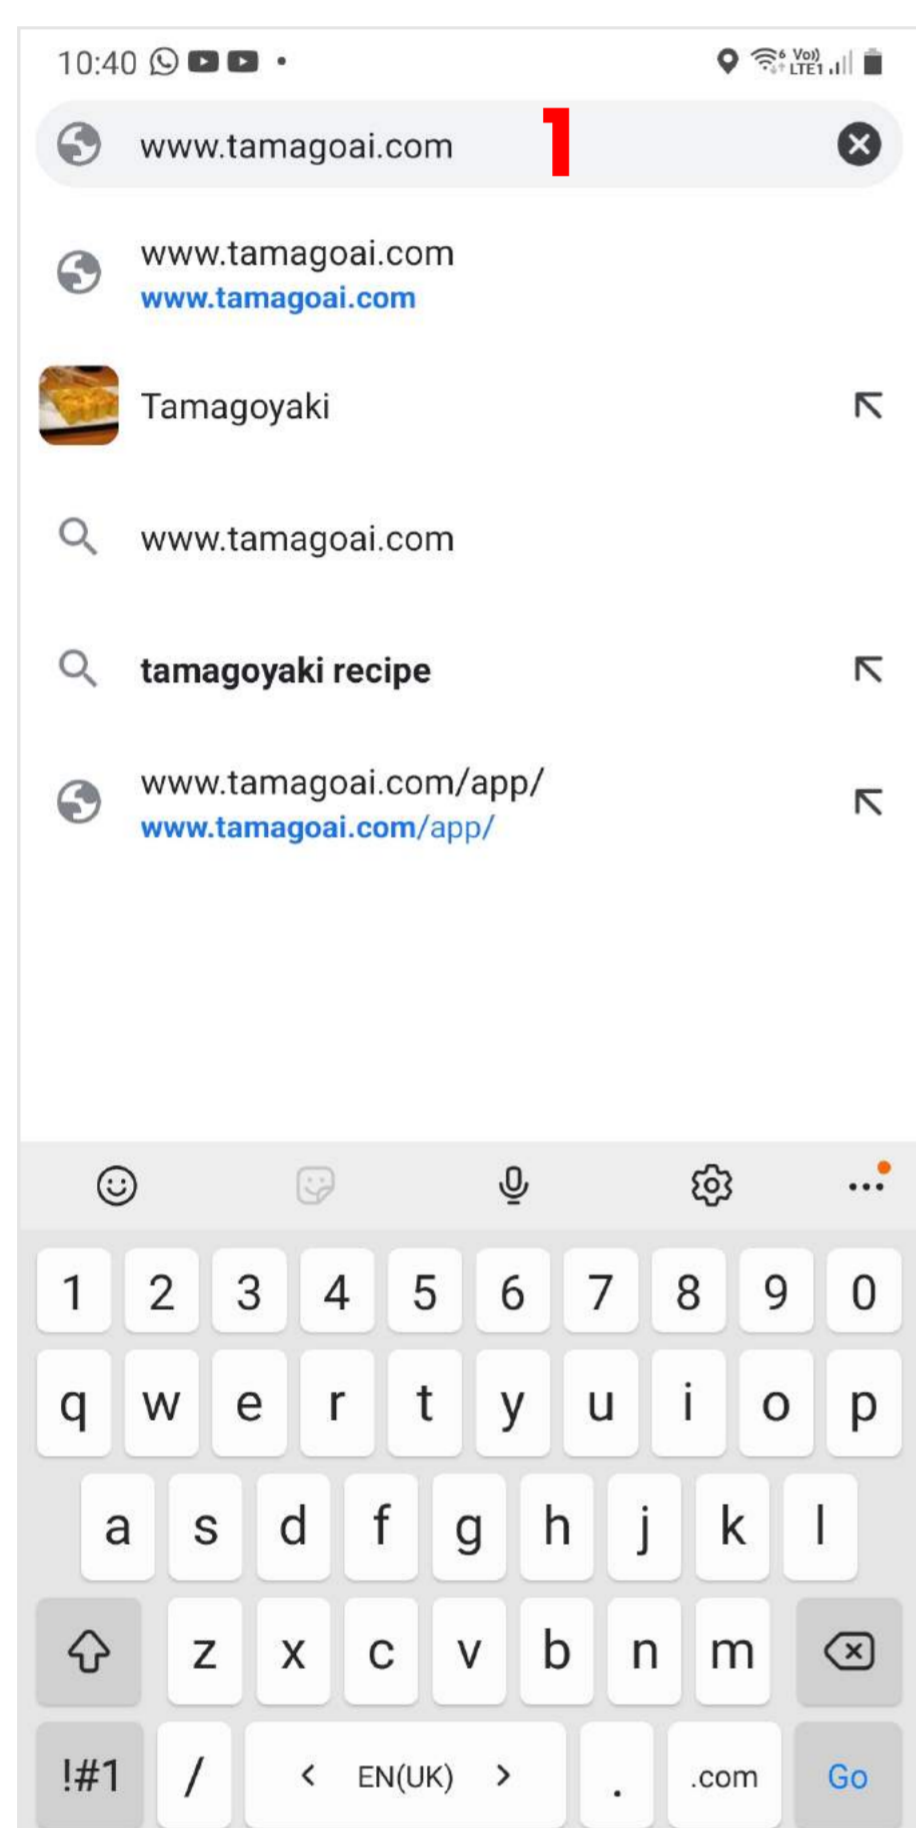

Tamago Ai 使用教程

*Before proceed any investment, always Do Your Own Research (DYOR) before proceeding.

HOW TO ACCESS TAMAGO AI (FOR IOS)

如何前往 Tamago Ai (IOS 用户)

01

1. First, insert www.tamagoai.com at web browser like Google Chrome or Mozilla Firefox.

2. Then, select "Go" to access Tamago Ai.

This is the login page of Tamago Ai. User can Sign In or Register account here.

这个页面是Tamago Ai 的账号登录页面，用户可以在此登录账号或注册账号

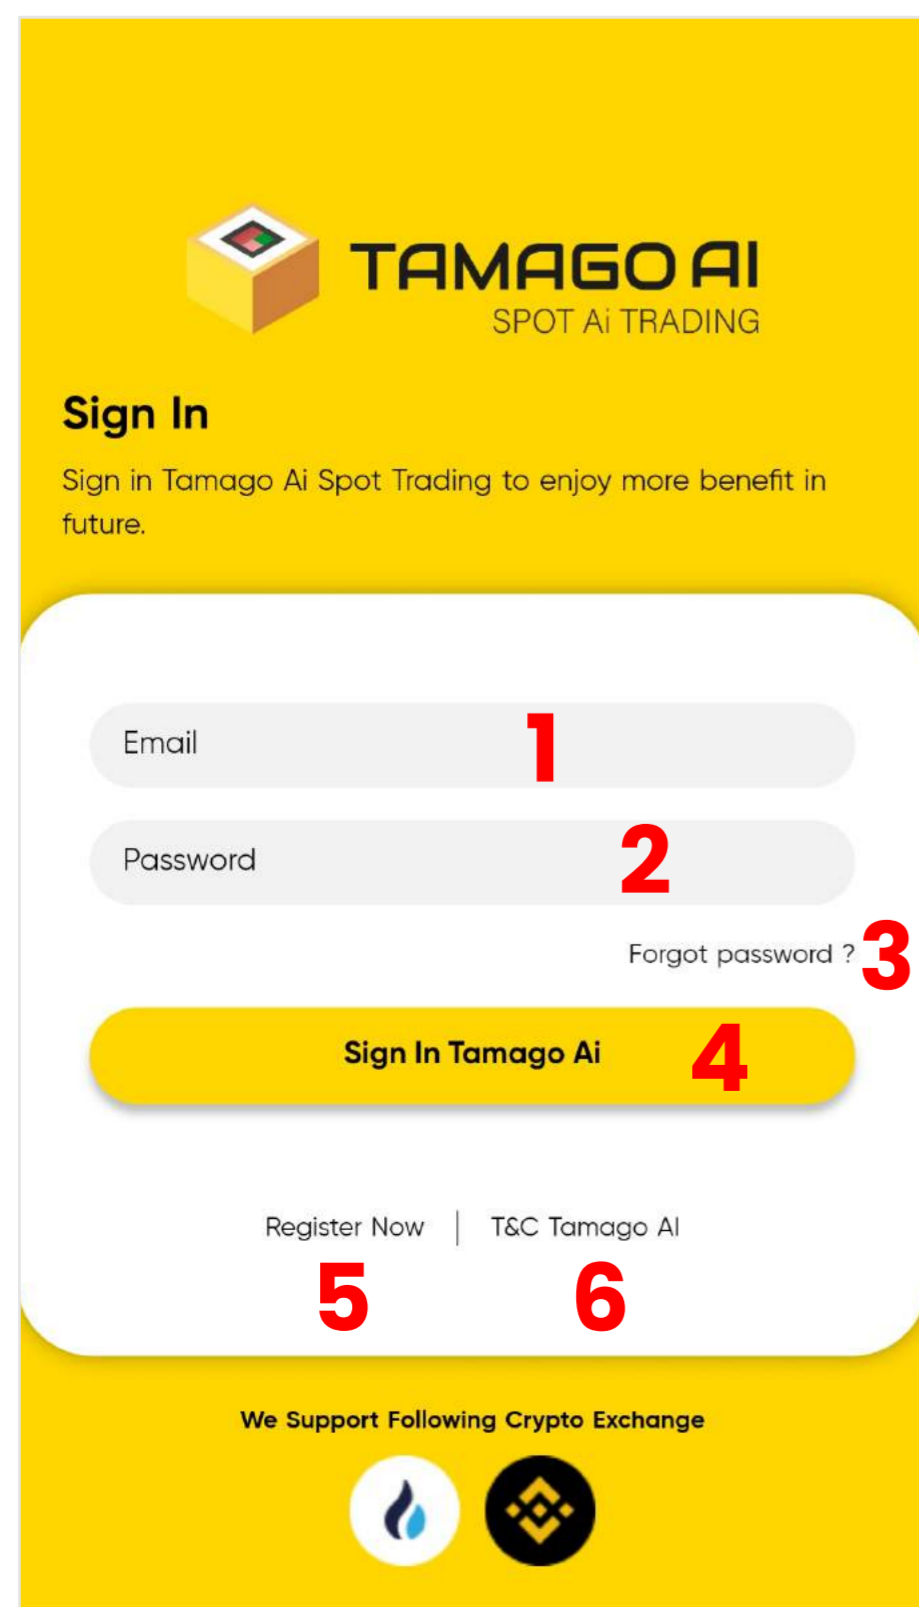

1. 首先，在浏览器上如：Google Chrome 或 Mozilla Firefox 输入 www.tamagoai.com

2. 接着，点击 "Go" 前往 Tamago Ai.

SIGN IN PAGE INTRODUCTION

登录页面简介

02

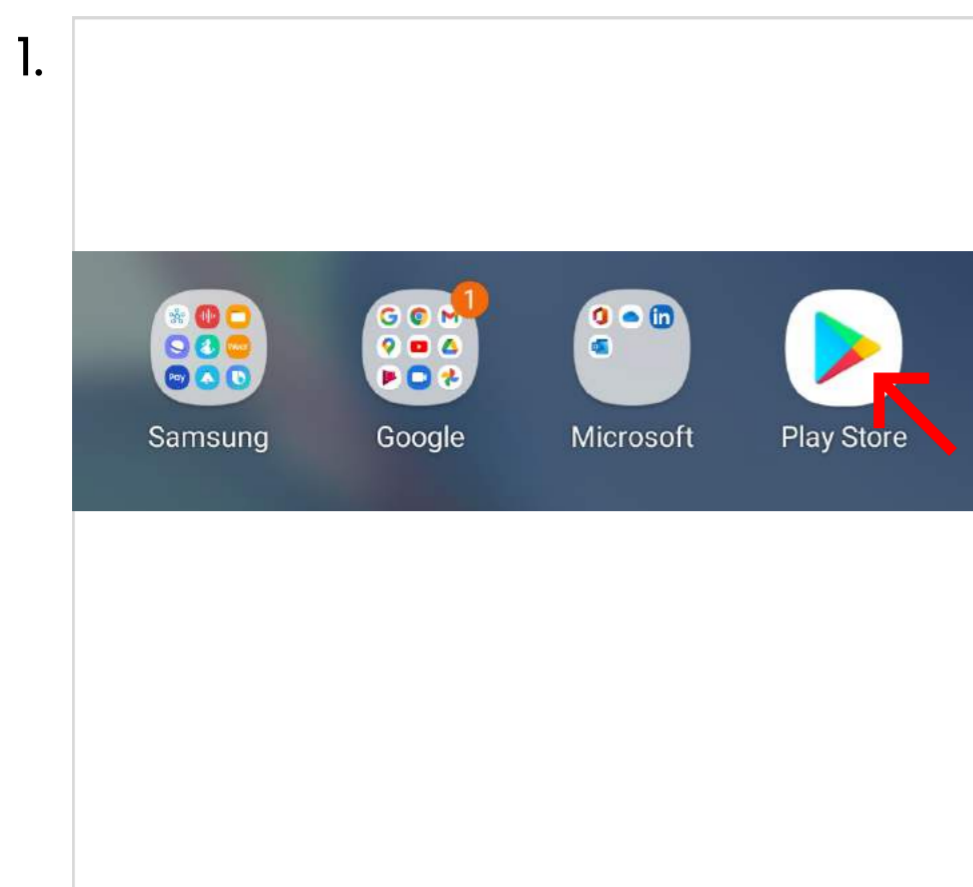

1. Email Column
2. Password Column
3. Forgot Password
4. Sign In Button
5. Register Button
6. Terms and Condition Tamago Ai

1. 电邮栏目
2. 密码栏目
3. 忘记密码
4. 登入系统按钮
5. 用户注册按钮
6. Tamago Ai 条规按钮

HOW TO DOWNLOAD TAMAGO AI APP IN ANDROID PLAYSTORE

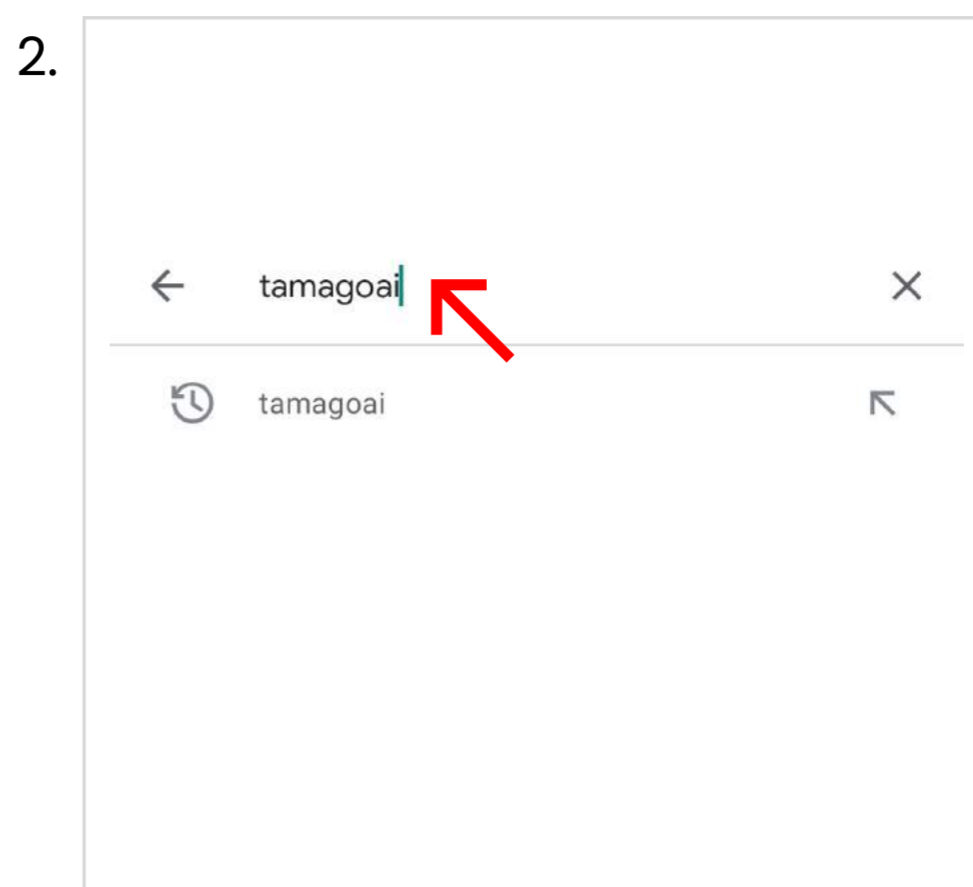

如何在 Android Playstore 下载 Tamago Ai 应用

03

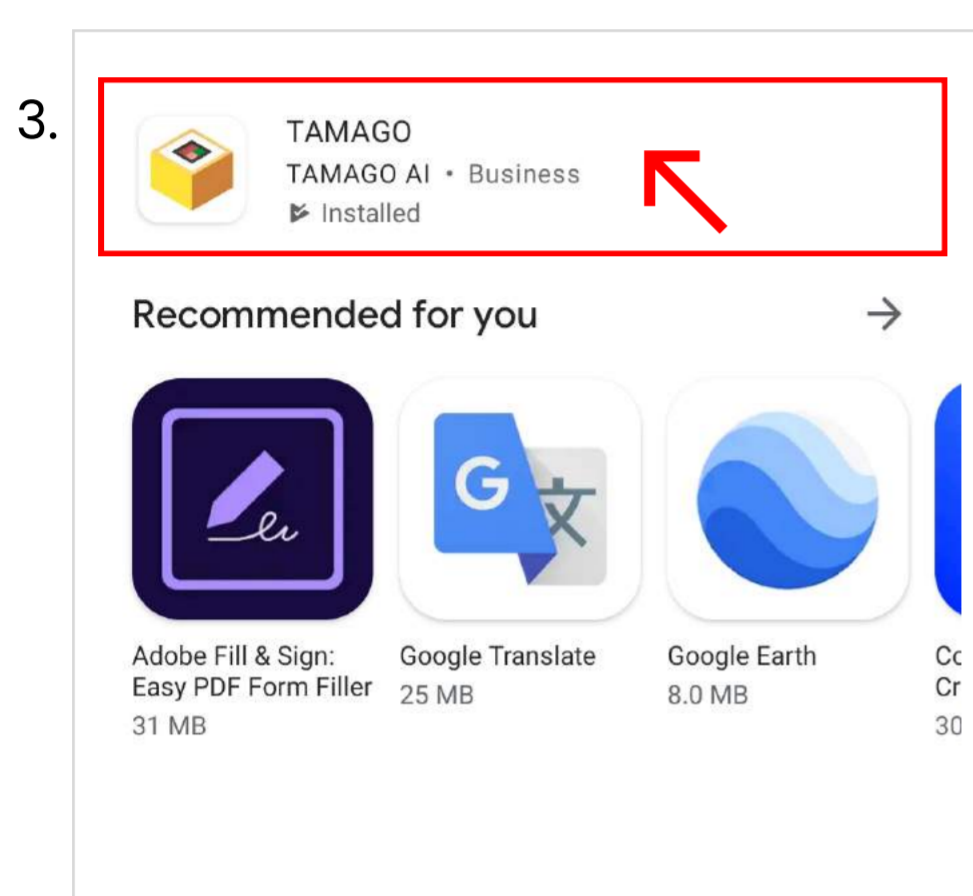

Select **"Play Store"**

选择 **"Play Store"**

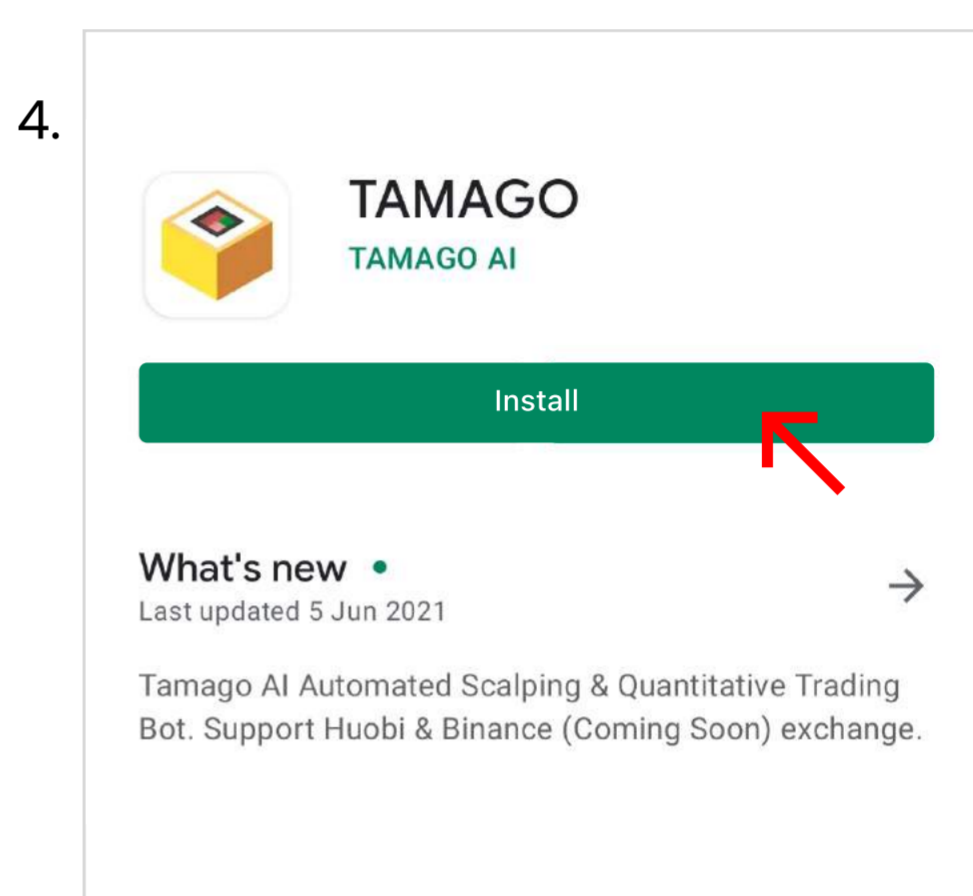

Insert **"Tamago Ai"** and Search

输入 **"Tamago Ai"** 然后进行搜索

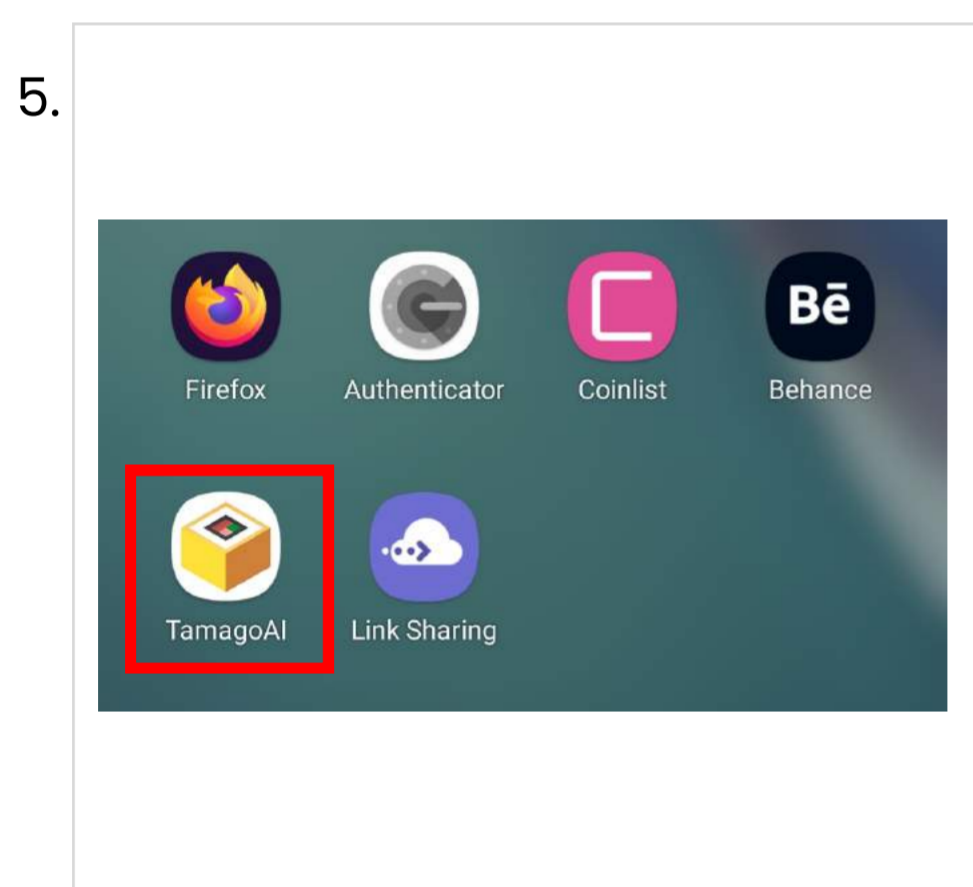

Select **"Tamago"** App

选择 **"Tamago"** 应用

Select **"Install"** to download and install Tamago Ai App

选择 **"Install"** 下载与安装 Tamago Ai 的应用

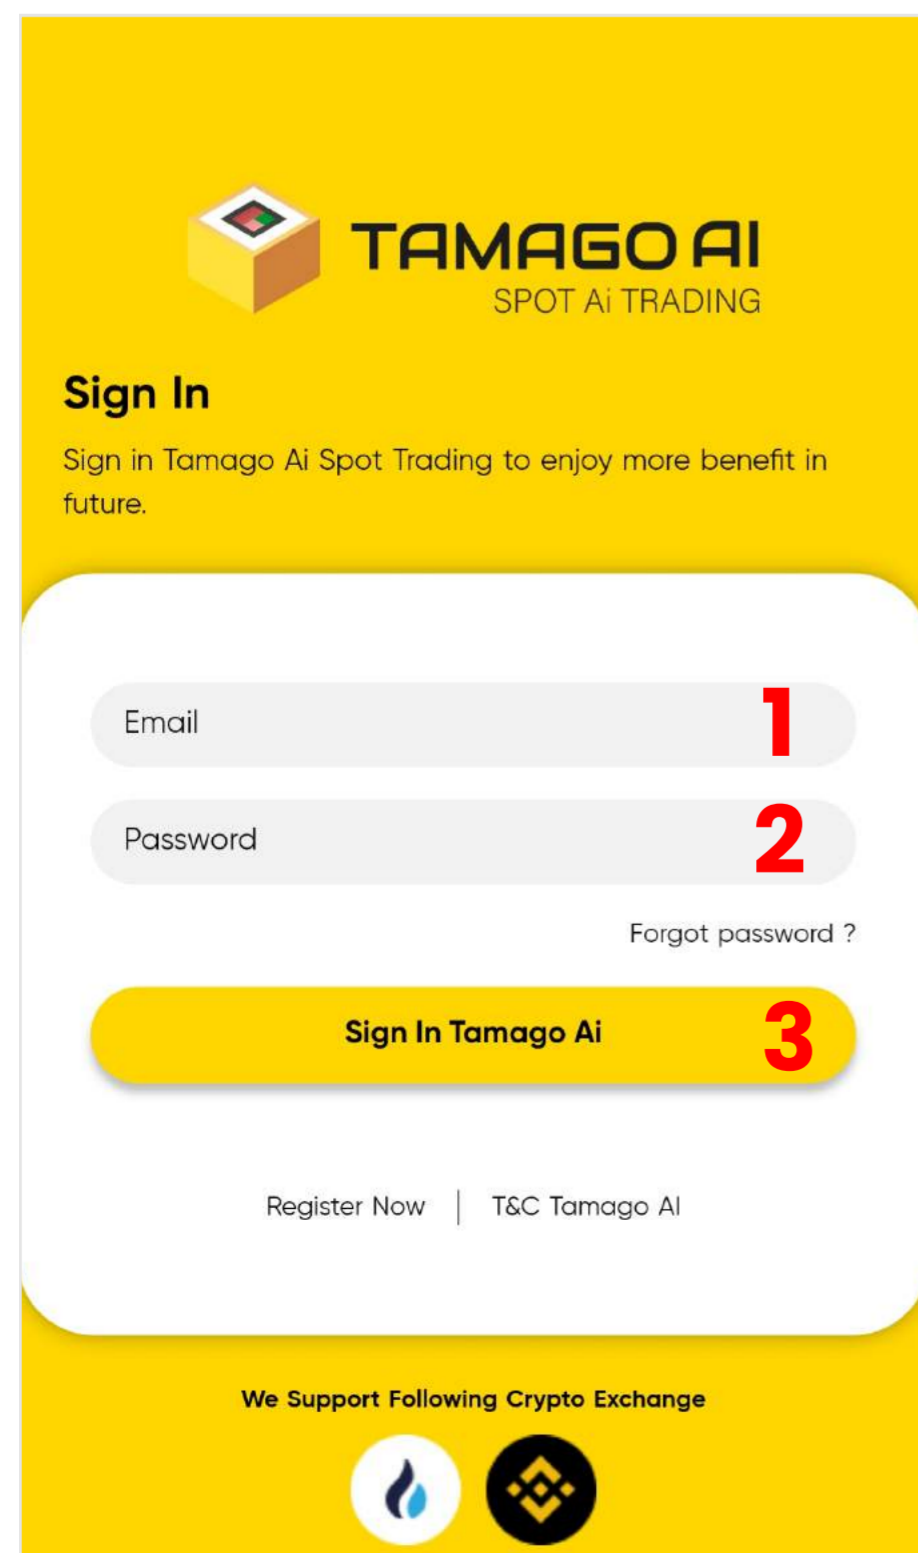

When this icon show at your mobile phone means that you have success install Tamago Ai

当 Tamago Ai 出现在你的手机，就表示你已成功安装应用

SIGN IN TAMAGO AI

登录 TAMAGO AI

04

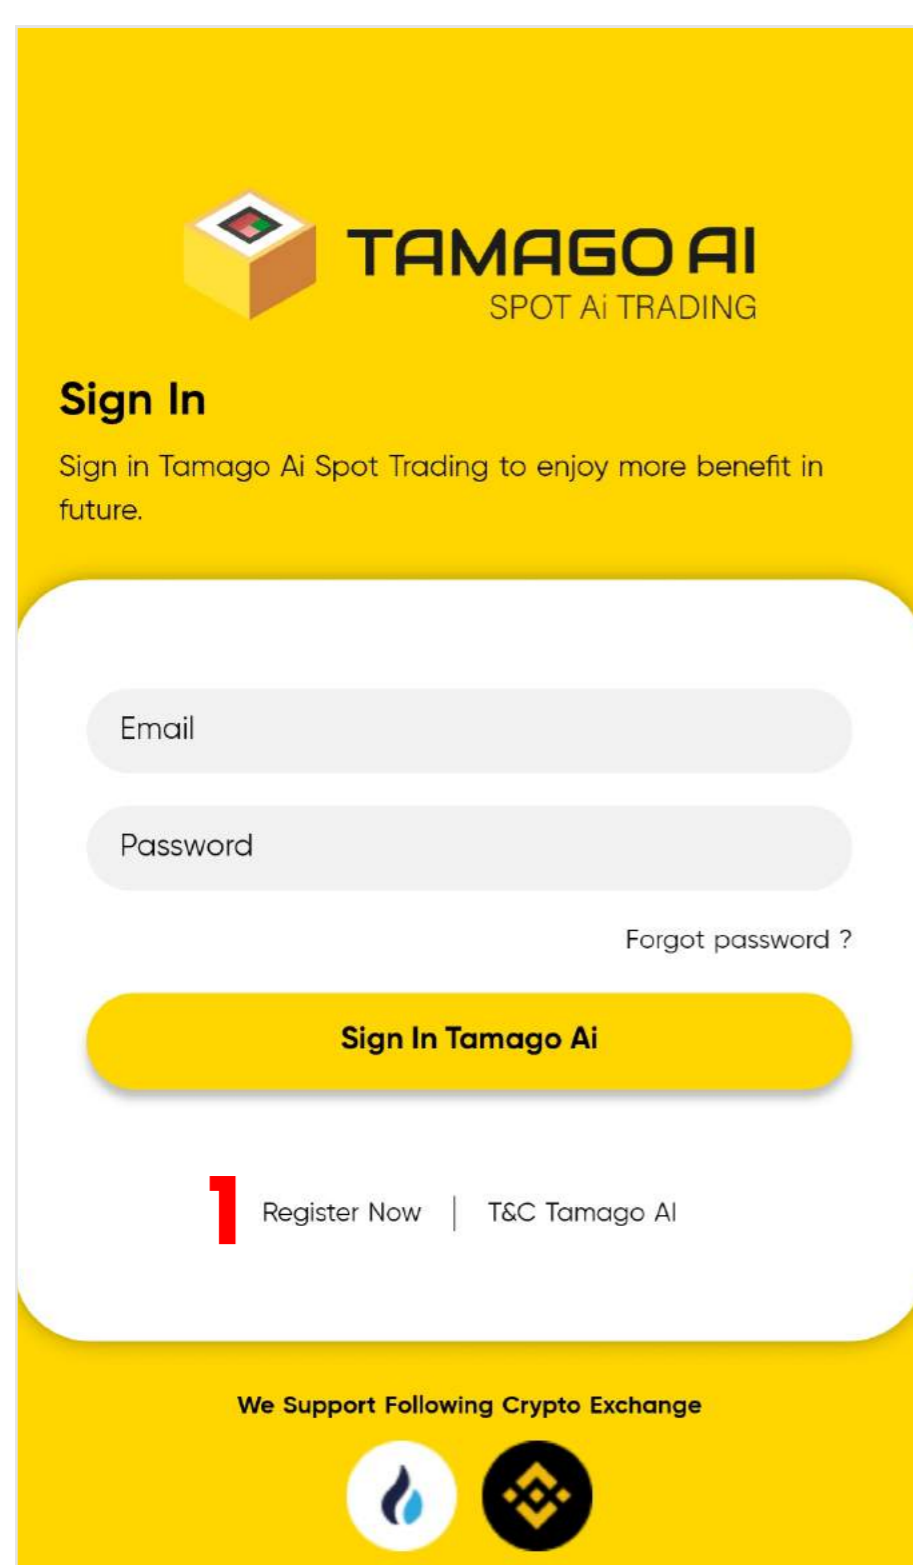

1. Insert your register email
2. Insert password
3. Select **"Sign In Tamago Ai"** button

1. 输入你注册的电邮
2. 输入密码
3. 点击 **"Sign In Tamago Ai"** 按钮

HOW TO REGISTER TAMAGO AI ACCOUNT

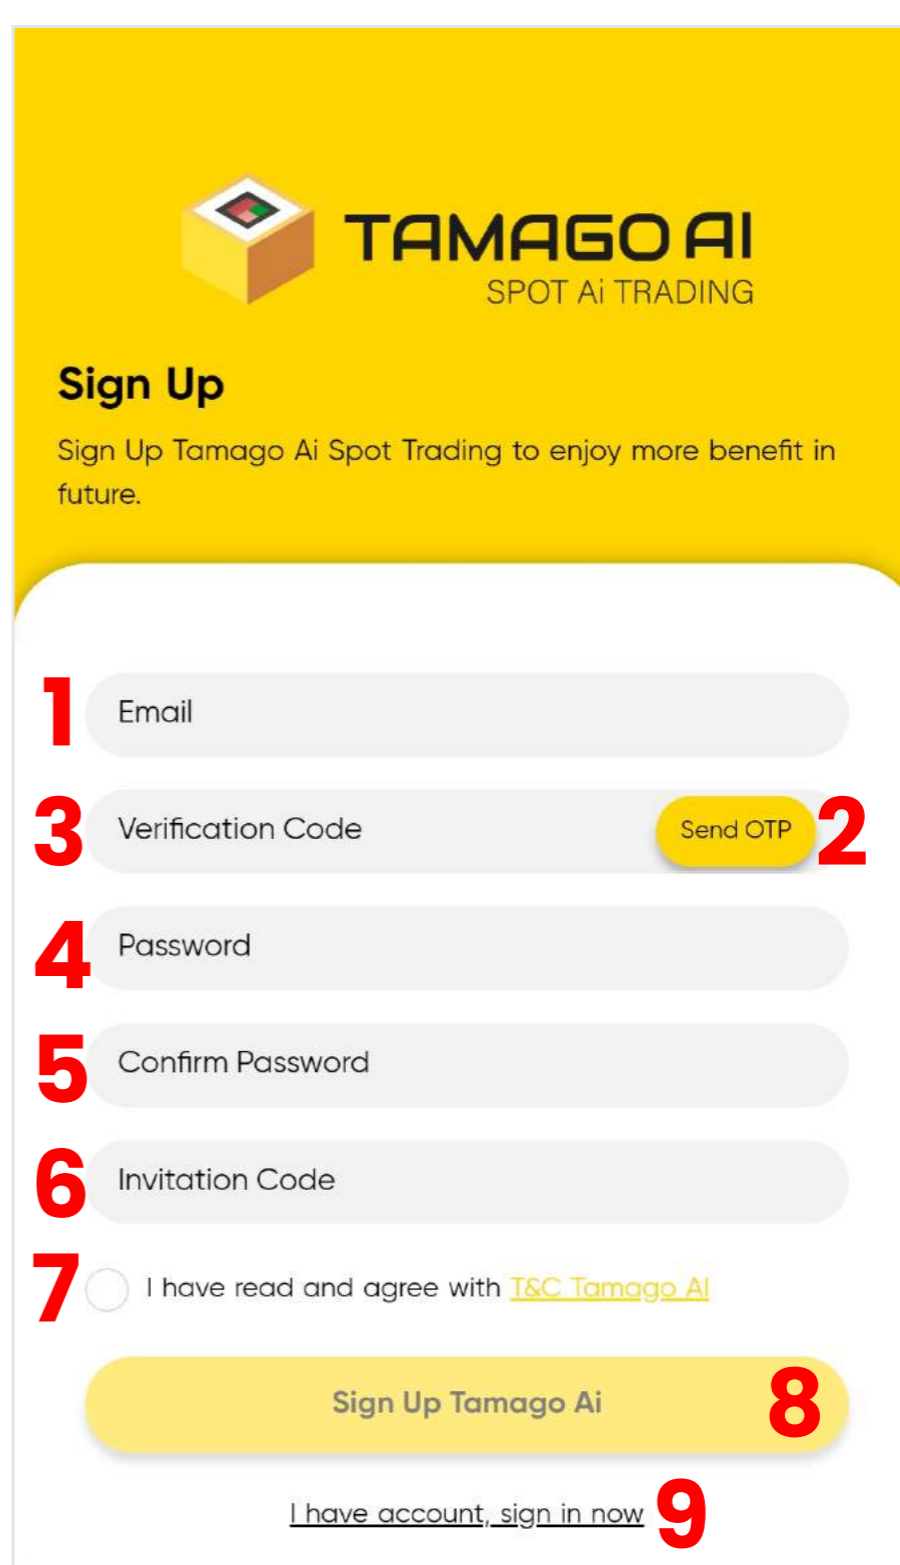

如何注册 Tamago Ai 的账号

05

1. Select **“Register Now”** button

1. 点击 **“Register Now”** 按钮

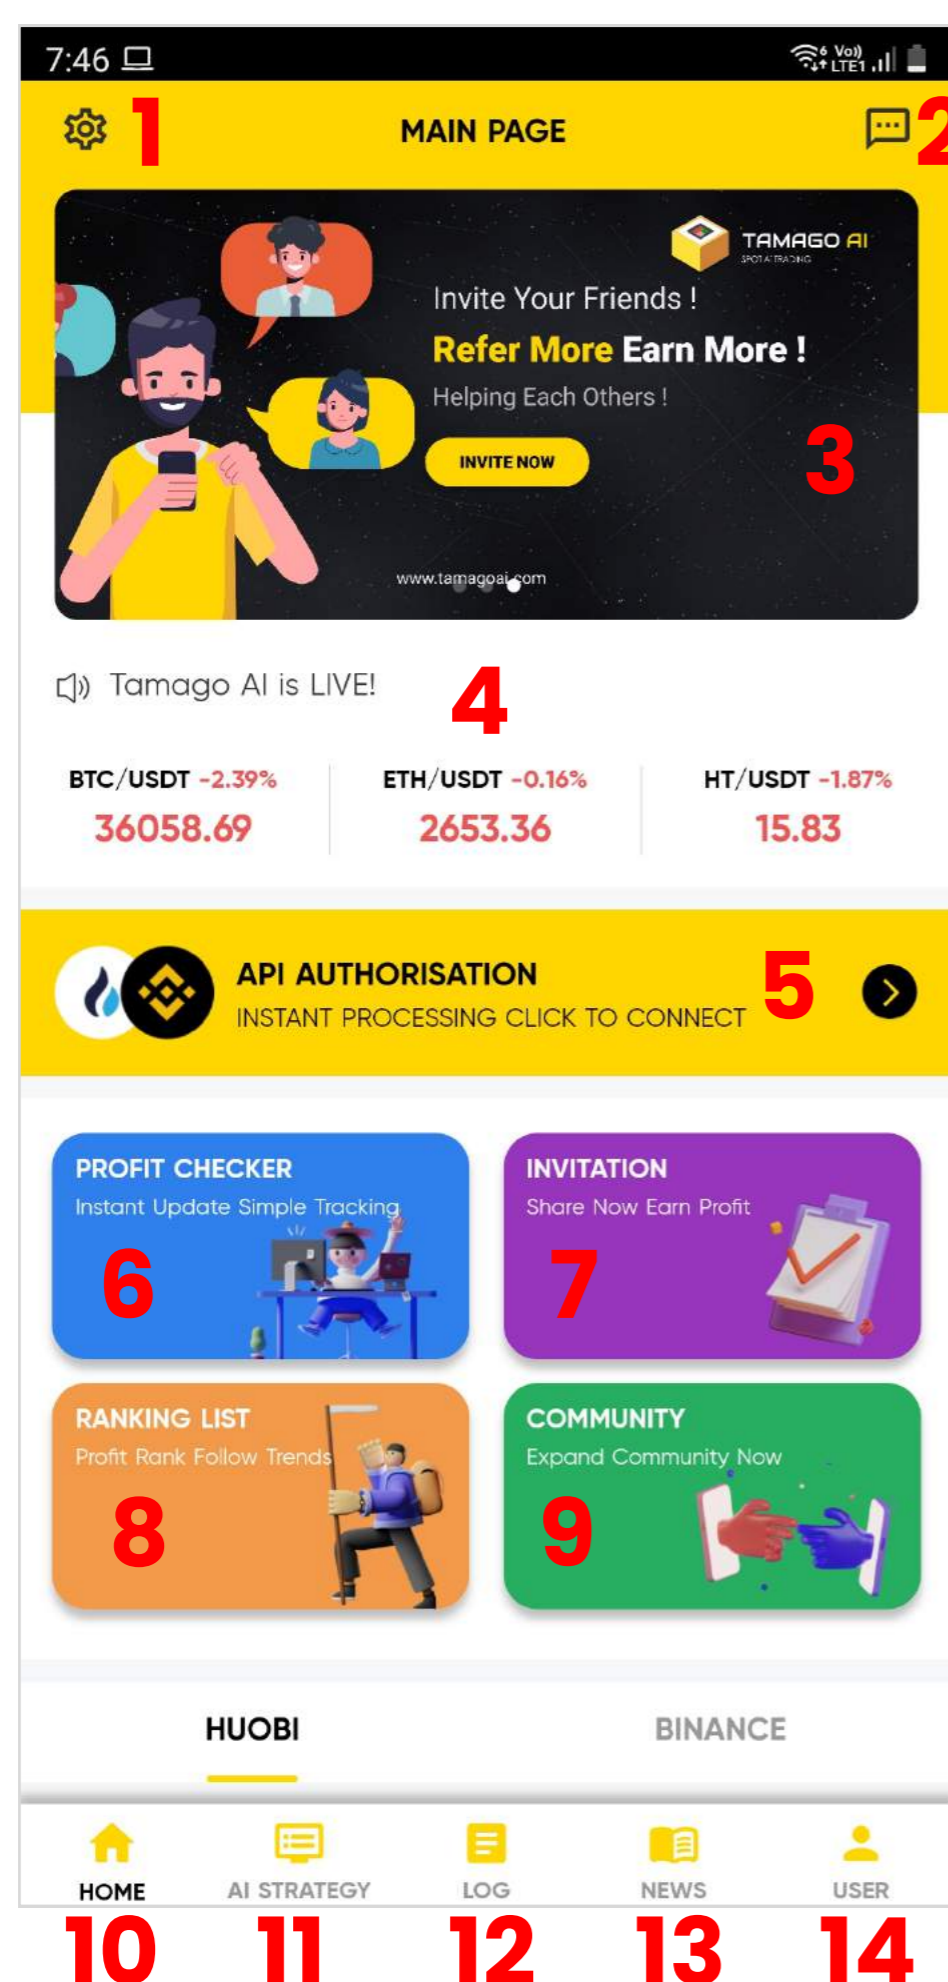

1. Insert Email
2. Select **“Send OTP”** to receive verification code at Email register
3. Insert Verification Code
4. Insert Password
5. Insert Password Again
6. Insert Invitation Code
7. Tick to agree Tamago Ai T&C
8. Select **“Sign Up Tamago Ai”** button to register account.
9. If you already have Tamago Ai account, tap here go to login page.

1. 输入电邮
2. 点击 **“Send OTP”** 获取验证码。验证码将会发送到你注册的电邮
3. 输入验证码
4. 输入密码
5. 重复输入确认密码
6. 输入邀请码
7. 点击打勾确认同意 Tamago Ai 的条规
8. 点击 **“Sign Up Tamago Ai”** 按钮注册账号
9. 如果你已经拥有 Tamago Ai 的账号，点击这里前往登入页面

HOW TO RETRIEVE HUOBI EXCHANGE API

如何获取火币 API

07

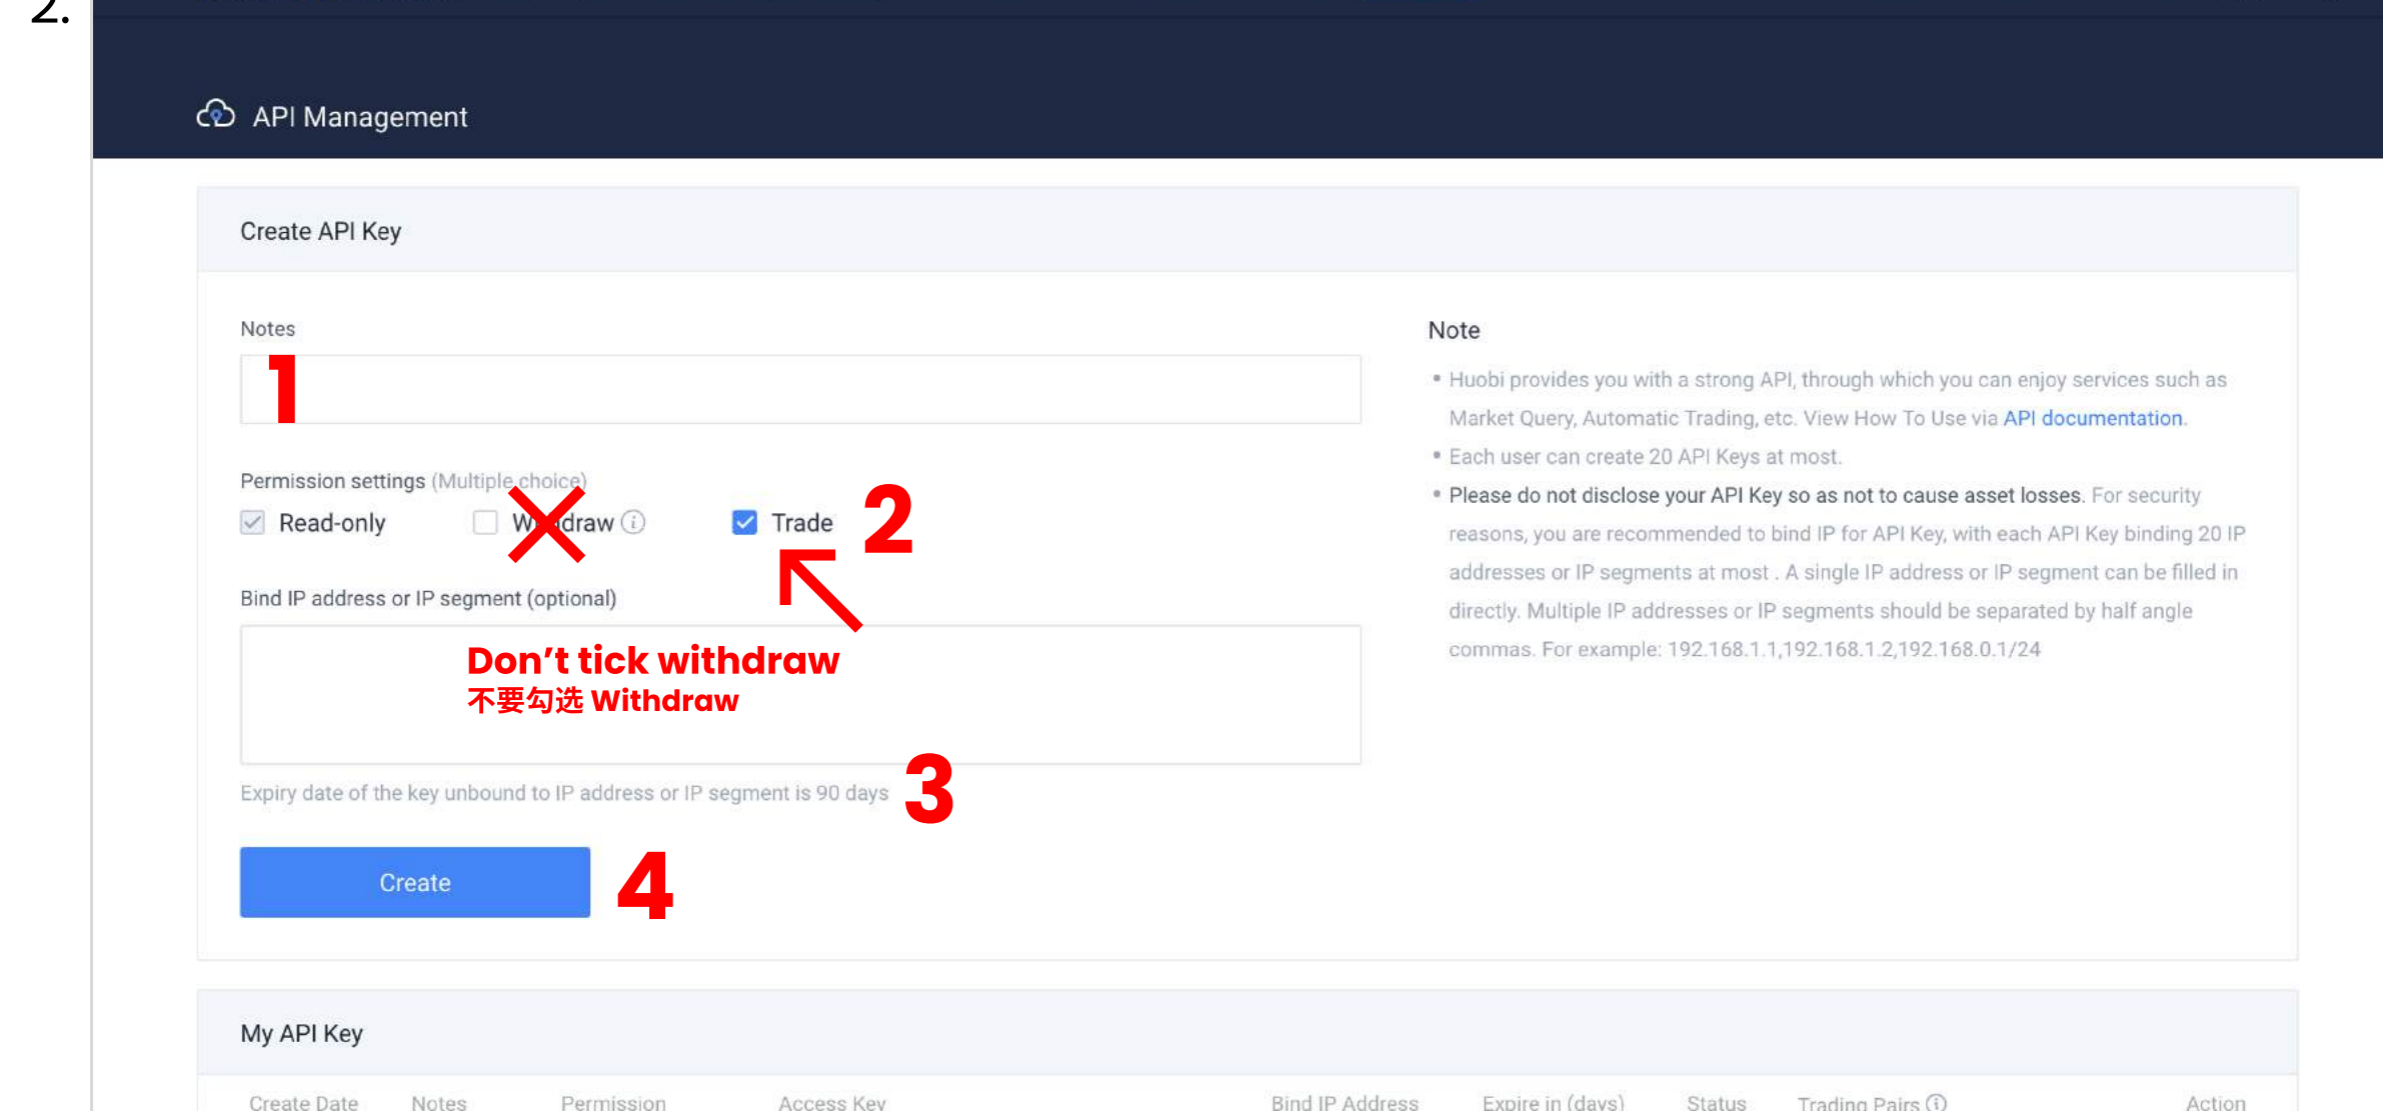

1. Login Huobi Exchange and select user icon

2. Then, select “API Management”

1. 登录火币交易所，然后选择用户。

2. 接着，选择 “API Management”

1. Insert Notes or Title

2. Then, Tick on Trade

3. Bind IP address. This is optional, so user can ignore it

4. Then select “Create” button to generate API Key

Important

*Every Huobi API Key only valid for 90 days. User have to recreate and add new API Key every 3 months

1. 输入标题

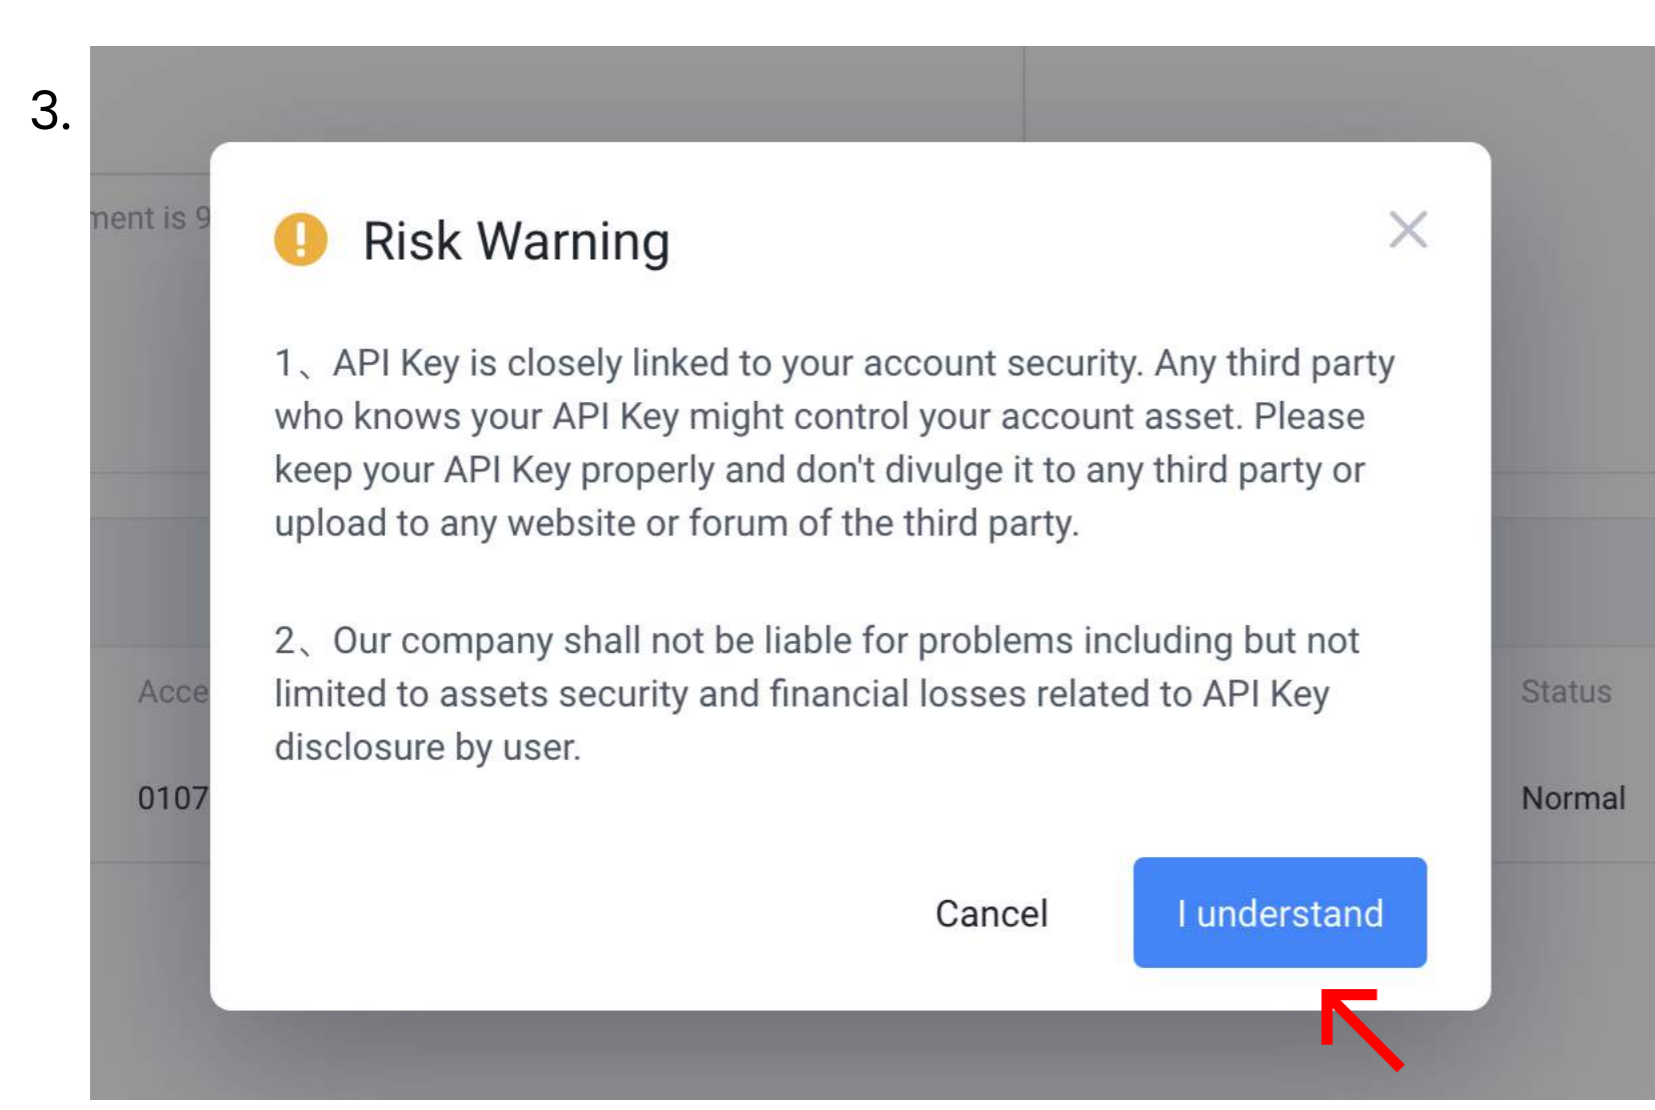

2. 点击添加 Trade

3. 绑定 IP Address. 由于这个是非强制性的，所以用户可以选择忽略它

4. 点击 “Create” 按钮生成 API Key

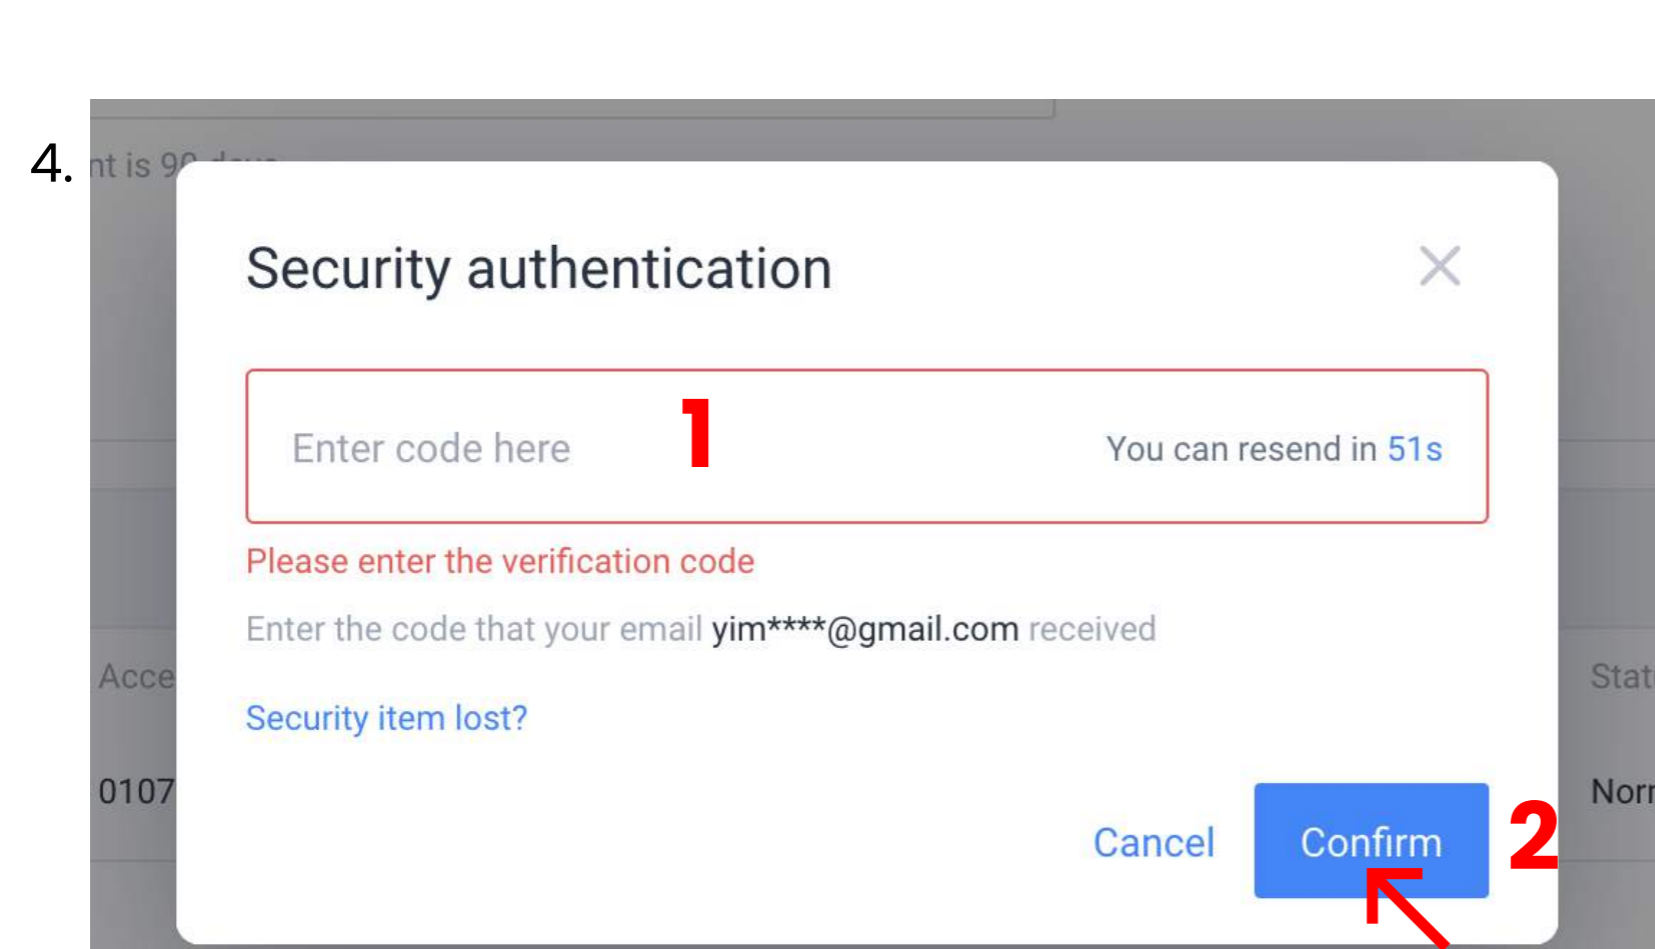

Important

*由于每一个火币 API Key 只能使用 90 天，所以用户必须每 3 个月更新与添加新的 API Key

Select “I Understand” button

选择 “I Understand” 按钮

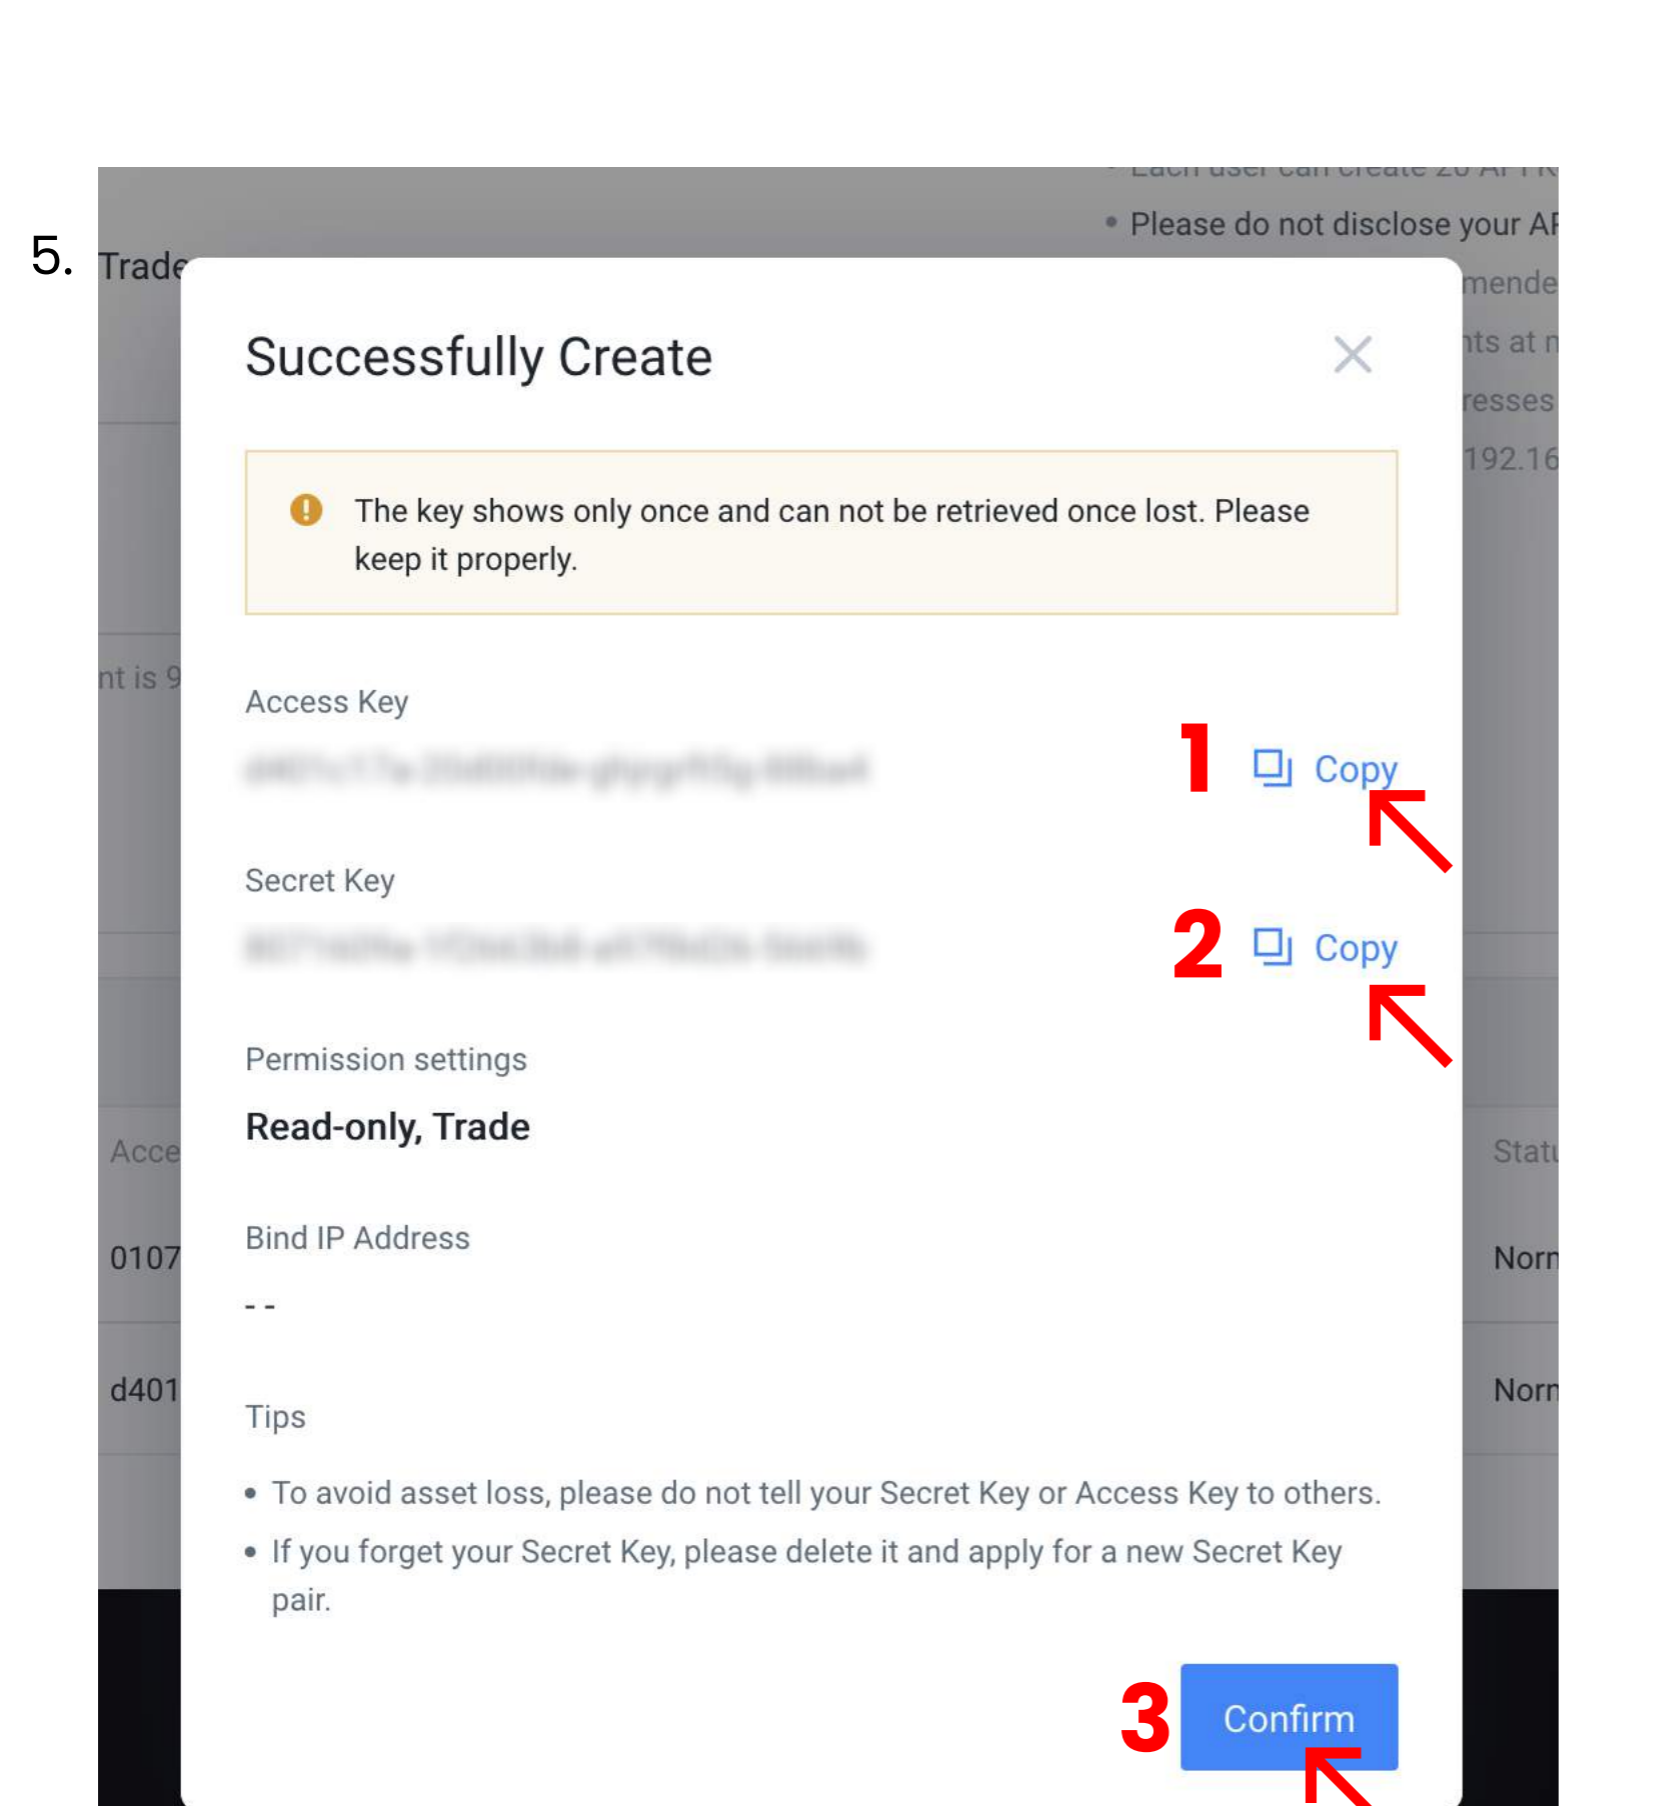

1. Insert verification code

2. Select “Confirm” Button

1. 输入验证码

2. 选择 “Confirm” 按钮

1. Copy **Access Key**

2. Copy **Secret Key**

3. Select “Confirm Button”

Important

*Don't confirm first if you did not copy the key. Once you close, this key will not be able to retrieve.

1. 复制 **Access Key**

2. 复制 **Secret Key**

3. 最后，点击 “Confirm” 按钮

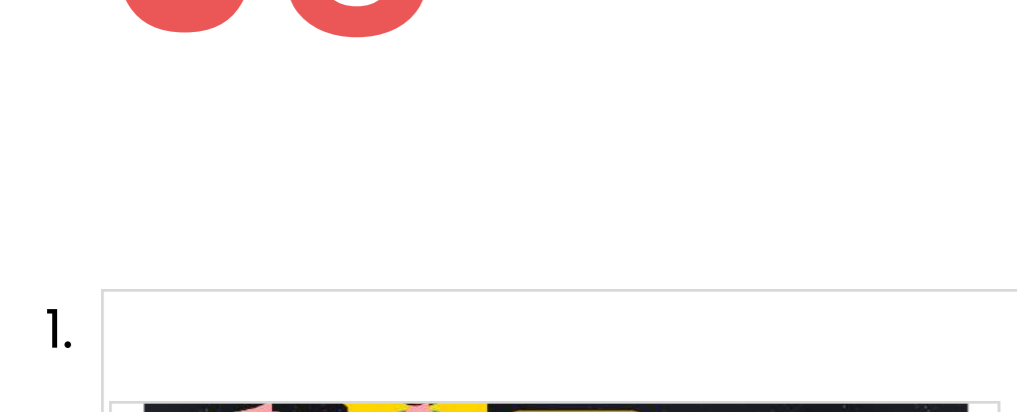

Important

*如果你还没有复制 Access 和 Secret Key，千万不要点击 “Confirm” 按钮。这个窗口一旦关闭，这些 Key 就找不回来了。

HOW TO ADD HUOBI API INTO TAMAGO AI

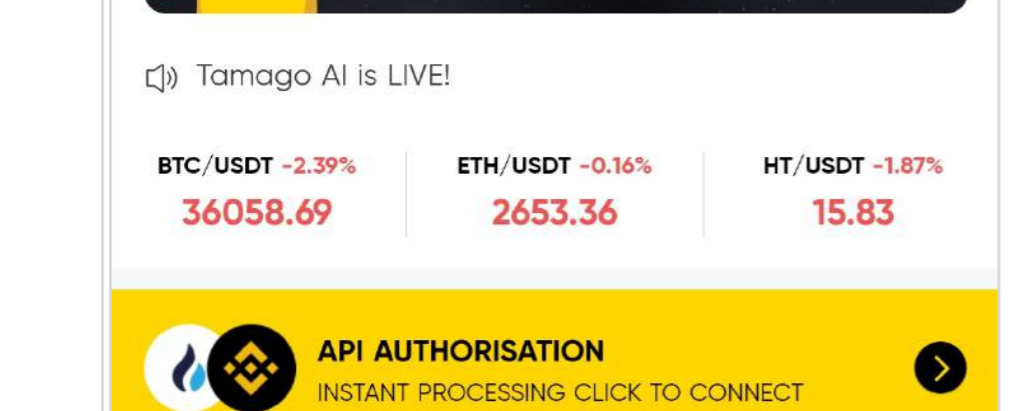

如何在 Tamago Ai 添加 HUOBI API

08

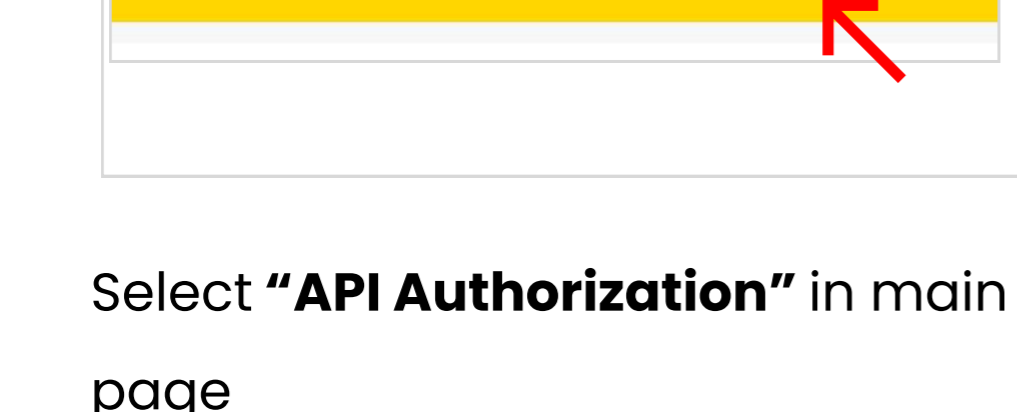

1. Select “API Authorization” in main page

在主页面点击 “API Authorization” 按钮

2. Select “Huobi” to add Huobi API

点击 “Huobi” 按钮添加火币的 API

3. Select “Add API Key”

点击 “Add API Key” 按钮

1. Paste the API Key copy from Huobi Exchange

2. Paste the Secret Key copy from Huobi Exchange

3. Select “Import Key”

1. 粘贴从火币上复制的 API Key

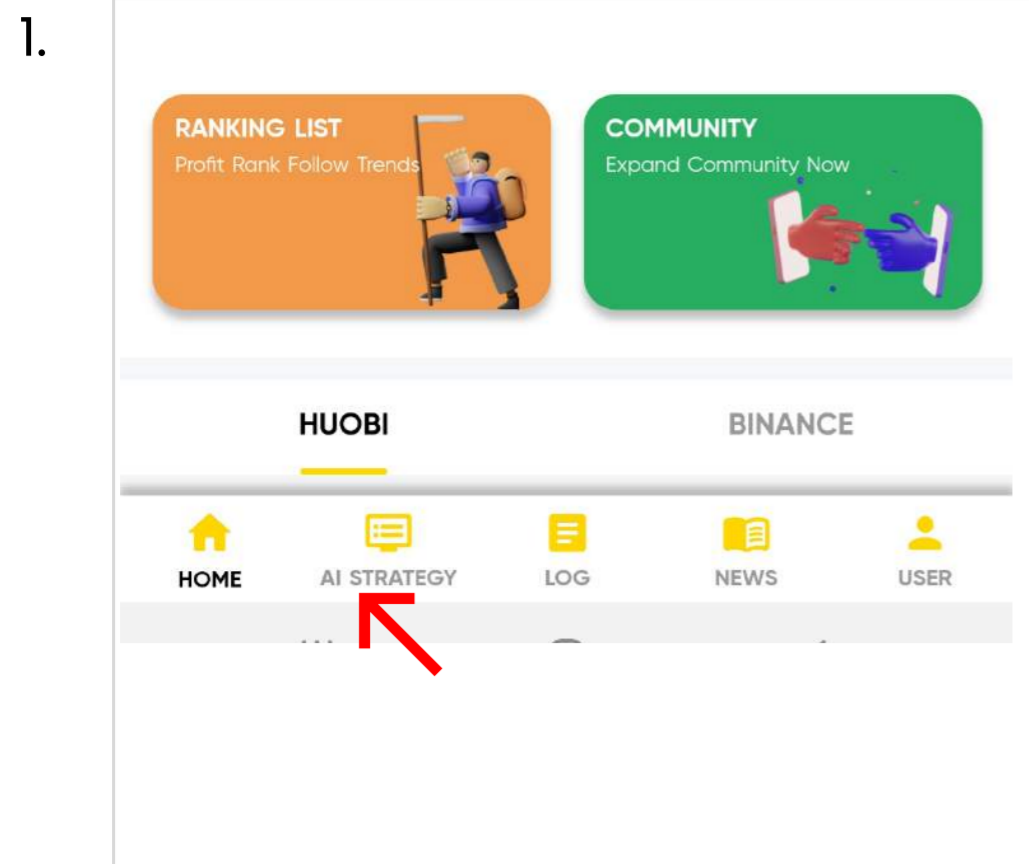

2. 粘贴从火币上复制的 Secret Key

3. 点击 “Import Key” 按钮

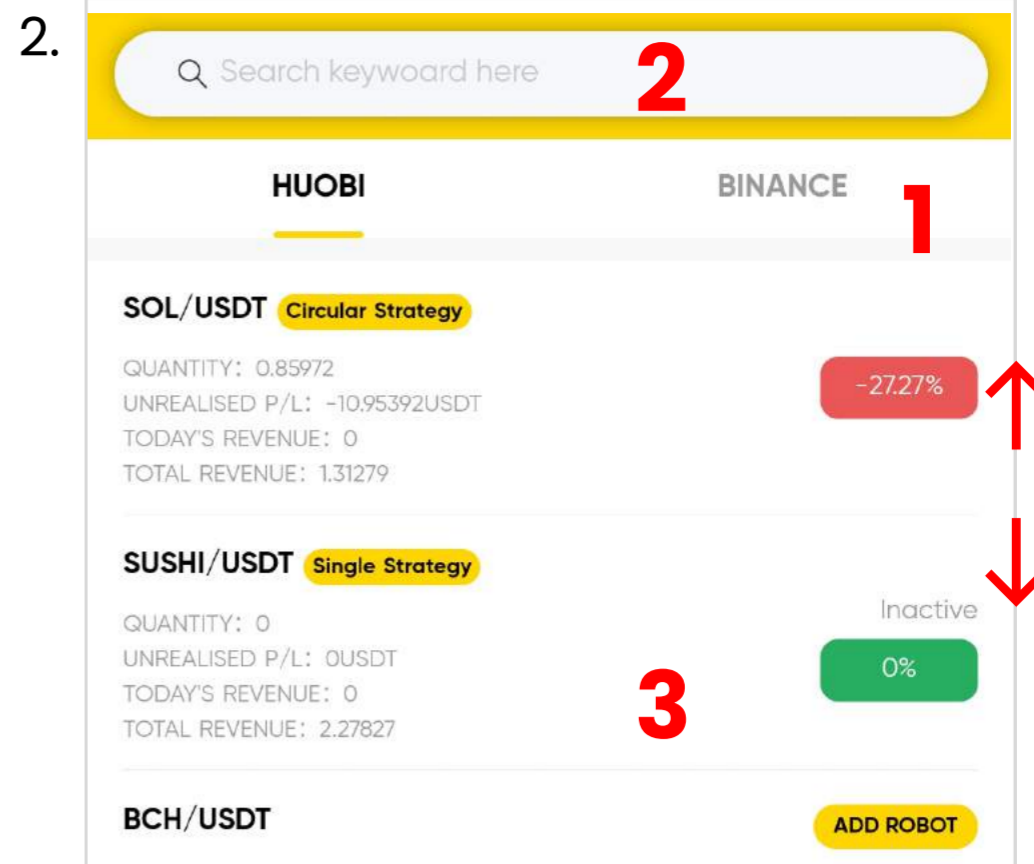

HOW TO ADD AND SETUP AI TRADING ROBOT

如何添加与设定 AI 交易机器人

09

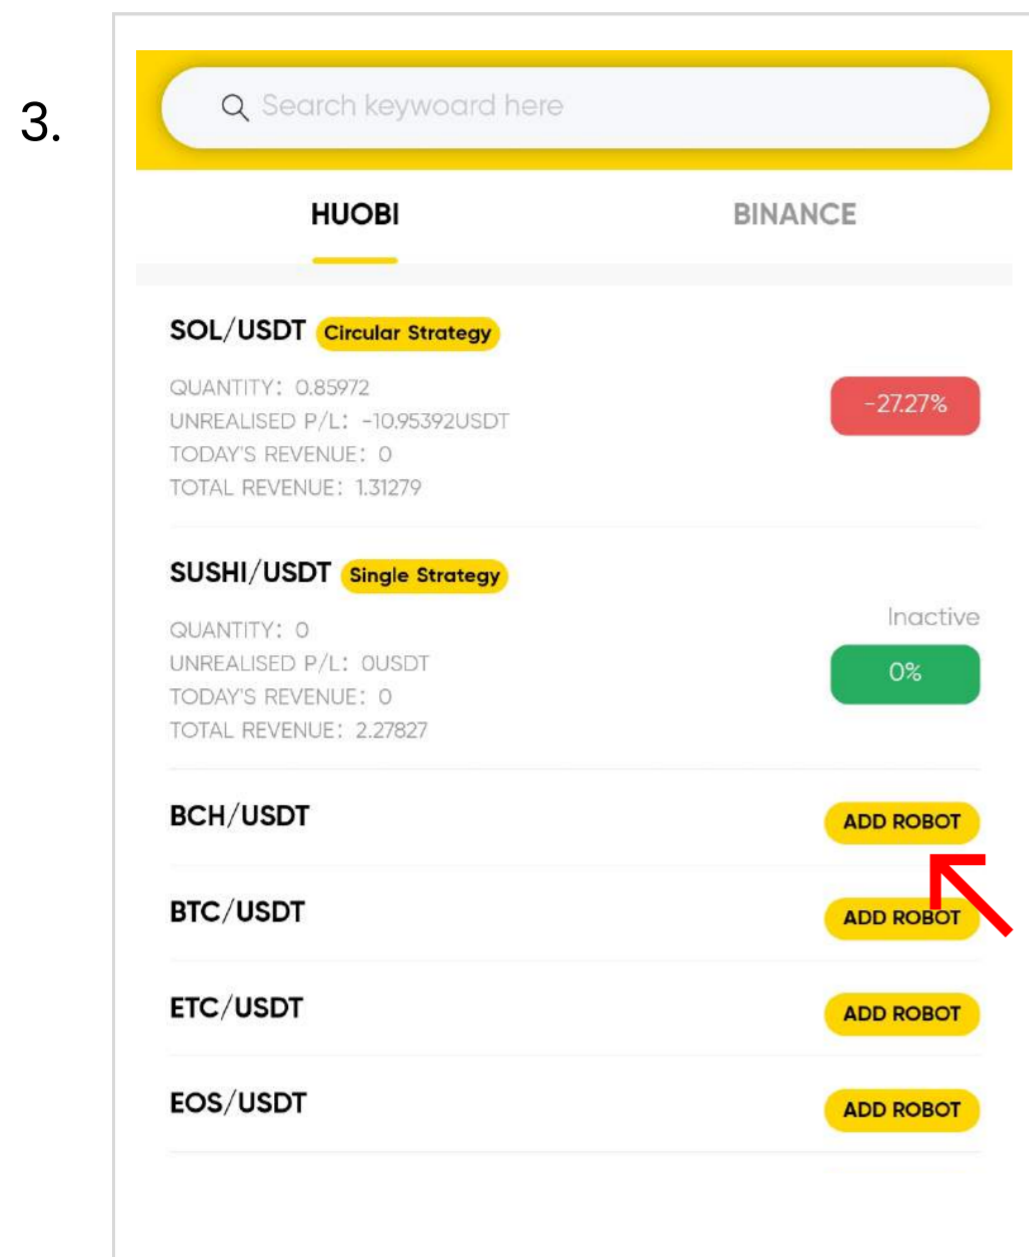

Select "Ai Strategic" in main page
在主页面点击 "Ai Strategic" 按钮

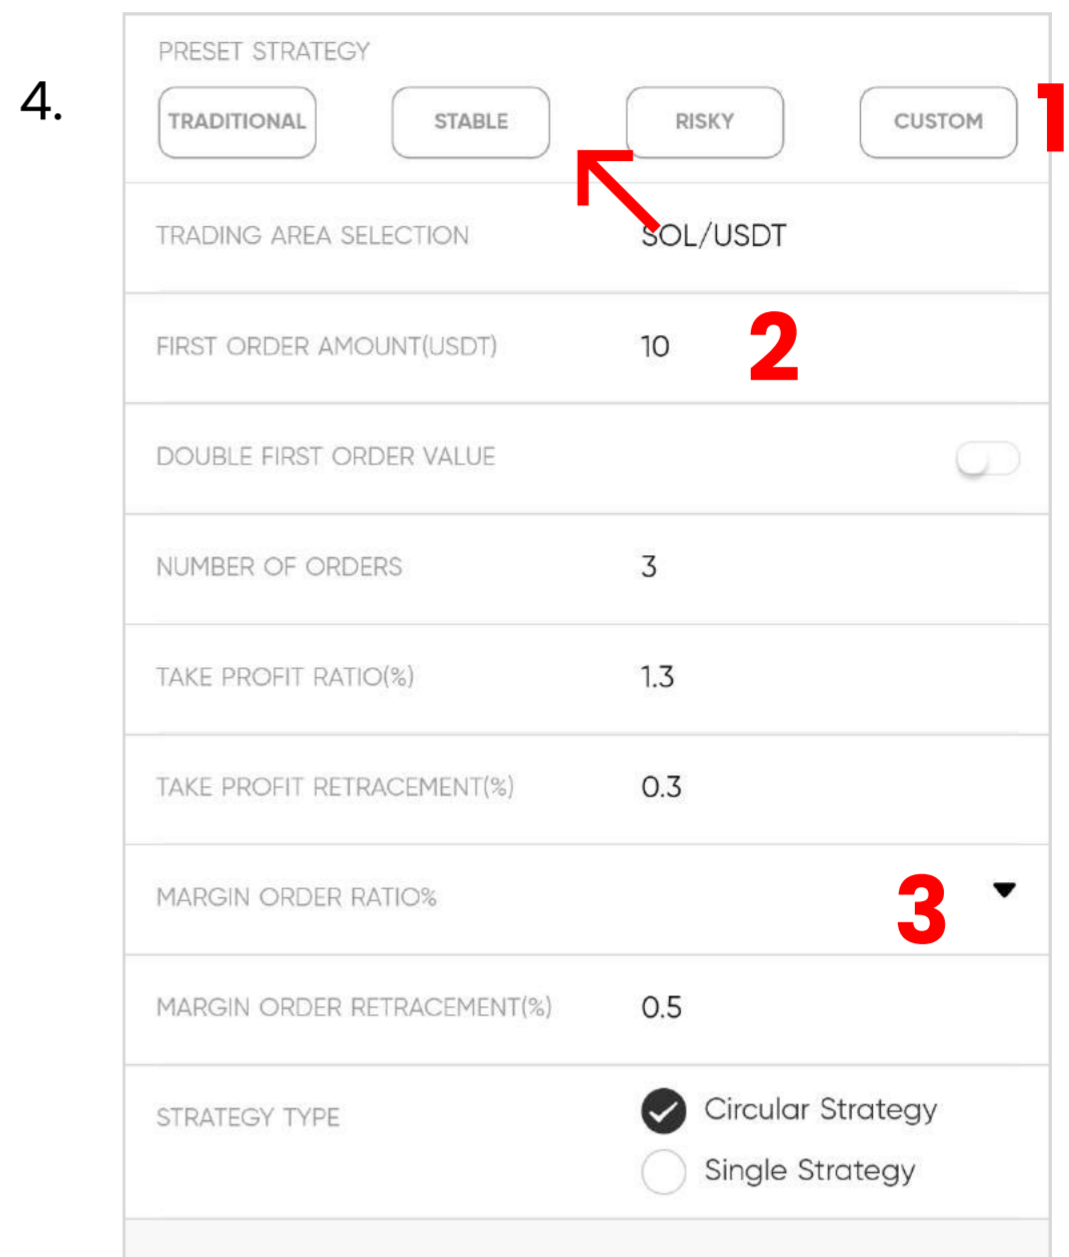

1. Select Huobi or Binance Exchange
2. Find the pair you want to trade by insert keyword.
3. Or Scroll down to search the pair

1. 选择火币或币安交易
2. 用户可以输入关键词寻找想要的配对
3. 用户也可滑下去寻找的配对

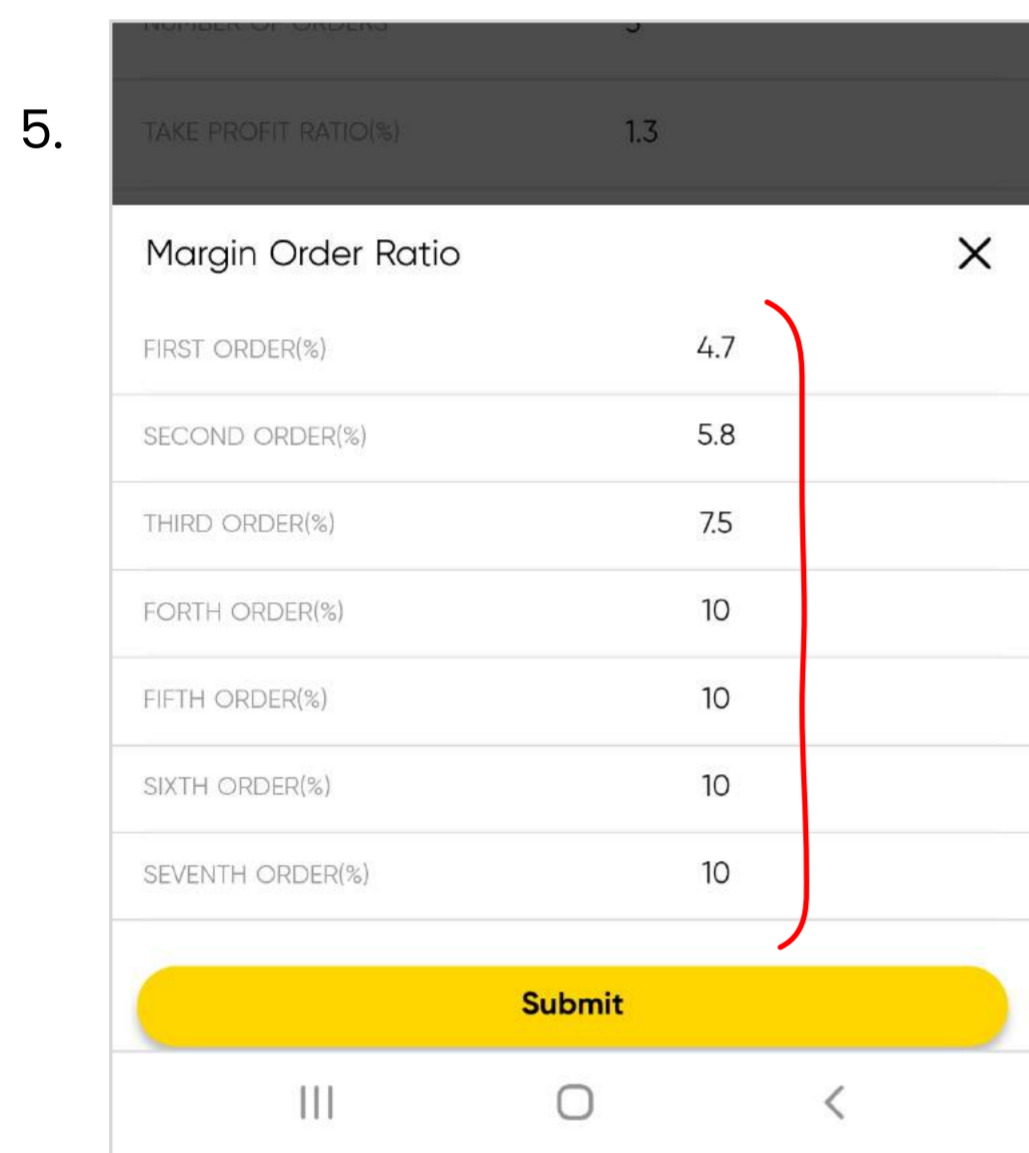

Select "Add Robot" to setup trade robot you interested
点击 "Add API Key" 按钮

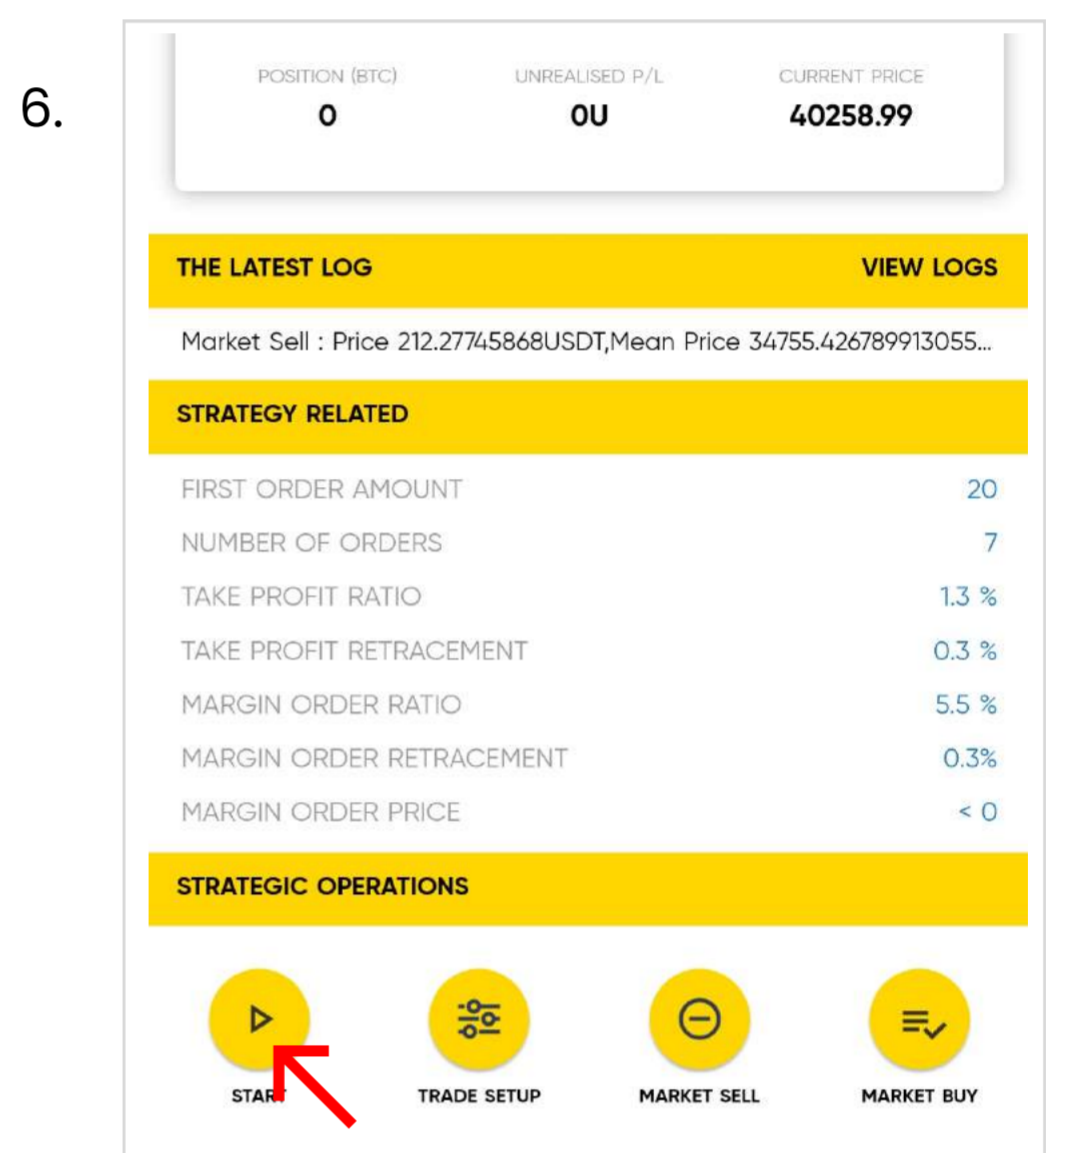

1. User can select the preset strategic provided by Tamago Ai
2. Change the First Order amount based on the table we provided
3. Change the margin order

1. 用户可根据系统提供的策略进行设定
2. 用户也可根据 Tamago Ai 提供的补仓策略进行设定调整第一次购入价格
3. 接着调整 Margin Order Ratio

1. User advise follow the table provided to make setting
2. Select "Submit" button after setup all Margin Order Ratio

1. 用户建议根据我们的提供的补仓列表进行调整。
2. 调整完成补仓额度后，点击 "Submit" 按钮

Important
Select "Start" to activate Ai Robot
点击 "Start" 按钮启动交易机器人

Repeat step above to activate another robot
重复以上的步骤开启其他的交易机器人

Important

User's asset required minimum 10 USDT to activate Ai Robot.

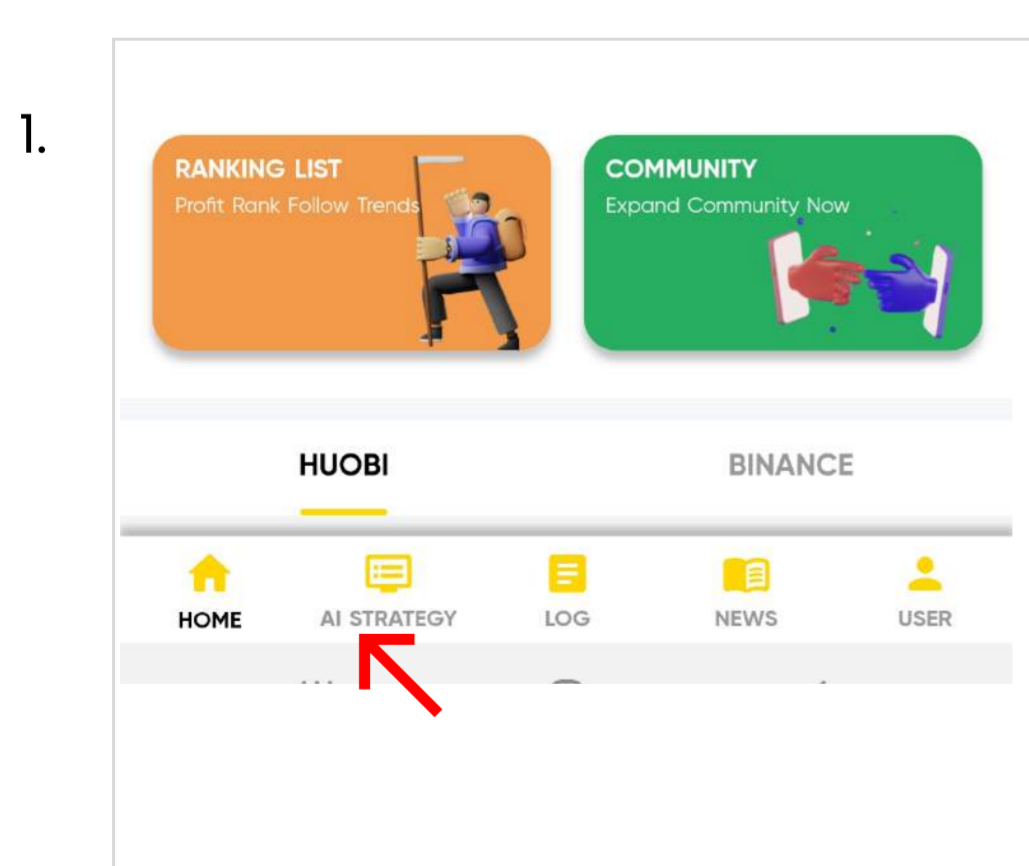

用户至少需要 10 USDT 的资金才可以启动 Ai 交易机器人。

Strategy 策略	Description 注解
Circular 循环	Trade is repetitive based on setup until stop is trigger by user. 机器人根据设定持续交易直到用户点击暂停按钮。
Single 单次	Assume that user insufficient funds to cover when extreme market condition is coming, user after sell, and return fund can be use at another coins pair to cover. 如果当前用户对动荡市场时交易资金暂时不足，用户可以先将一些配对更换至单次策略（出售后停止购买），在资金回笼后针对重要的交易配对进行补仓。
Market Sell 立即出售	For user sell all the coin according current market price in manual way. 让用户以手动方式根据当前市场价格立即出售现持有的货币。
Market Buy 立即购买	For user buy the coin according current market price to cover the position manually. 让用户根据当前市场价格立即购买货币，进行手动补仓。

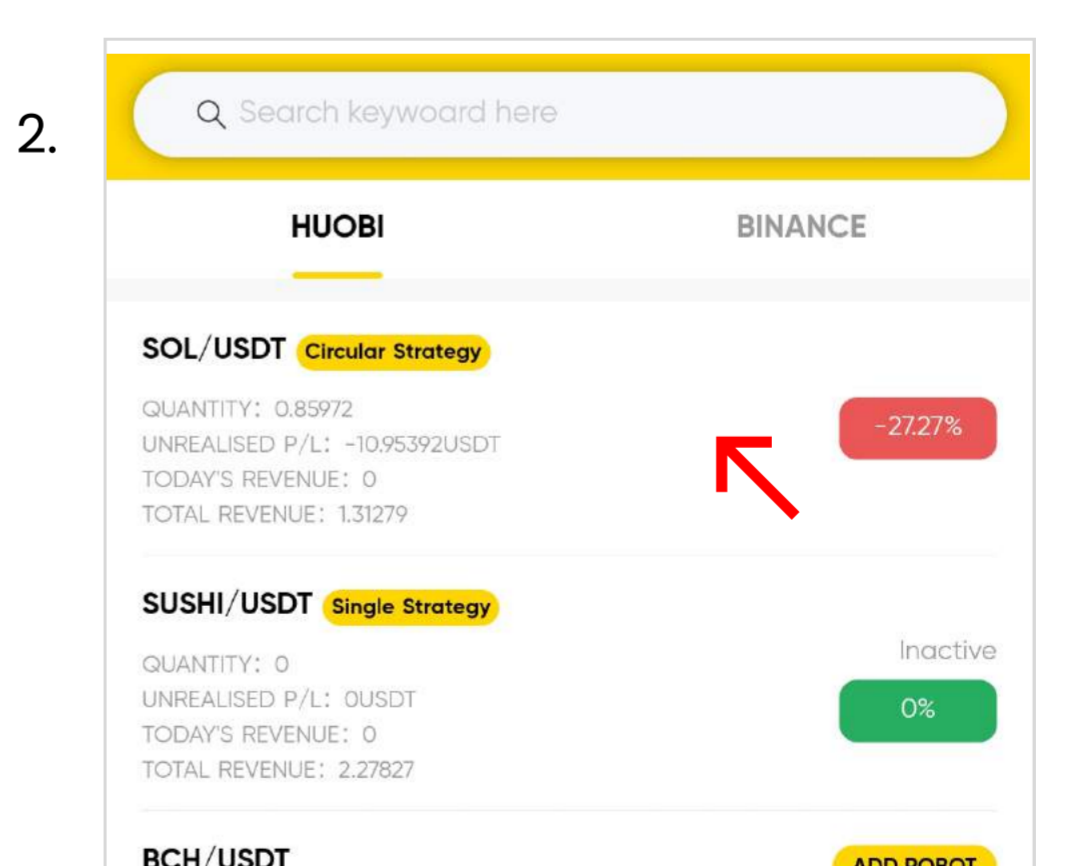

HOW TO SETTING THE AI TRADING ROBOT STILL IN ACTIVE

如何设定正运行的 AI 机器人

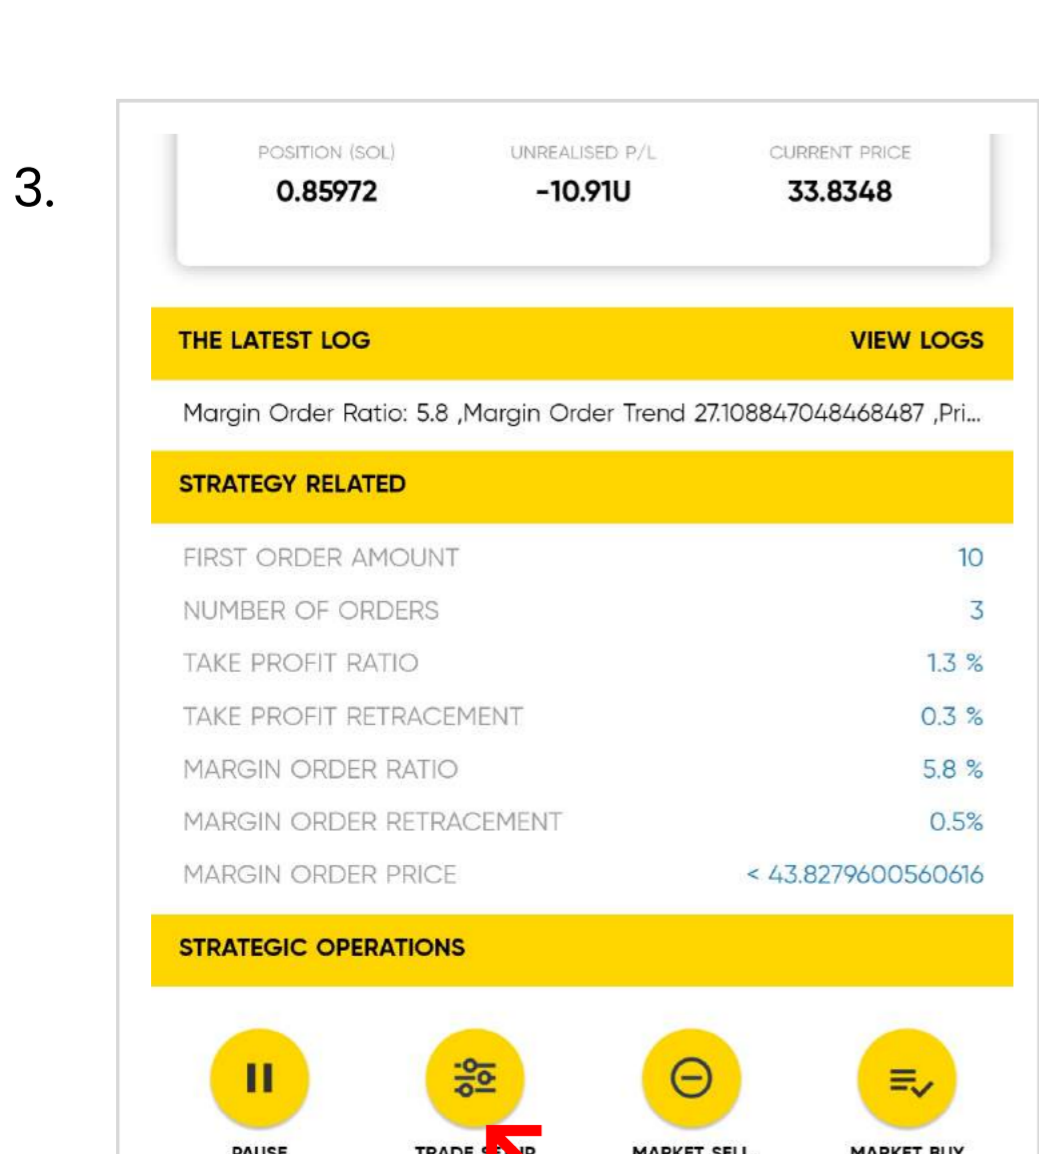

10

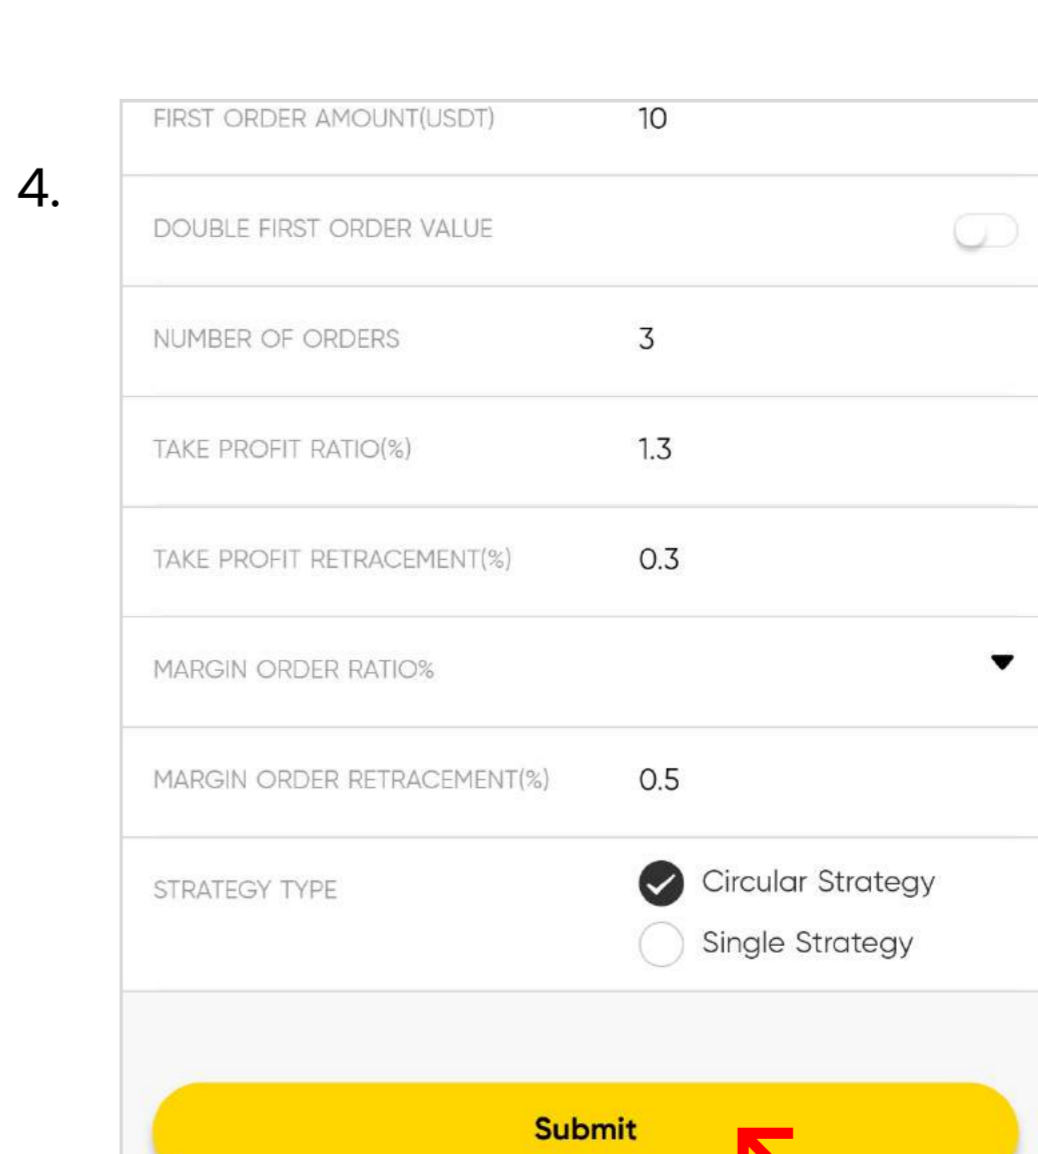

Select "Ai Strategic" in main page
在主页面点击 "Ai Strategic" 按钮

Select the Ai Robot still active
选择正启动中的 Ai 机器人

Select "Trade Setup" button
点击 "Trade Setup" 按钮

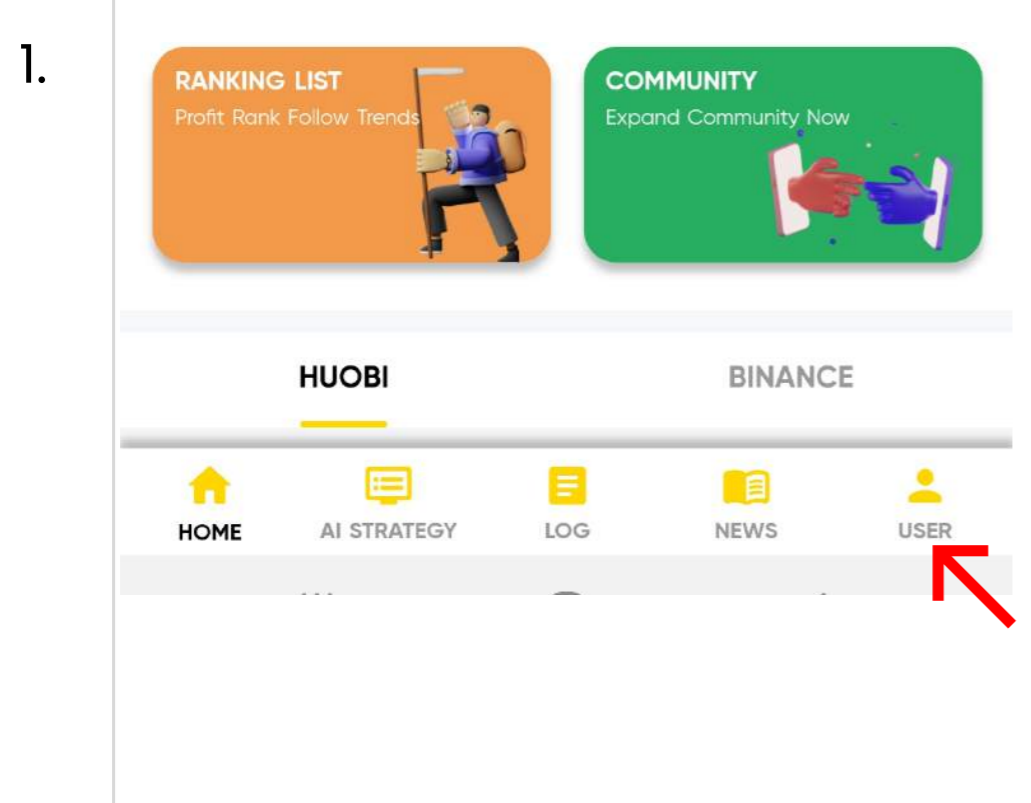

According previos step to make setting, then select "Submit" button to complete the setup

根据上一个设定 Ai 机器人的教程进行设定调整。接着，点击 "Submit" 提交设定

HOW TO TOP UP USDT IN TAMAGO AI

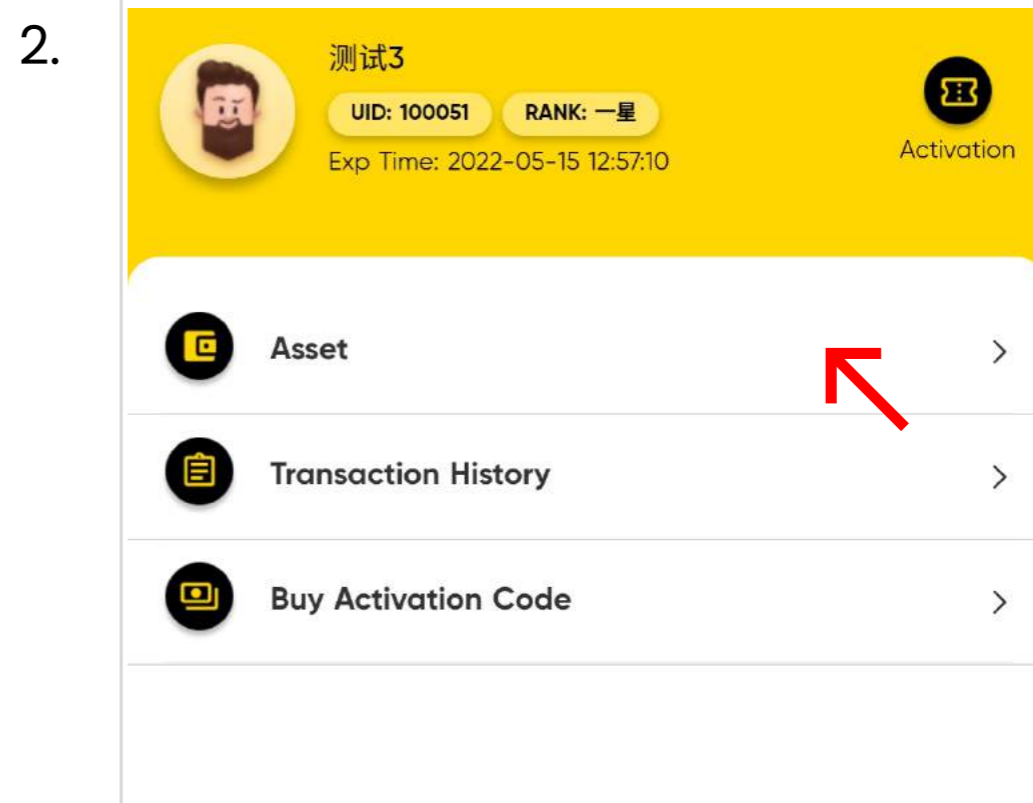

如何在 Tamago Ai 充值USDT

11

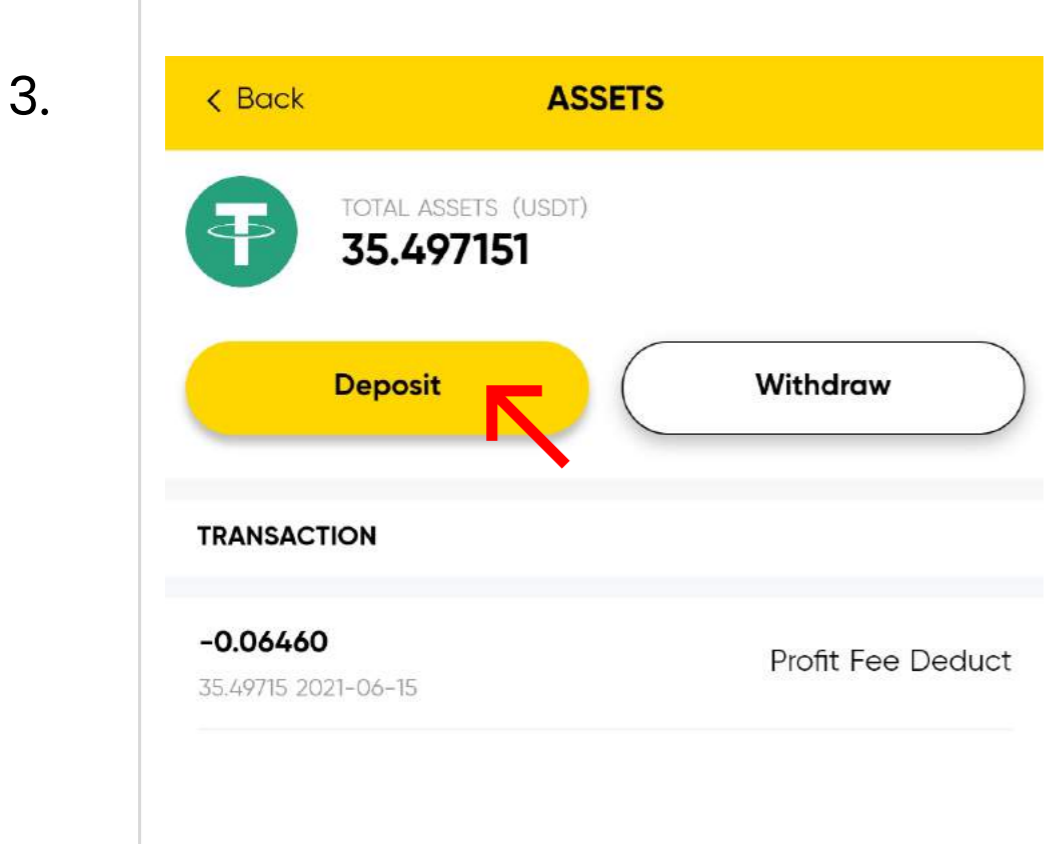

Select "User" in main page

在主页面点击 "User" 按钮

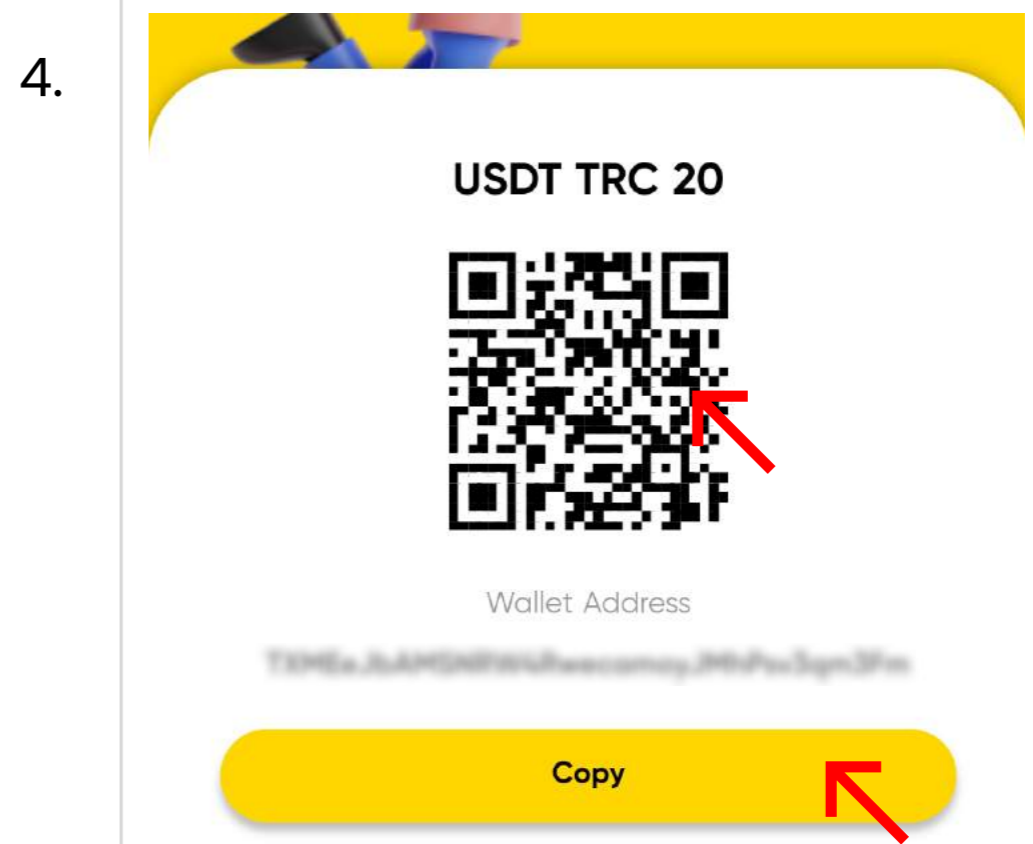

Select "Asset"

选择 "Asset" 选项

Select "Deposit" button

点击 "Deposit" 按钮

User either scan QR Code to transfer USDT or Copy the address paste in wallet to transfer

用户可选择通过扫描二维码进行USDT转账充值或复制钱包地址，然后粘贴在另一个钱包进行USDT转账充值。

Important

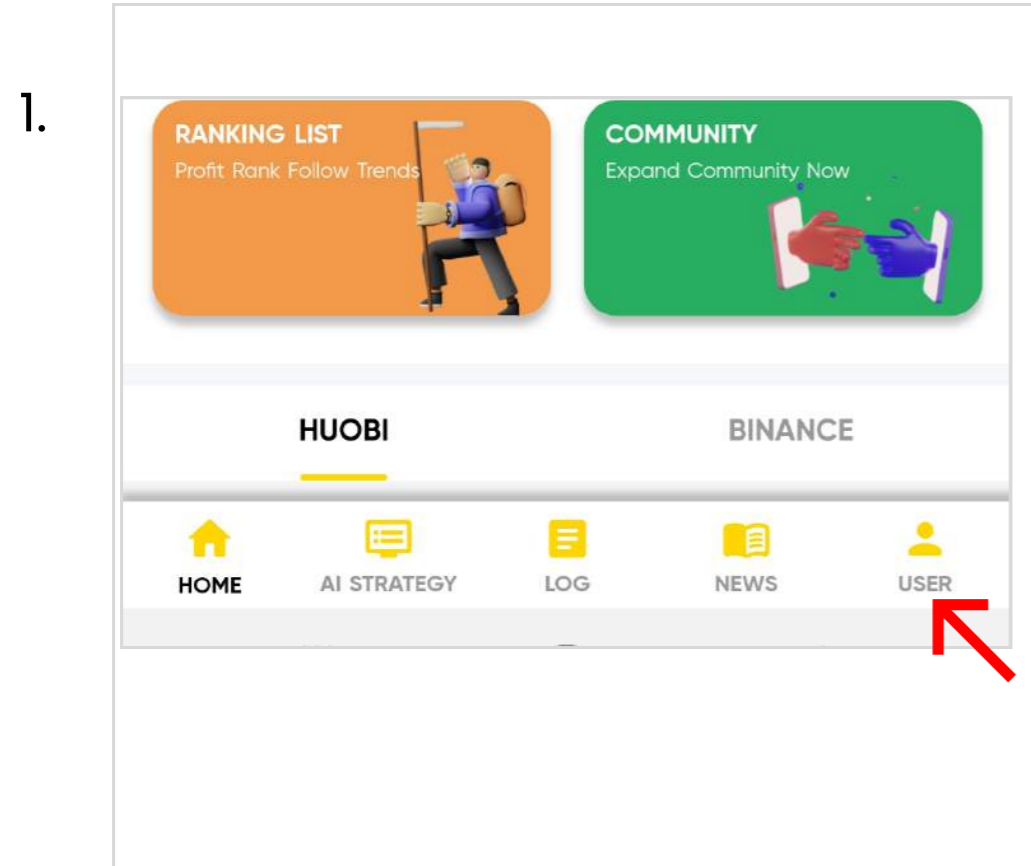

*Tamago Ai only accept USDT TRC20. User have to beware with the chain when transfer USDT to Tamago Ai.

Tamago Ai 只接受 TRC20 的 USDT。用户在进行 USDT 转账时必须留意清楚所使用的链接。

HOW TO SUBSCRIBE ACTIVATION PASS AND ACTIVATE TAMAGO AI

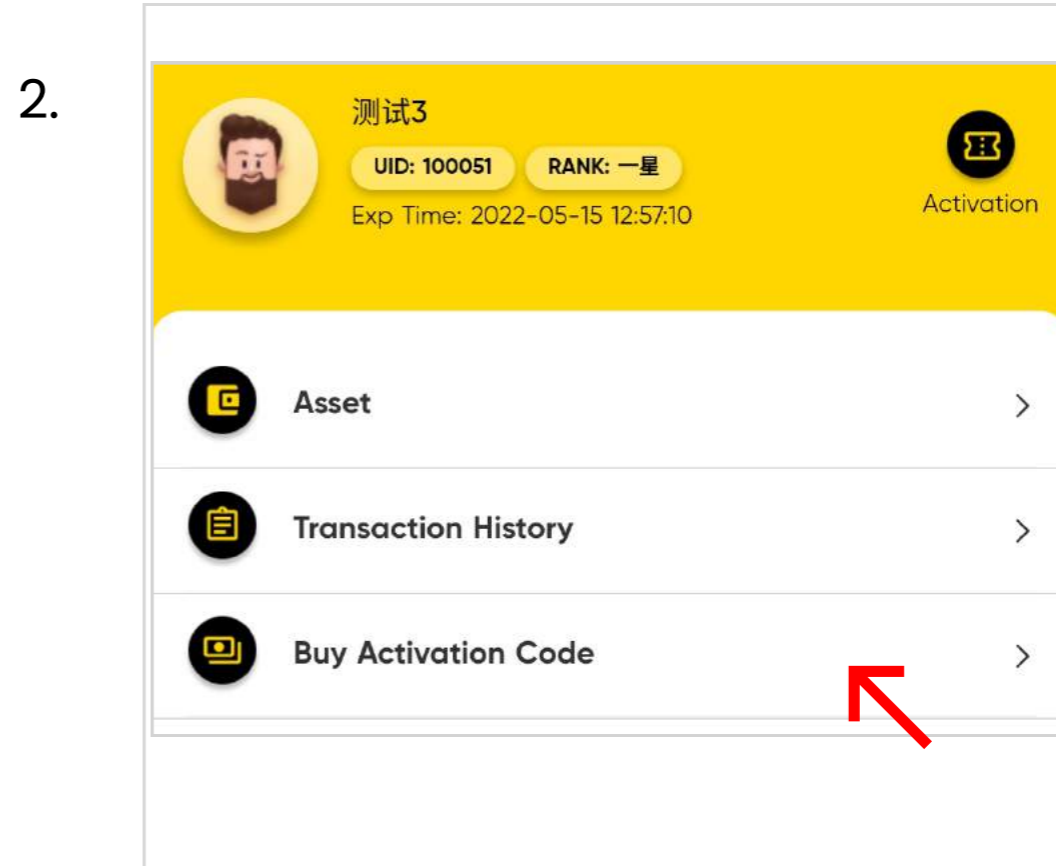

如何激活与购买 Tamago Ai 的激活配套

12

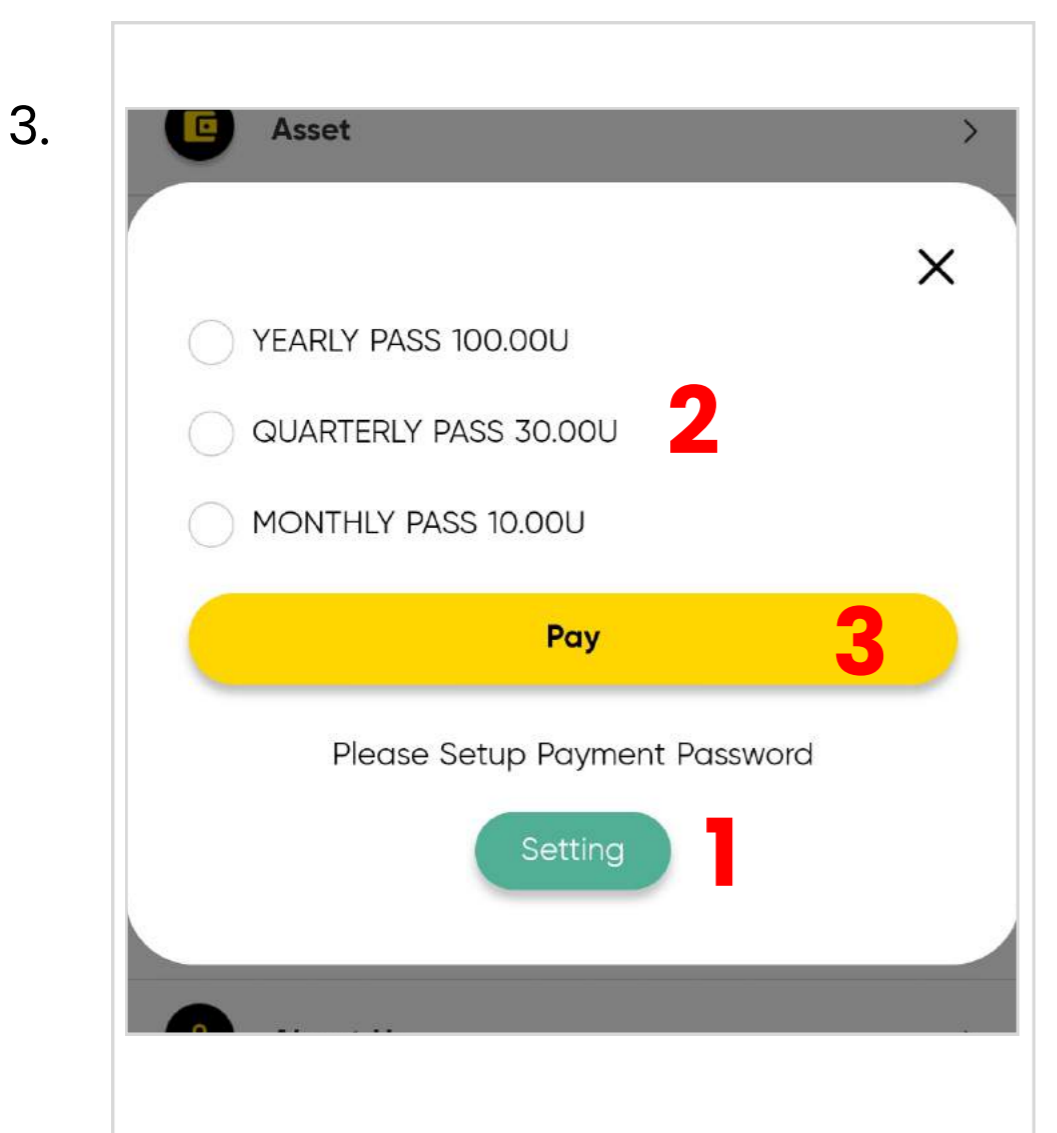

Select "Ai Strategic" in main page

在主页面点击 "Ai Strategic" 按钮

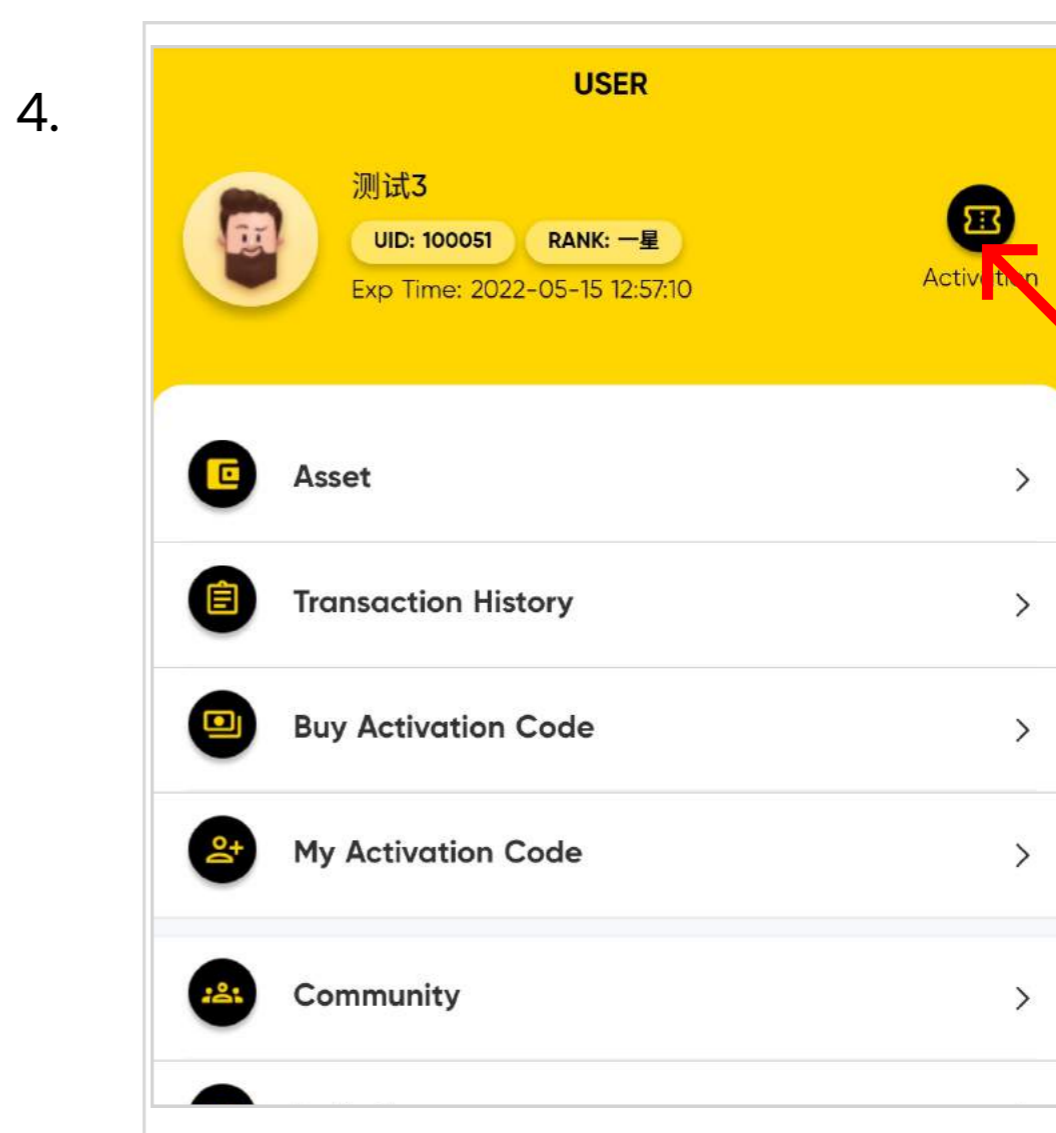

Select "Buy Activation Code"

选择 "Buy Activation Code" 选项

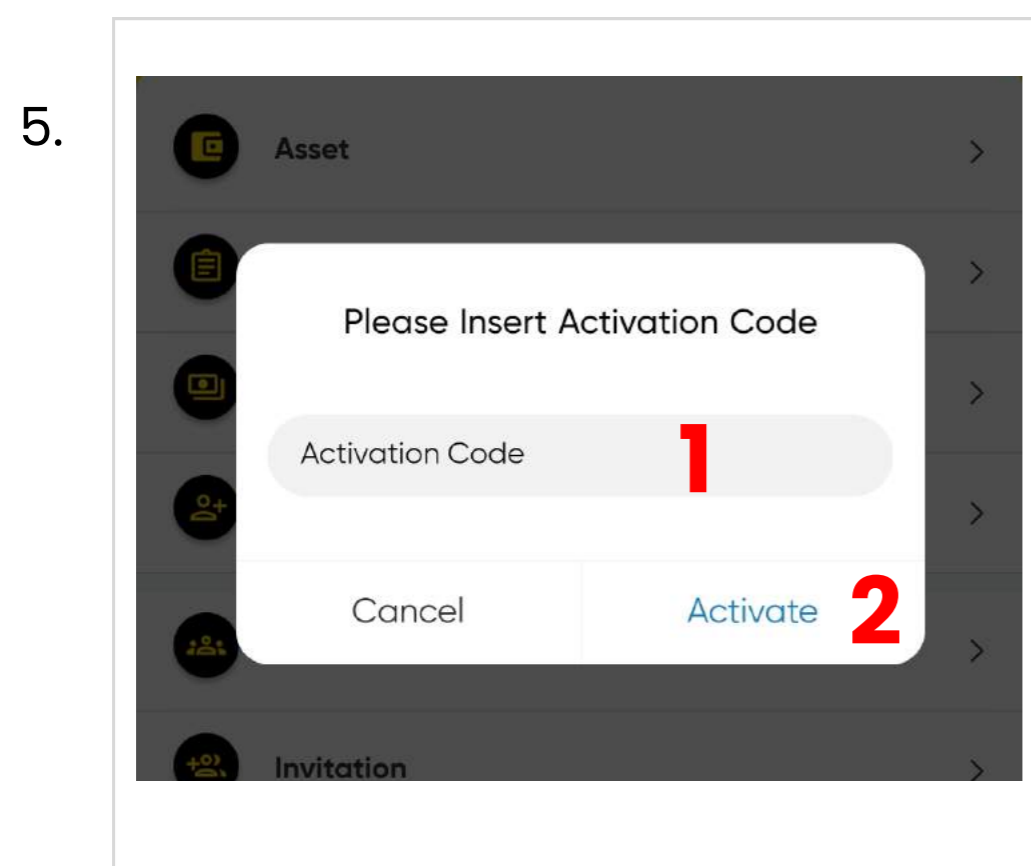

1. Setup payment password
2. Select pass you interested
3. Select "Pay" to subscribe pass and insert payment password to approve transaction

1. 用户先设置支付密码
2. 接着，选择有兴趣的激活配套
3. 点击 "Pay" 按钮进行支付，然后输入支付密码完成支付

Select "Activation" button

接着，点击 "Activation" 按钮

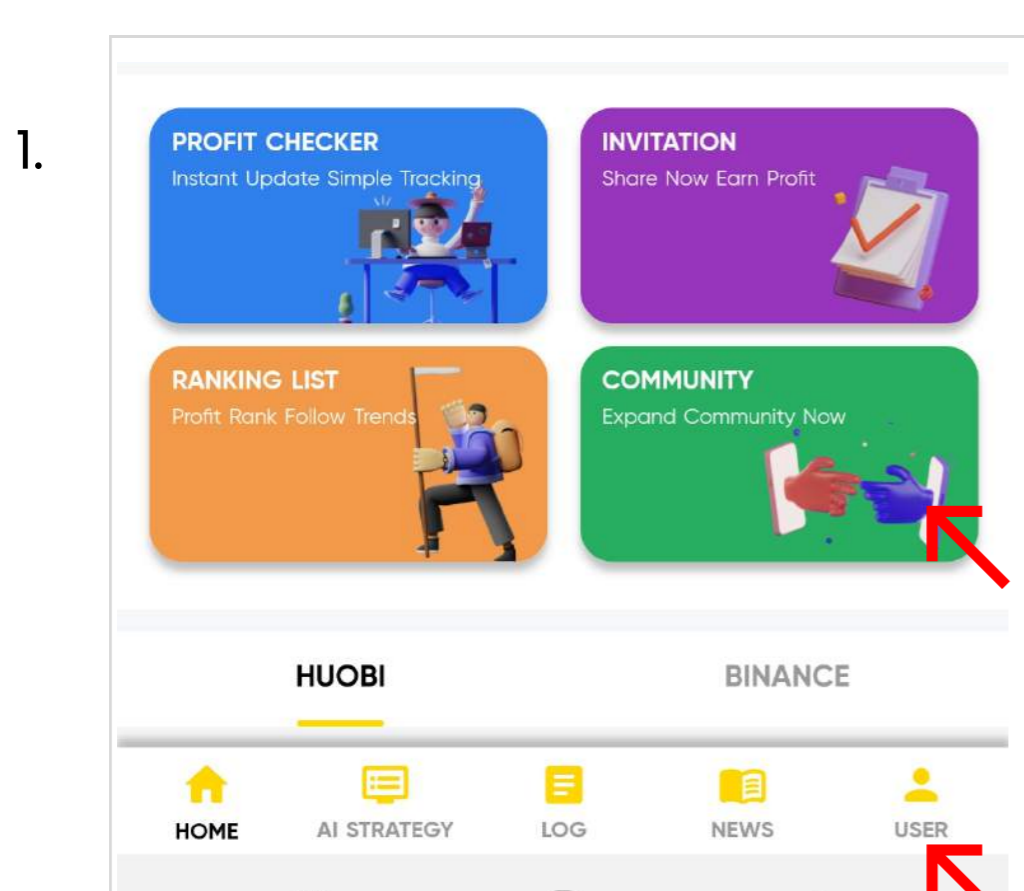

1. Insert the activation code you subscribe just now.
2. Select "Activate" to active account

1. 输入用户刚购买的激活码
2. 接着，点击 "Activate" 激活用户的账号

HOW RETRIEVE ACTIVATION CODE SUBSCRIBE

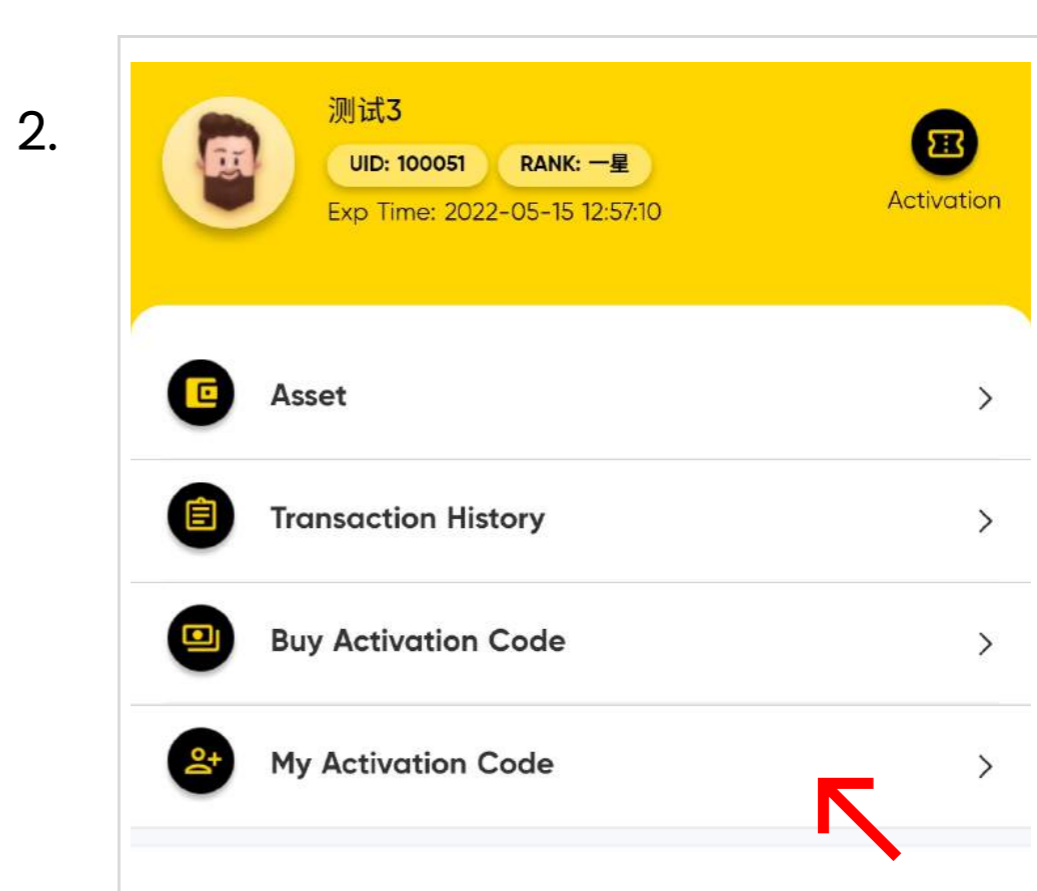

如何提出 Tamago Ai 的 激活码

13

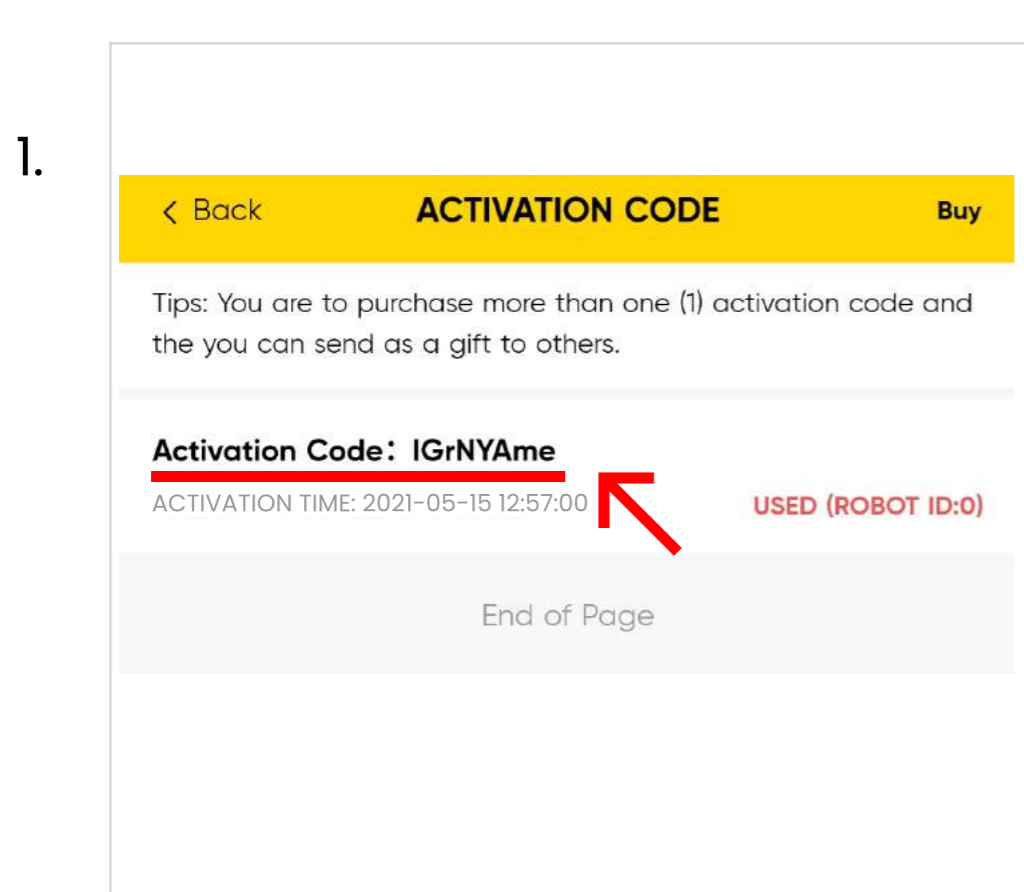

Select **"User"** in main page

在主页面点击 **"User"**

Select **"My Activation Code"**

点击 **"My Activation Code"**

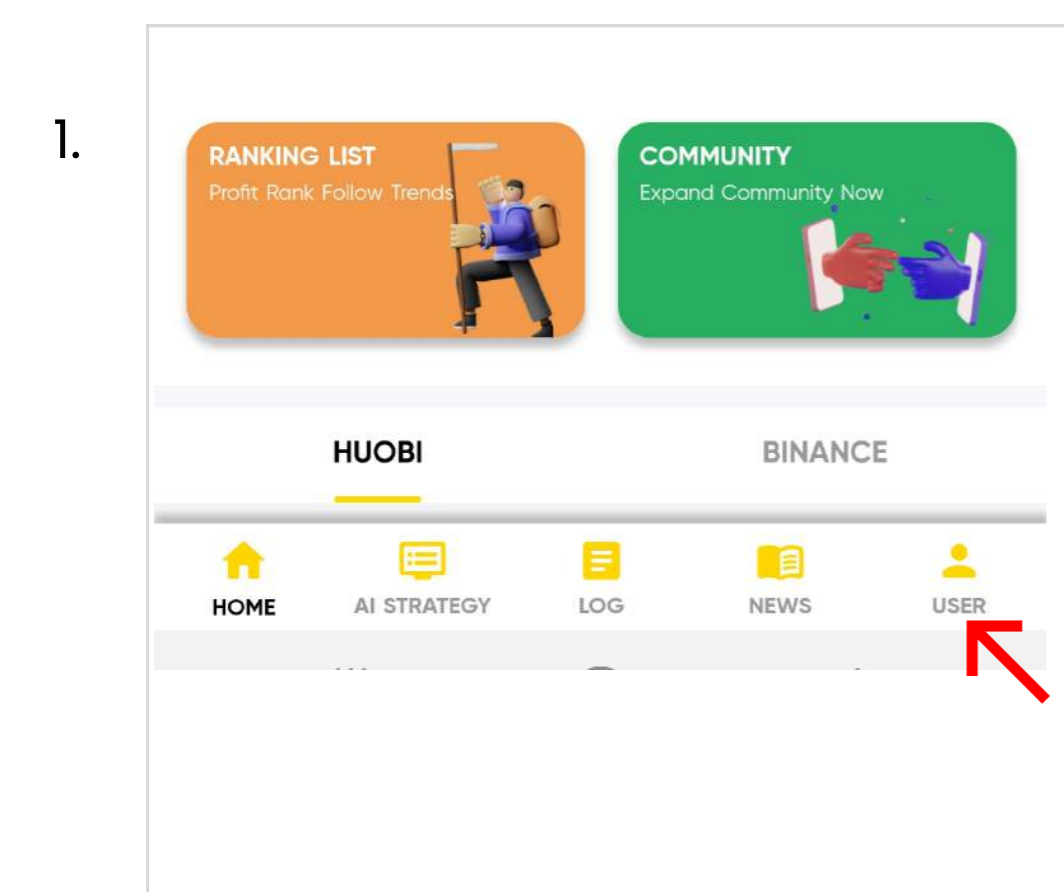

User able to retrieve your activation code here.

用户可在此提取激活码

HOW TO WITHDRAW USDT FROM TAMAGO AI

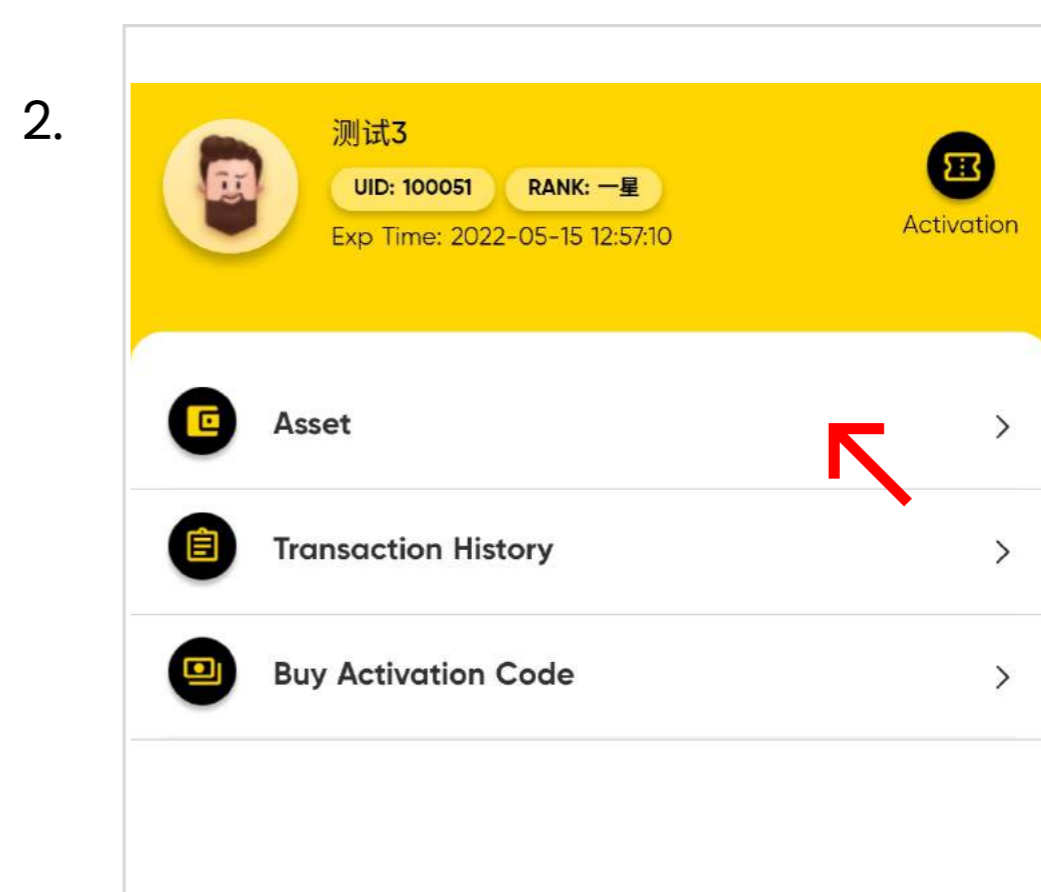

如何从 Tamago Ai 提取 USDT

14

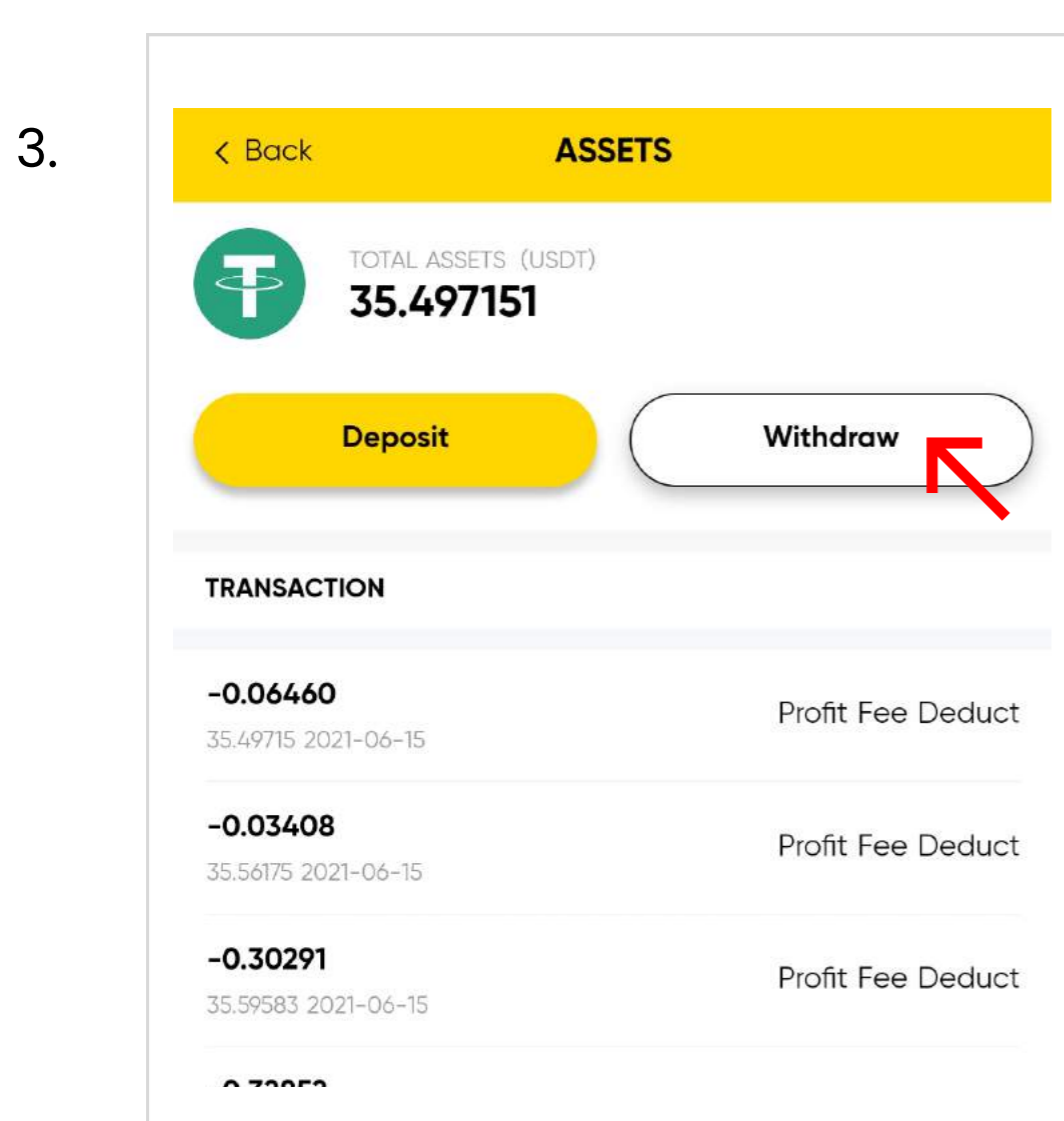

Select **"User"** in main page

在主页面点击 **"User"** 按钮

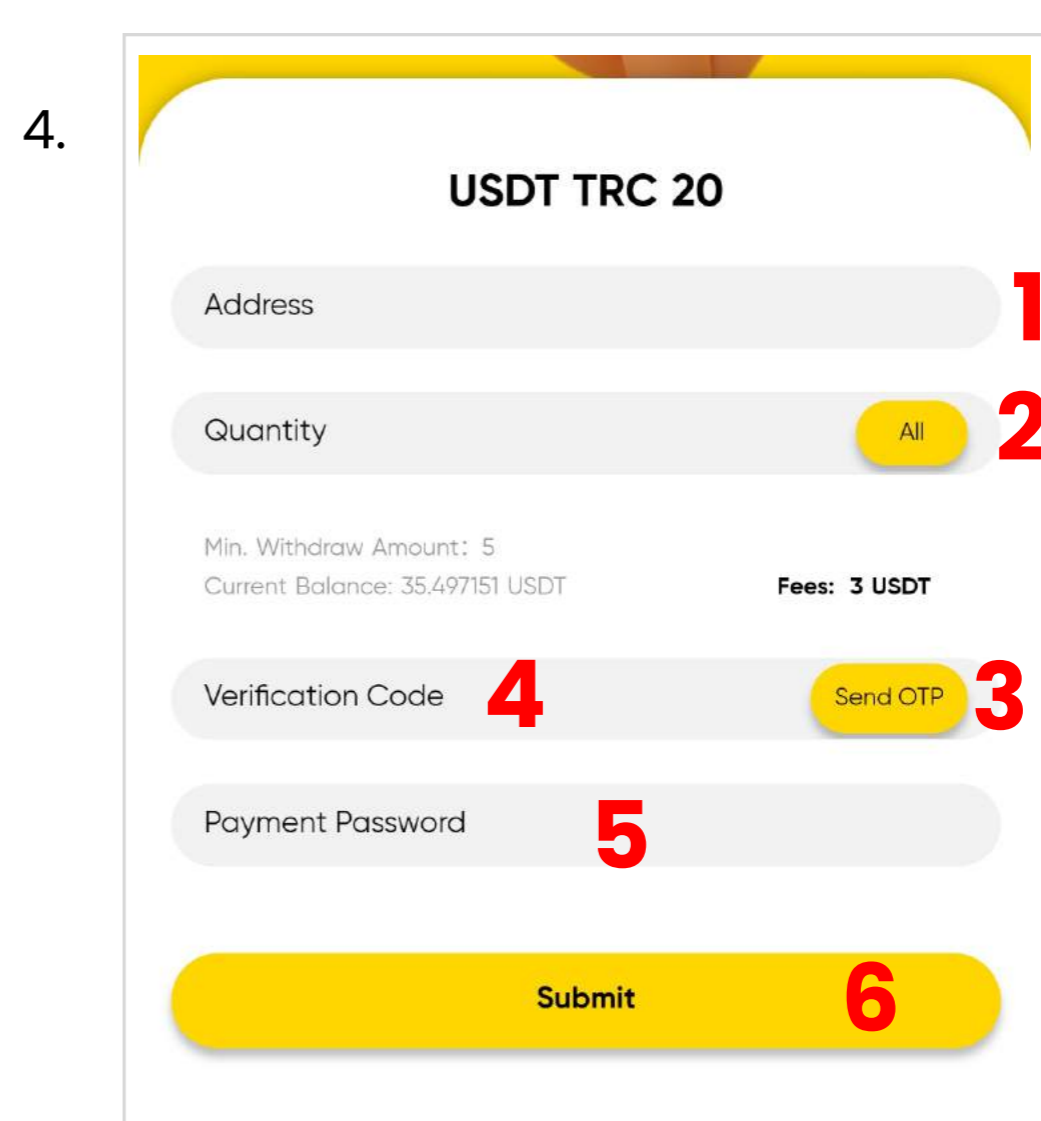

Select **"Asset"**

选择 **"Asset"** 选项

Select **"Withdraw"** button

点击 **"Withdraw"** 按钮

1. Insert the wallet address you want to receive the USDT
2. Insert amount of USDT want to withdraw
3. Select **"Send OTP"** button
4. Retrieve and insert verification code from email
5. Insert payment password
6. Select **"Submit"** to start the transaction

1. 输入要接收 USDT 的钱包地址
2. 输入 USDT 的提取数量
3. 点击 **"Send OTP"** 收取验证码
4. 从用户的电邮提取与输入验证码
5. 输入支付密码
6. 点击 **"Submit"** 按钮确认提取 USDT

Important

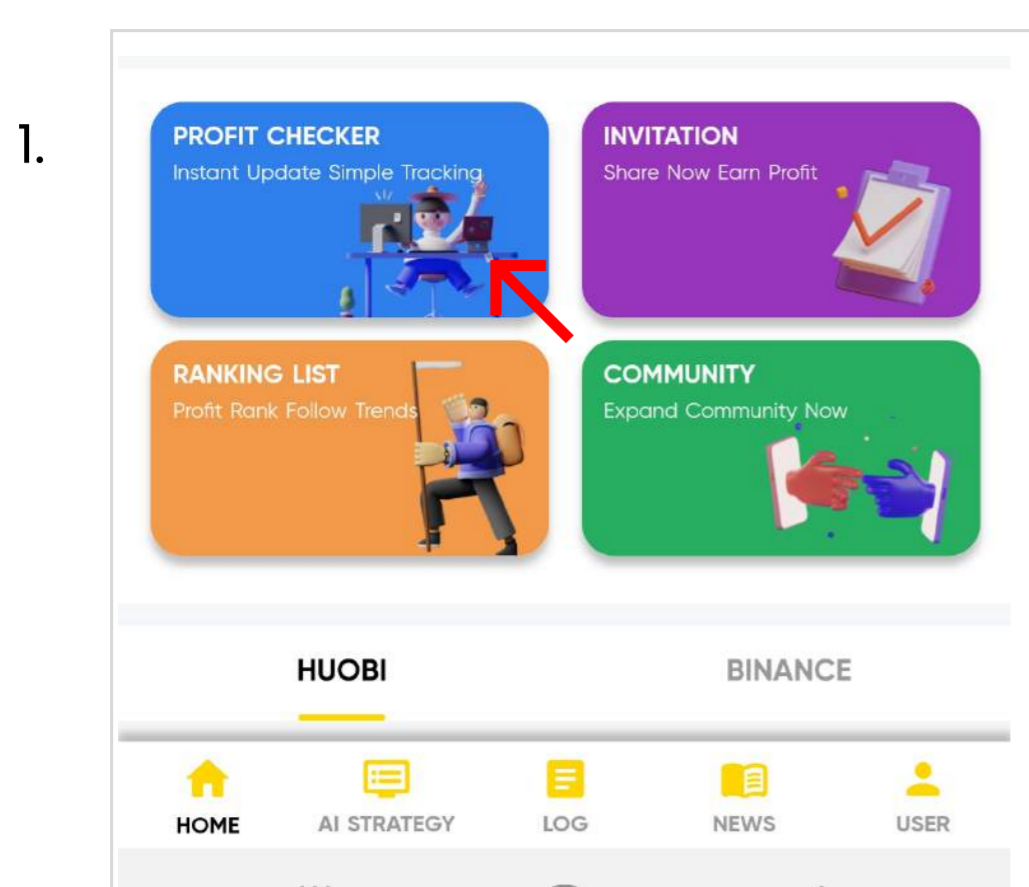

Tamago Ai only able to withdraw USDT TRC-20.

Tamago Ai 只能提取 TRC-20 的 USDT。

HOW TO CHECK DAILY PROFIT IN TAMAGO AI

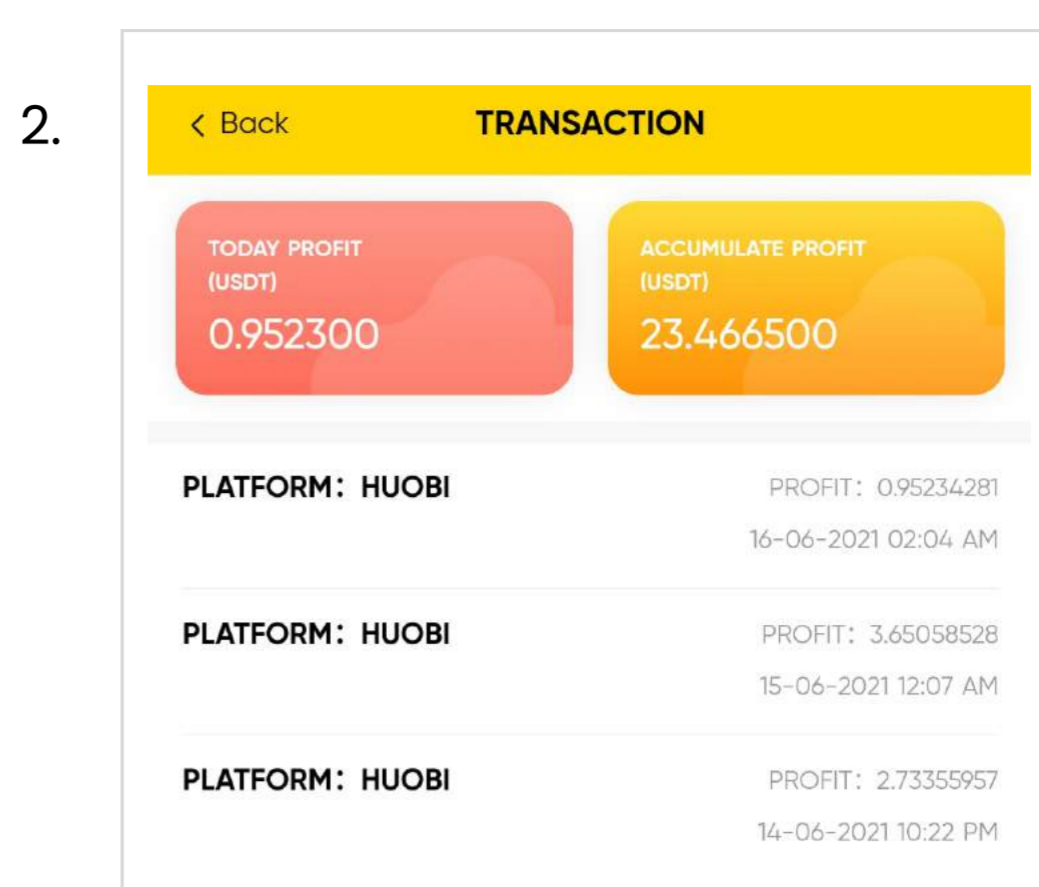

如何了解 Tamago Ai 的每日收益

15

1. Select **"Profit Checker"** in main page

在主页面点击 **"Profit Checker"**

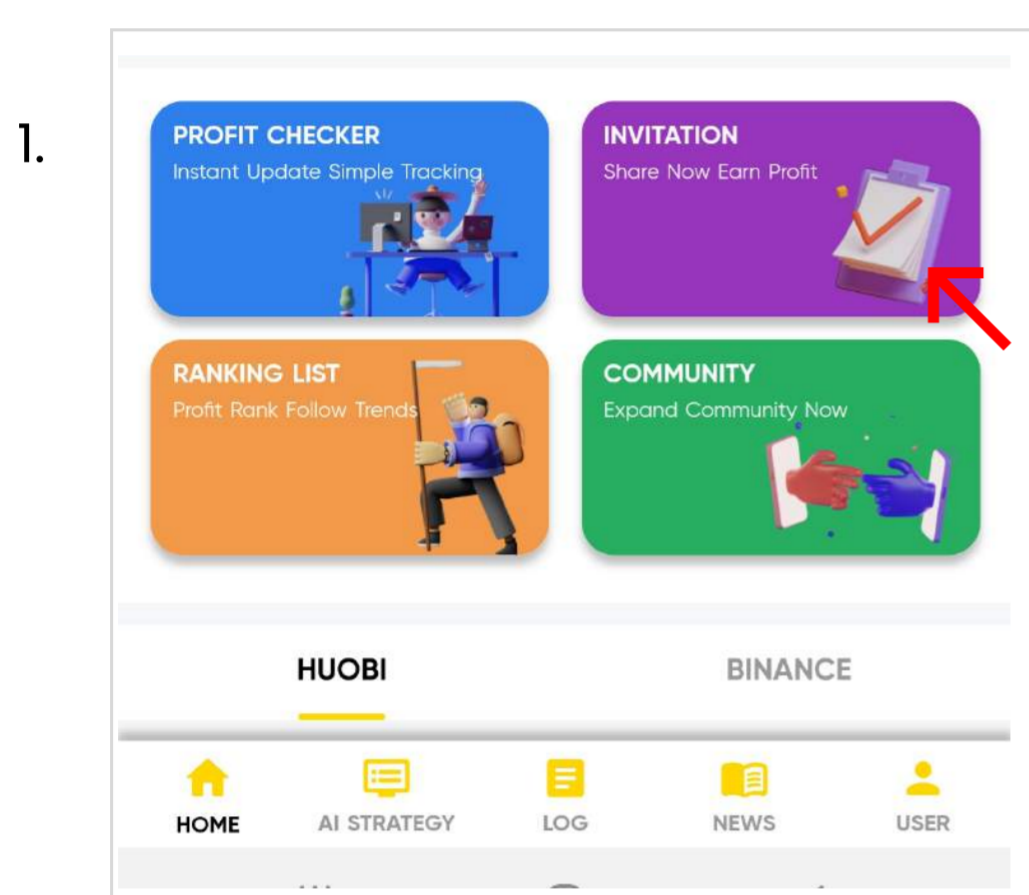

2. User able to check daily profit and accumulate profit here

用户可在此了解自己的每日收益与累计收益

HOW TO RETRIEVE YOUR TAMAGO AI INVITATION CODE

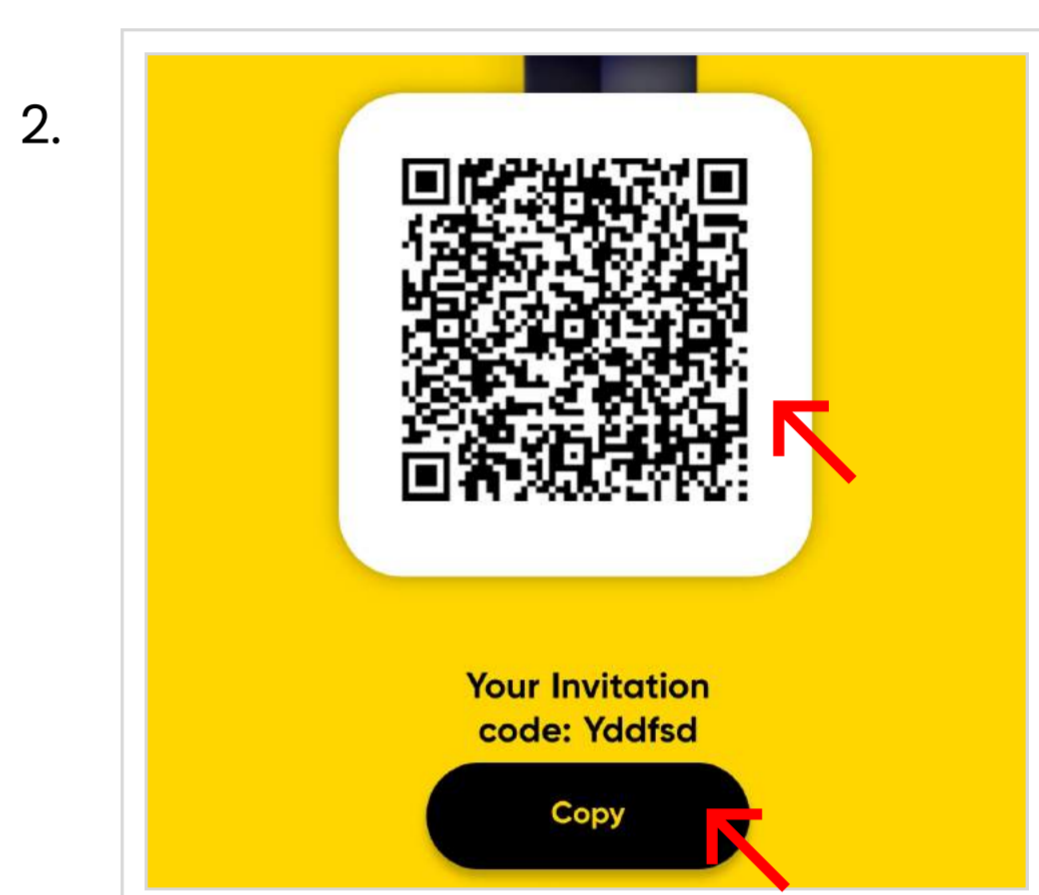

如何获取你的 Tamago Ai 邀请码

16

1. Select **"Invitation"** in main page

在主页面点击 **"Invitation"**

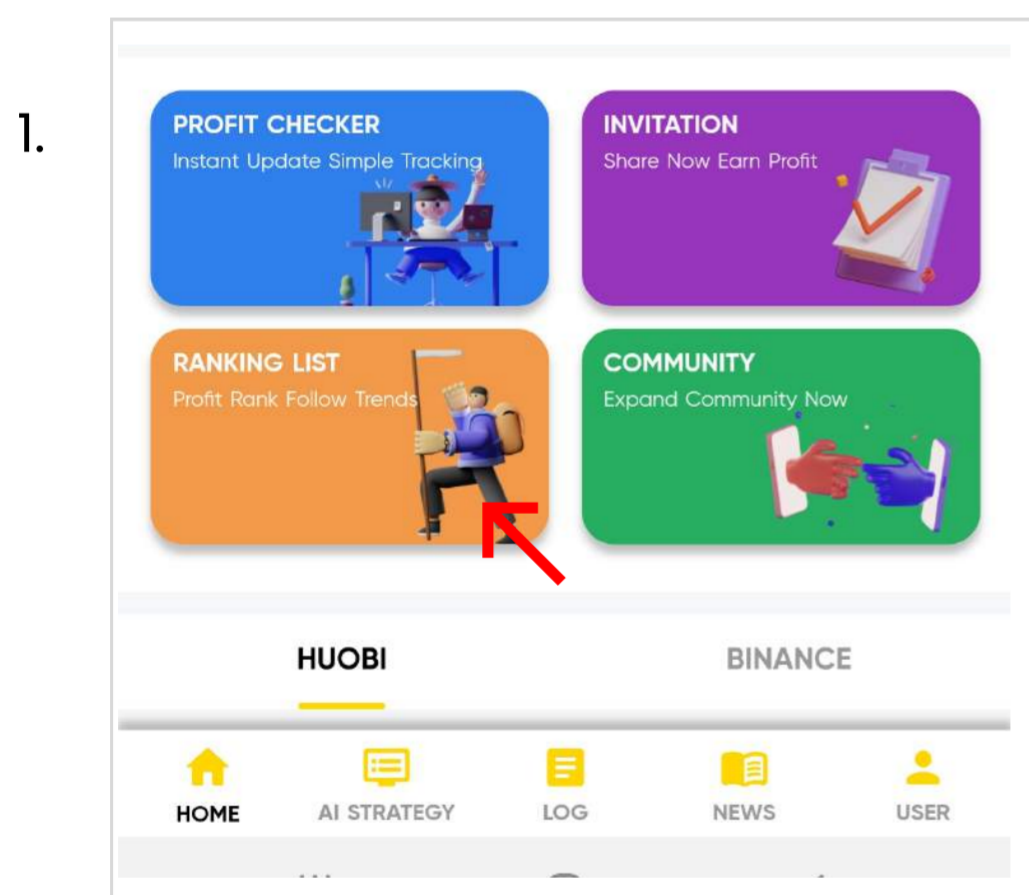

2. User can share this QR Code for referral or copy invitation code by select **"Copy"** button

用户可向推荐人分享这个二维码然他们扫描进行注册或点击 **"Copy"** 复制邀请码

HOW TO CHECK YOUR RANKING IN TAMAGO AI

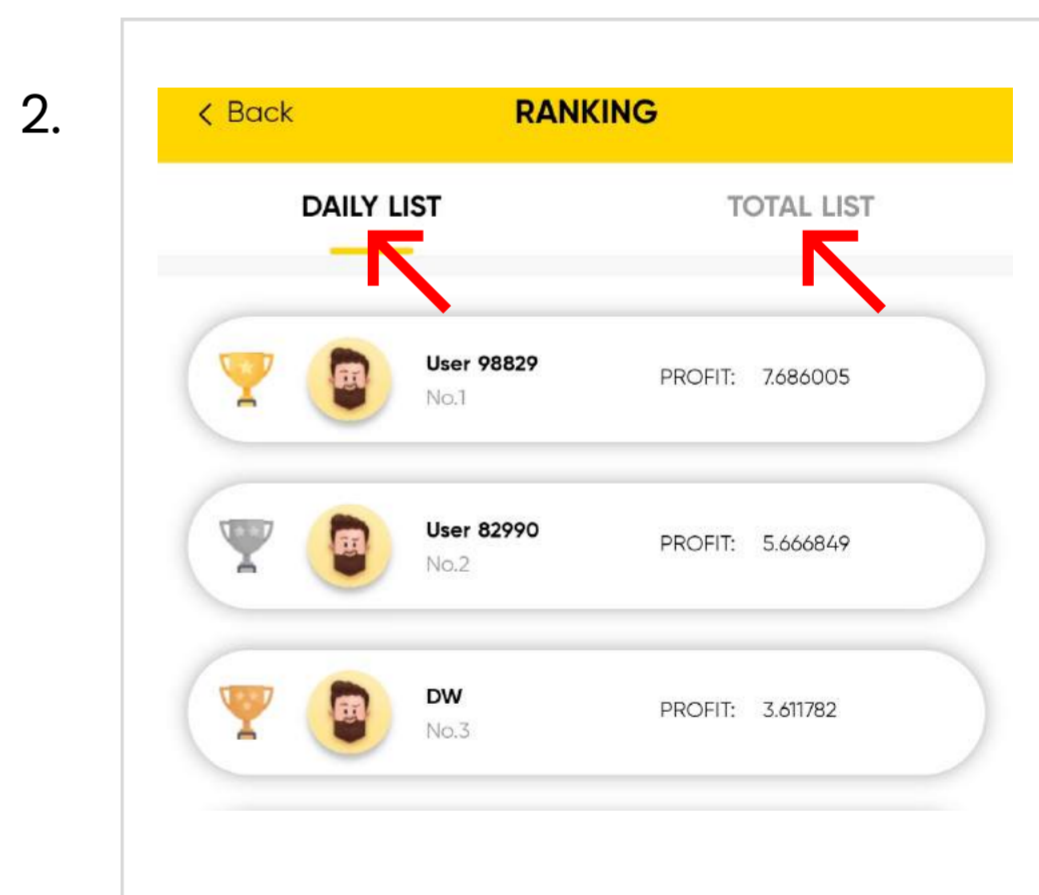

如何前往 Tamago Ai 的收益排行榜

17

1. Select **"Ranking List"** in main page

在主页面点击 **"Ranking List"**

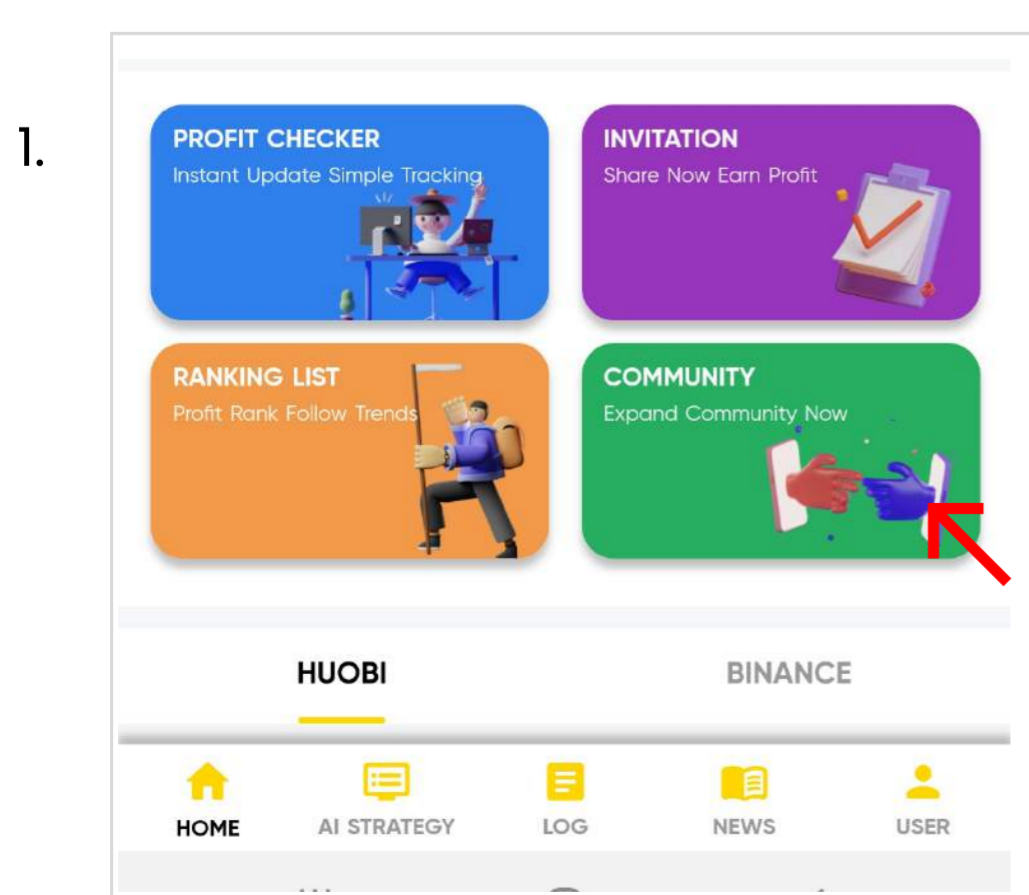

2. User can see daily profit ranking and total profit ranking here.

用户可在此观看日收益排行榜与累计收益排行榜

HOW TO EXPLORE TAMAGO AI COMMUNITY

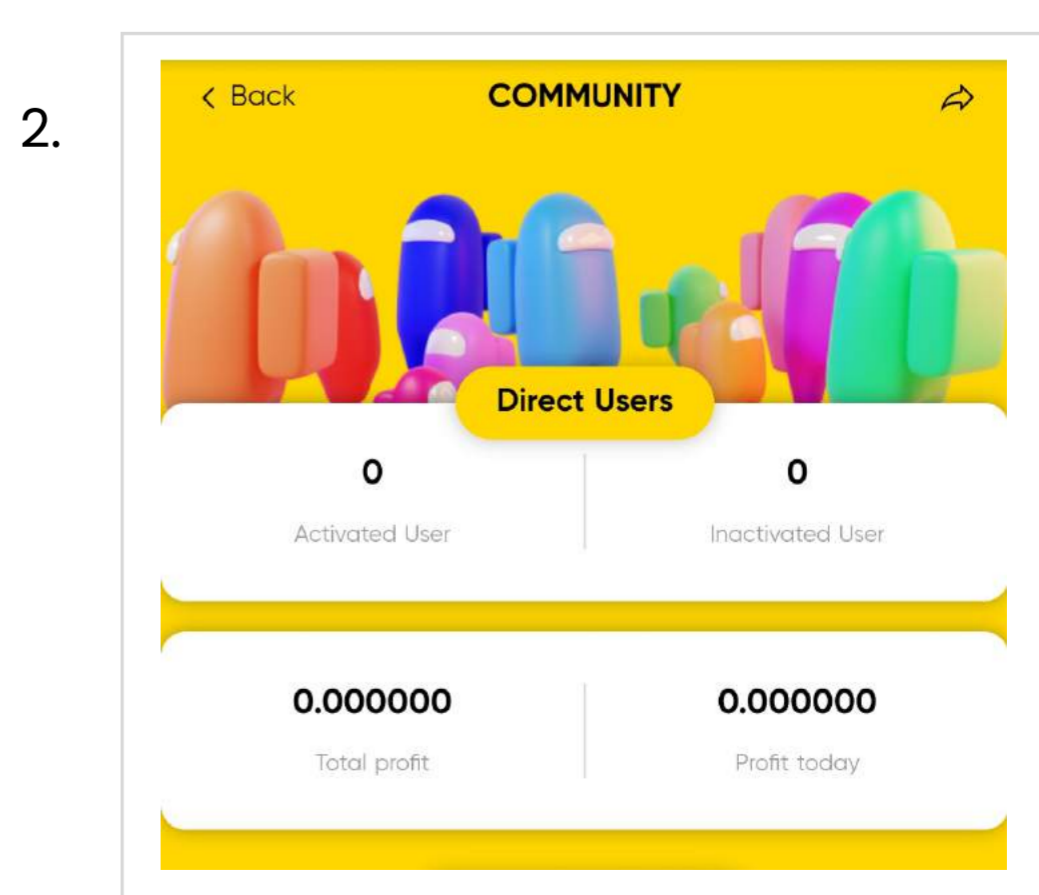

如何前往你的 Tamago Ai 社区

18

1. Select **"Community"** in main page

在主页面点击 **"Community"**

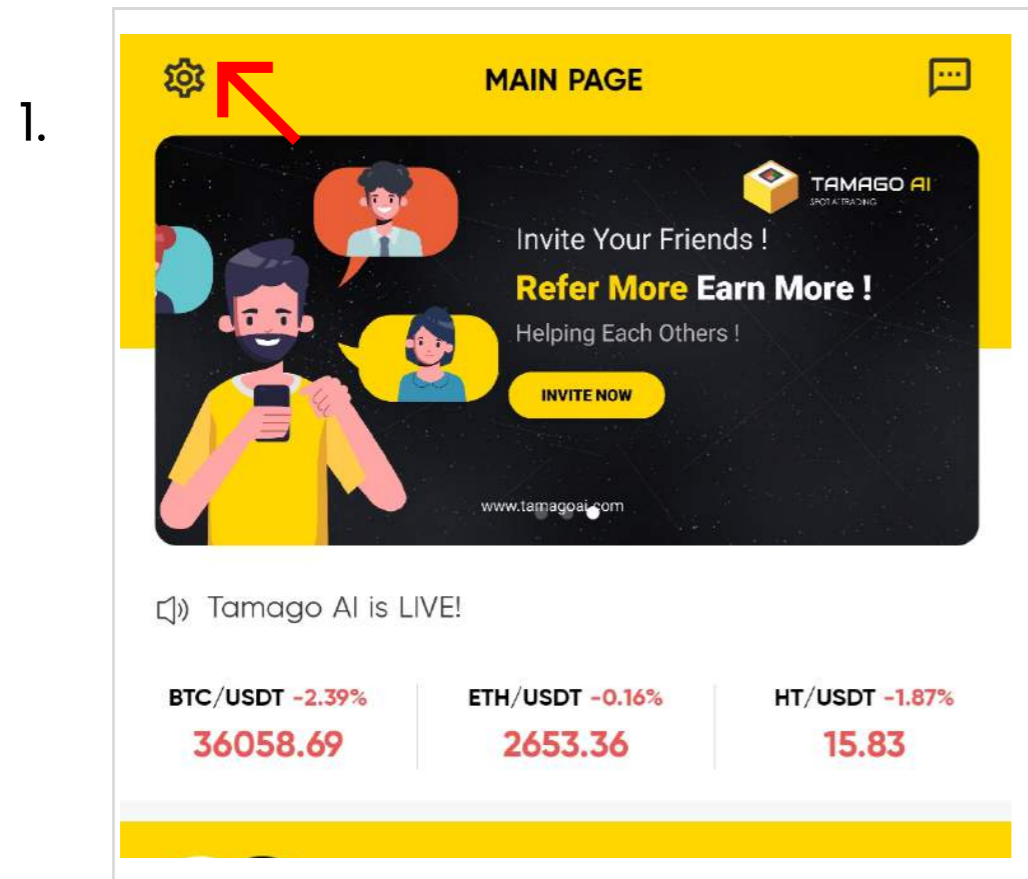

2. User able to see your team performance here.

用户可在此了解你的动态收益与团队收益

HOW TO EDIT LOGIN AND PAYMENT PASSWORD

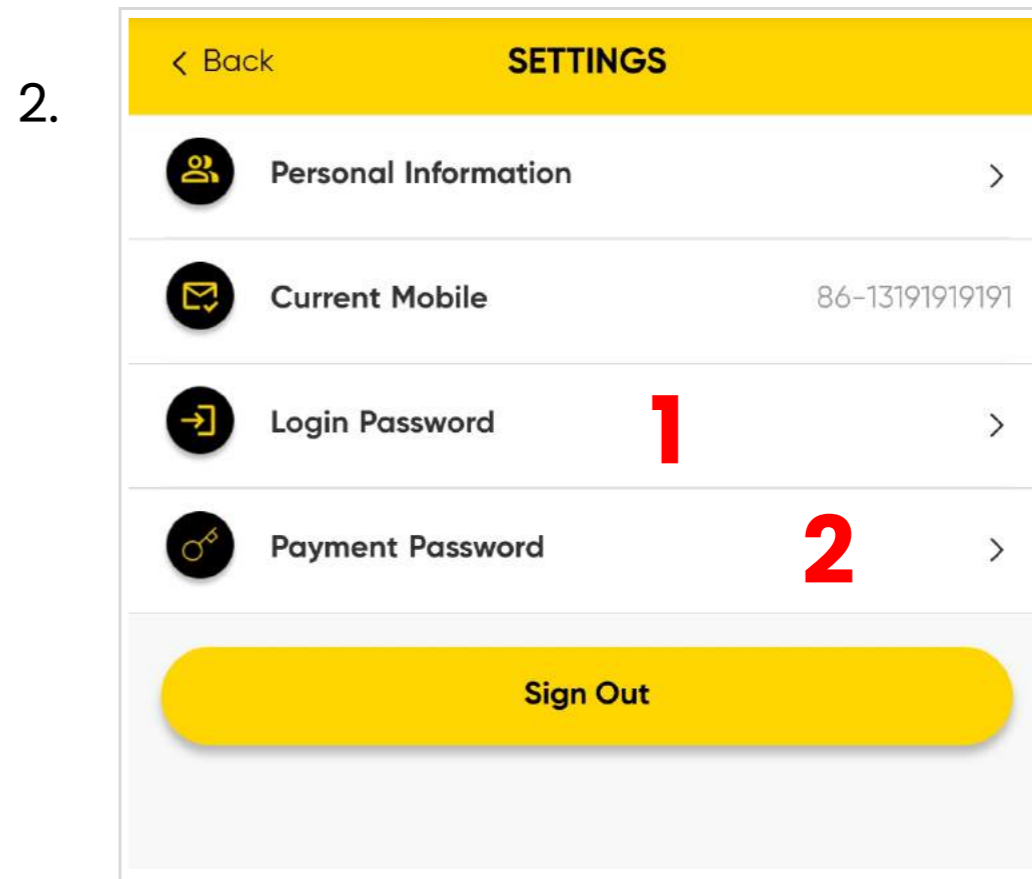

如何修改登入与支付密码

19

Select **“Setting”** button in main page

在主页面点击 **“设定”** 按钮

1. Select **“Login Password”** will be able to edit login password

2. Select **“Payment Password”** will be able to edit payment password

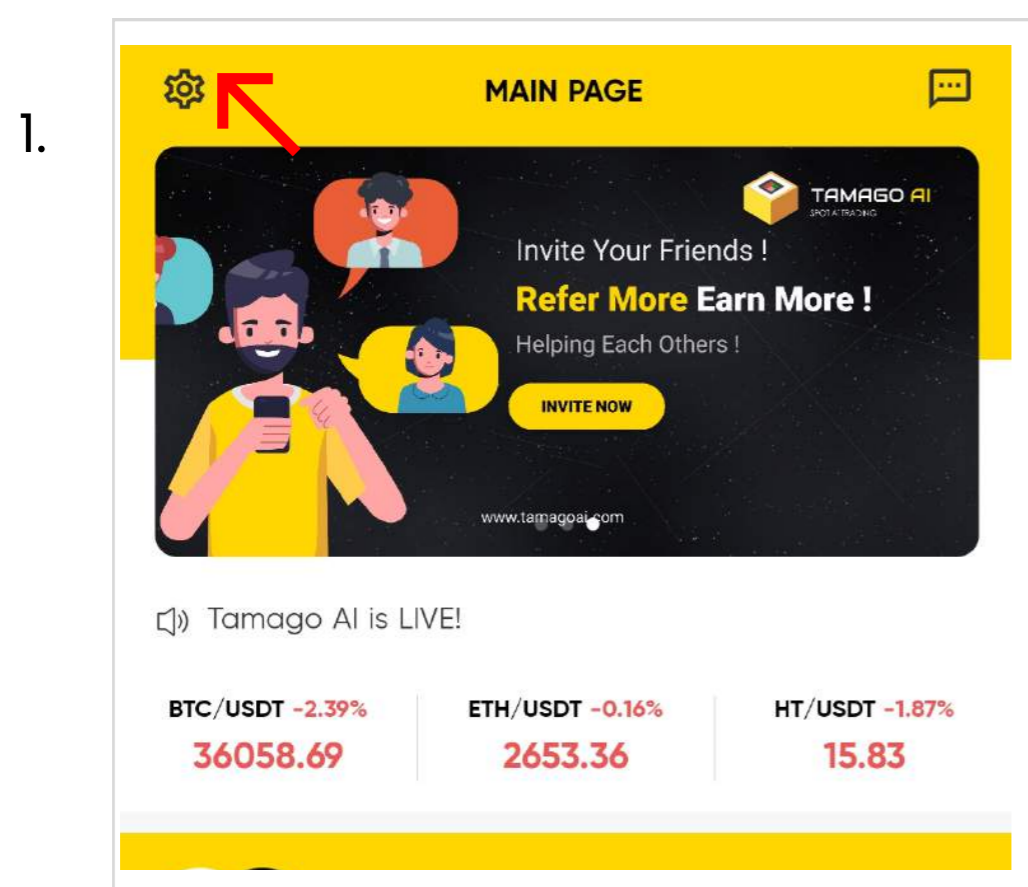

1. 点击 **“Login Password”** 即可修改登入密码

2. 点击 **“Payment Password”** 即可修改支付密码

HOW TO LOG OUT TAMAGO AI

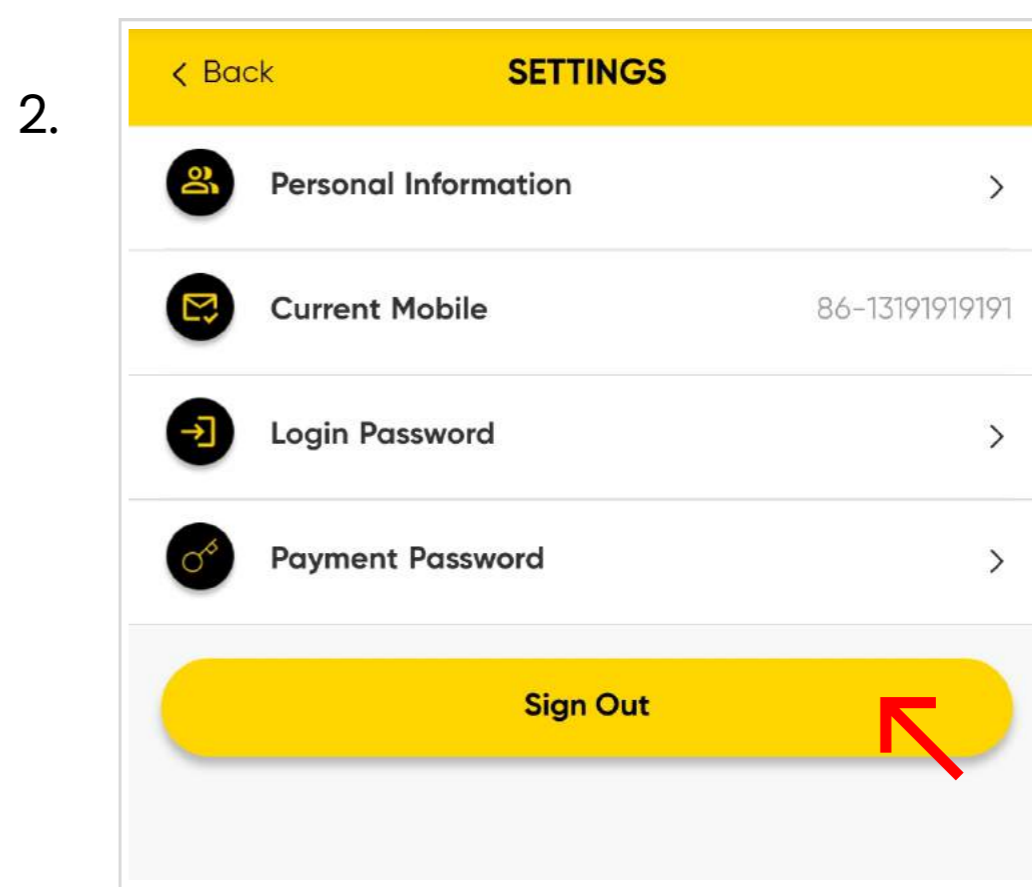

如何退出 Tamago Ai 系统

20

Select **“Setting”** button in main page

在主页面点击 **“设定”** 按钮

Select **“Sign Out”** will be able to logout Tamago Ai

点击 **“Sign Out”** 即可退出 Tamago Ai

TAMAGO AI FAQ

Tamago Ai 的常见问题

01

Where to download Tamago Ai Application.

如何下载 Tamago Ai 应用

i. Tamago Ai Adroid APK / Google Playstore

Tamago Ai 安卓系统 APK 或 Google Playstore

• <https://play.google.com/store/apps/details?id=com.tamagoai.com>

• <https://tamagoai.com/download/>

ii. Tamago Ai iOS currently support on mobile website login only.

Tamago Ai iOS 系统目前只支援手机网页版登入系统

• <https://tamagoai.com/>

iii. Desktop browser is not supported for trading in Tamago Ai.

桌面或笔记本电脑网页浏览器目前不支援 Tamago Ai 的交易系统

02

Is it safe binding exchange API on Tamago Ai?

将交易所 API 绑定在 Tamago Ai App 安全吗

All capital and profits will be fully safe inside your exchange account.

所有的资金和盈利都会安全的保持在自己的交易所账号

Important 注意：

Before binding Huobi API key on Tamago Ai, we always emphasize that "Do not tick withdraw access", just follow the requirements from Tamago Ai, allow "reading of account data and trading". Tamago Ai will only have read and trade privilege for each API bind on the platform, without the functionality of withdraw any of your assets.

注意事项: 在绑定火币网的API时, 我们会特别强调 "不要勾选提币", 只要按照要求选择 "读取和交易" 的按钮, Tamago Ai 机器人只有读取和交易的权限, 并没有提币的功能。

03

How is Tamago Ai's daily profit ratio? Impressive?

Tamago Ai 机器人的收益如何? 可观吗?

With traditional strategy, monthly profit ratio could achieve 10% up to 30%, comparing this ROI with bank interest or physical entities investment, Tamago Ai monthly profit is quite impressive. Of course, if there is anyone capable of using Tamago Ai to suit his needs and flexible enough, monthly ROI will exceed 30% or more. But with high ROI, high risk as well, hence find the strategy that suits you the best.

要是遵循保守策略, 月收益率大概10%-30%, 相对于银行理财和投资实体的回报率来说, Tamago Ai 机器人的月收益率还是很可观的。当然, 如果有人灵活运用Tamago Ai 机器人, 月收益率也有机会达30%以上, 不过高风险, 高风险, 适合自己的才是最好的。

Important 注意：

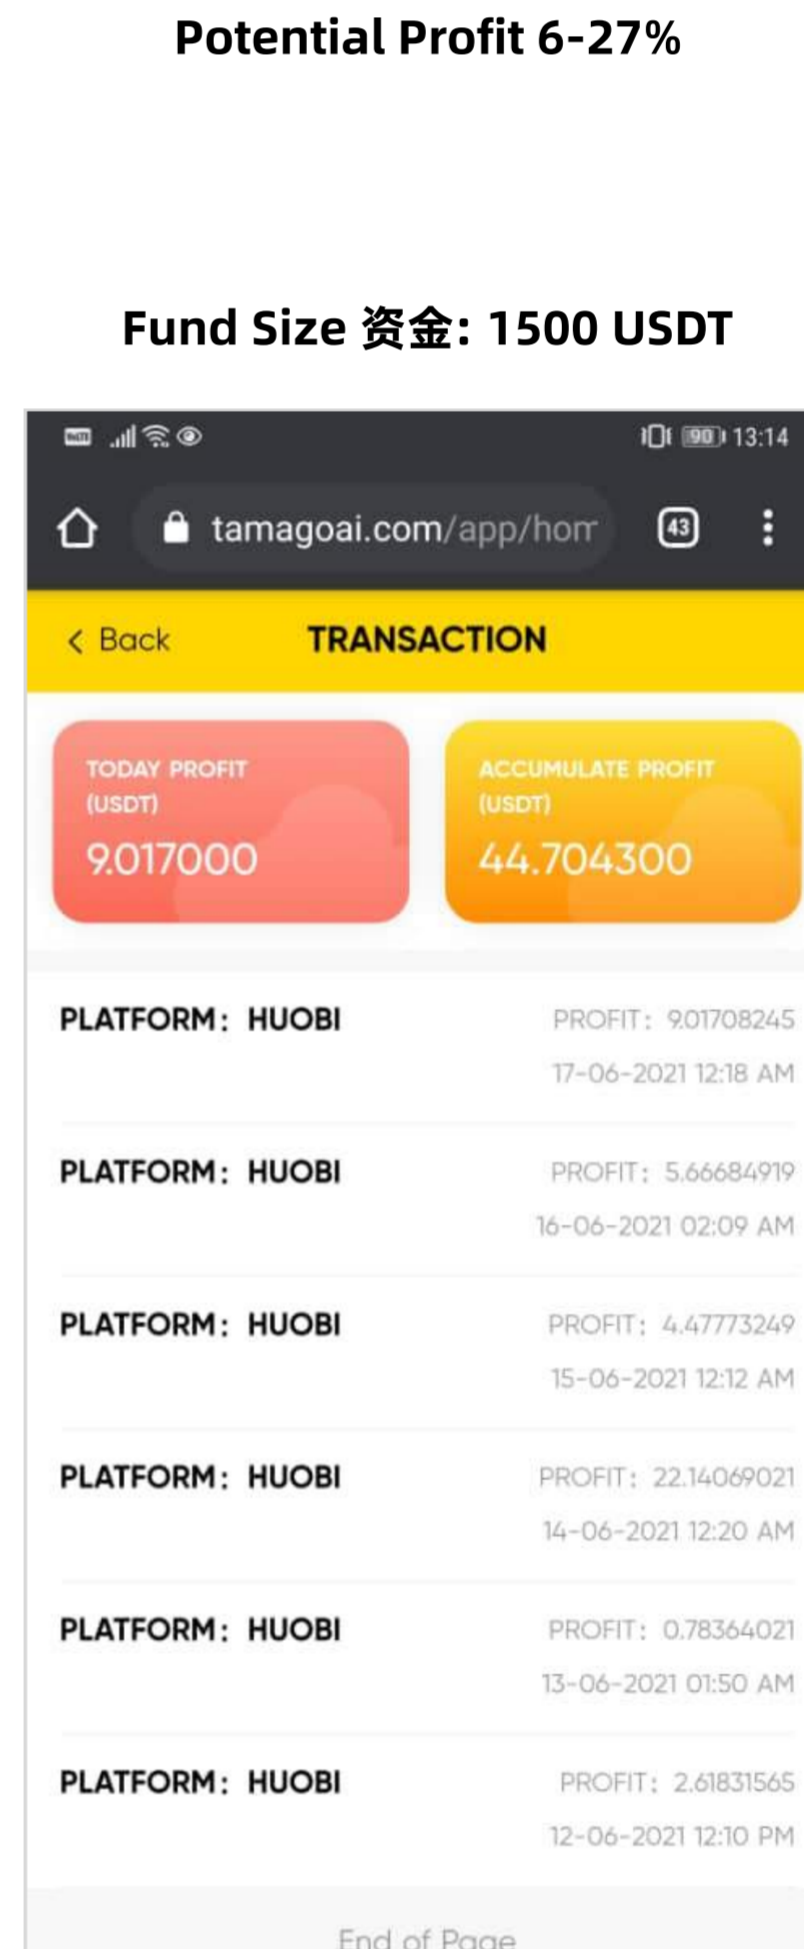

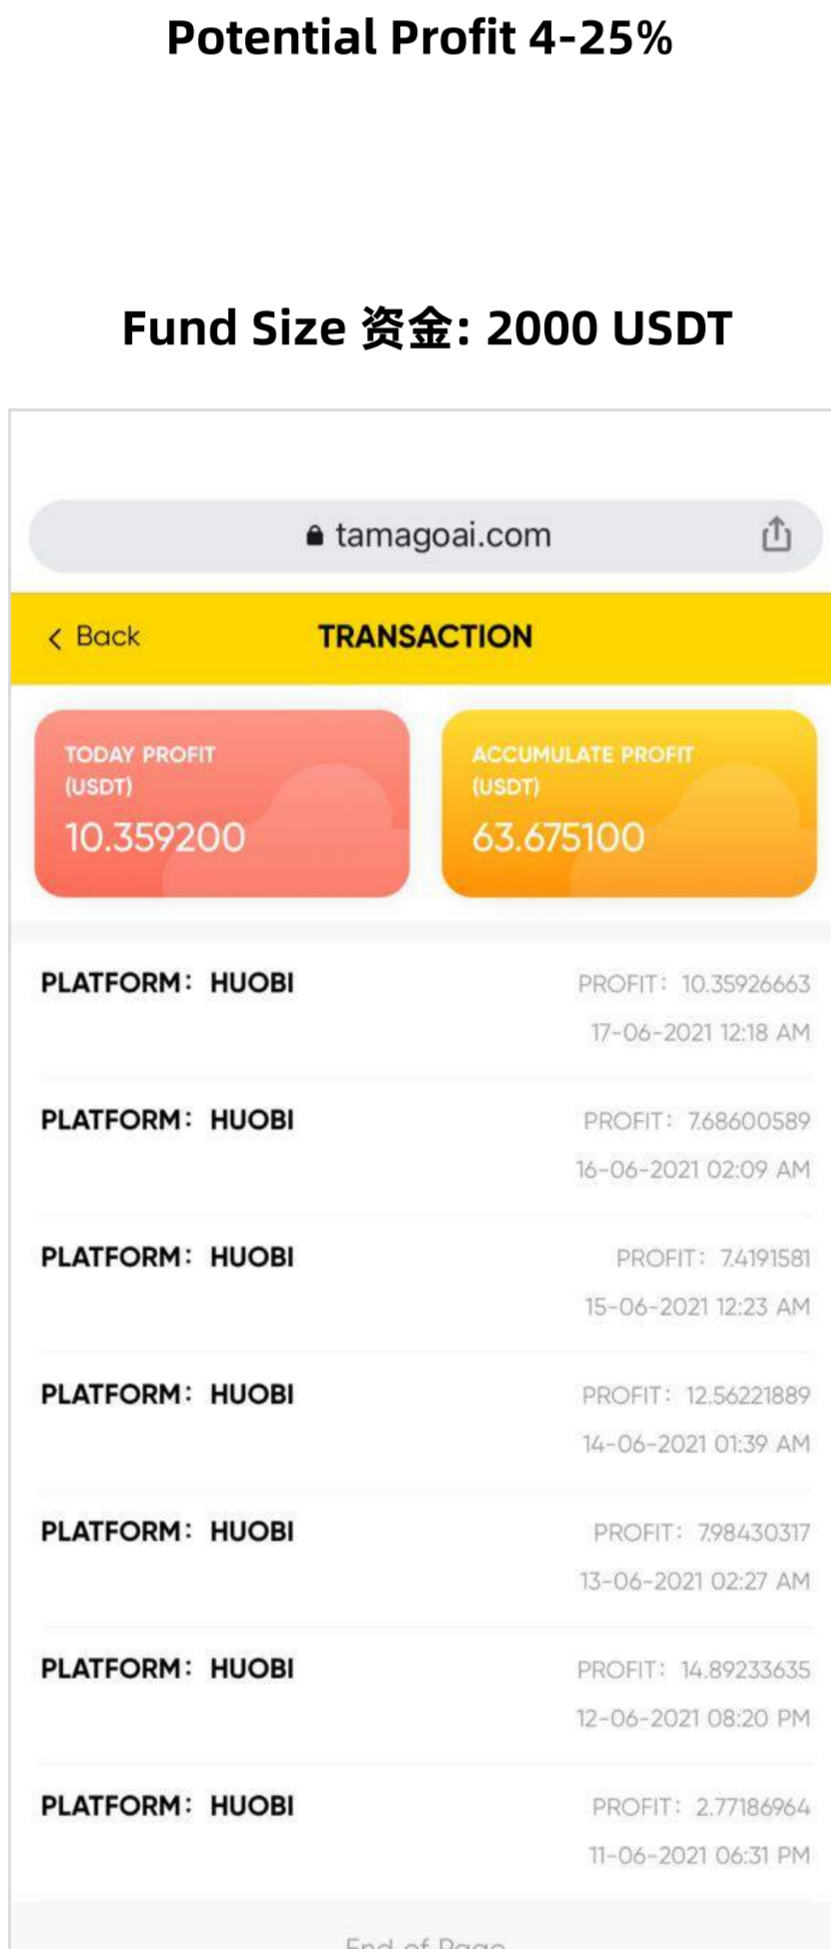

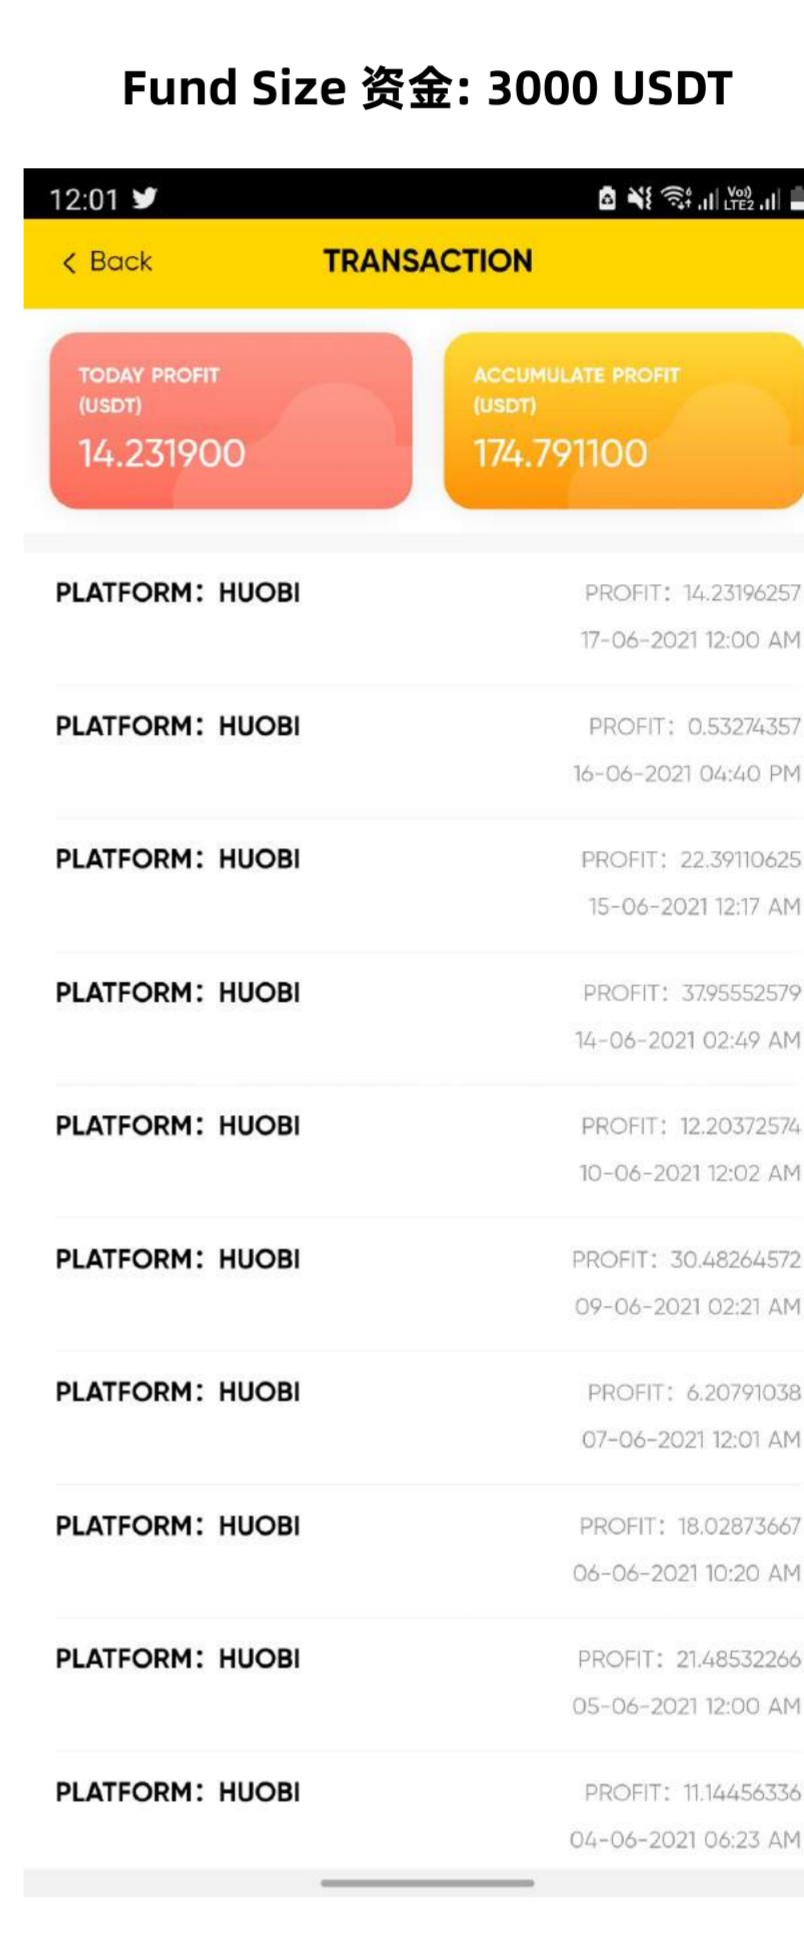

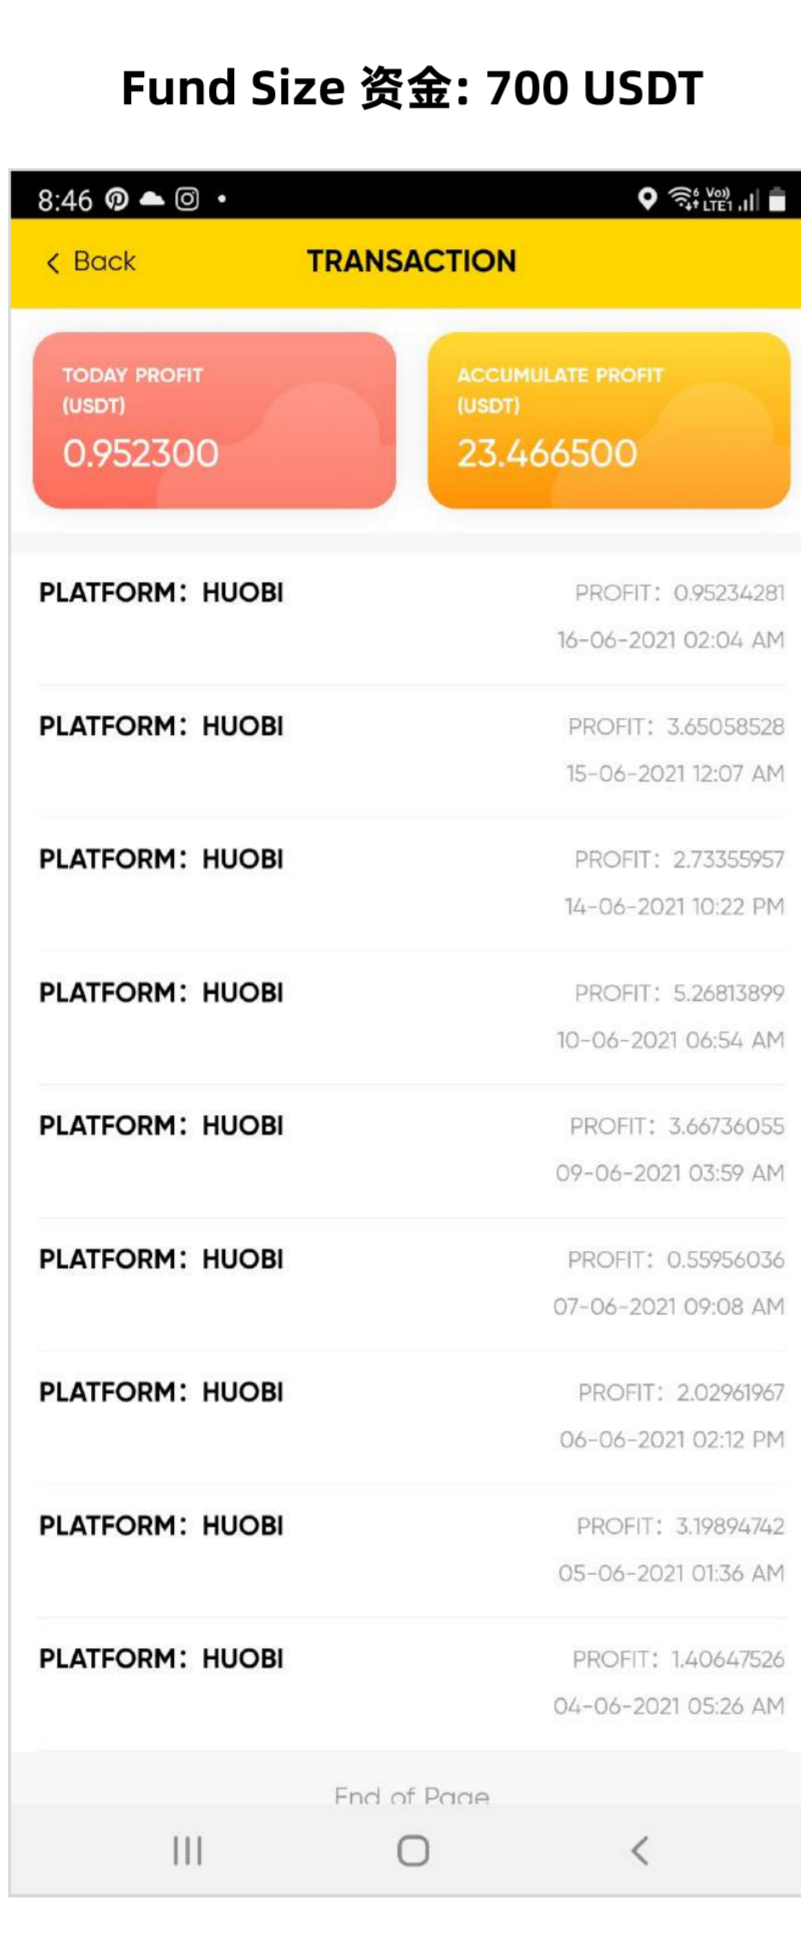

Tamago Ai profit ratio should be measured based on monthly basis or yearly basis, not just with daily profit. As each user had different capital, different set of pair selected, while daily market was an uncertainty, hence, daily profit ratio is unknown and undetermined. Focusing on a single day profit is meaningless.

Tamago Ai 机器人的收益率要看月收益或者年收益, 不能单一看每天的收益率, 因为每个人资金不一样, 选择的币种不一样, 每天每个币的行情不一样, 所以每天的收益率都是未知数, 单一看每天的收益参考意义不大。

04

Testimonial Profit

收益见证

05

How long it takes for Tamago Ai to deposit and withdraw USDT?

Tamago Ai 机器人冲币提币 USDT 到账所需时长?

i. Depending on Tron & Binance Smart Chain block confirmation, it may delay if blockchain network is congested.

i. 完全依据波场 Tron 和币安 Binance 智能链的区块确认速度, 如果区块链网络卡顿, 则会有延迟的可能。

ii. Withdrawing USDT from Tamago Ai is easy, while large funds withdraw from Tamago Ai will require manual verification, normally it required 12 hours to approve and receive.

ii. 从 Tamago Ai 提现非常简单, 由于调动大笔资金需要进行人工审核, 因此一般 12 小时以内就会到账, 用户只需耐心等待即可。

06

The active pair had exceeded the Take Profit Ratio, but why Tamago still didn't sell it?

我购买的区块链货币明明超过了止盈百分比, 为何 Tamago Ai 仍然不脱售呢?

Situation 场景	Take Profit Ratio 止盈比例	Take Profit Retracement 止盈回调
Bullish Without Retracement 牛市但无回调	No Take Profit Action 无止盈订单	Waiting For Retracement 等待回调
Bullish With Retracement 牛市且回调	Take Profit While Meet Retracement Setting 止盈回调条件达成则止盈订单触发	Take Profit While Meet Retracement Setting 止盈回调条件达成则止盈订单触发

If a pair is on bullish trend, and did not perform any retracement, Tamago Ai won't trigger market sell instantly, system will automatically cancel from selling at the market price. For example, based on default settings, the take profit ratio is 1.3%, the take profit retracement is 0.1%, then it means when the position mean price reached another 1.3% in profit, it just triggers the take profit trend of the position mean price, it will require another 0.1% of the price retracement before Tamago Ai robot set the sell your position.

如果区块链货币一直上涨并且没有回调, Tamago Ai 暂时是不会自动卖出的, 系统会再次等待适当的时机再进行脱售。打个比方, 然后寻找适合的时机再继续补仓。打个比方, 补仓跌幅是4%, 补仓回调是0.1%。也就是说当货币涨到持仓均价的1.3%, 只要触发了盈利的那个价格, 再回调0.1%就自动脱售货币啦!

Important 注意：

If you feeling to sell it, you may proceed to click "Market Sell" immediately in Tamago Ai.

如果自己想买, 可以直接在Tamago Ai 里点击 "清仓卖出"。

07

The active pair had exceeded the Take Profit Ratio, but why Tamago still didn't sell it?

某个区块链货币跌到了补仓跌幅百分比, 为何 Tamago Ai 不补仓呢?

Situation 场景	Take Profit Ratio 补仓跌幅	Take Profit Retracement 补仓回调
Bearish Without Retracement 熊市但无回调	No Margin Order Action 无补仓触发	Waiting For Retracement 等待回调
Bearish With Retracement 熊市且开始回调	Margin Order Trigger While Meet Retracement Setting 补仓回调条件达成则补仓订单触发	Margin Order Trigger While Meet Retracement Setting 补仓回调条件达成则补仓订单触发

If a pair is on bearish trend, and did not perform any retracement, Tamago Ai won't trigger margin order instantly, system will automatically cancel from buying at the market price. For example, next margin order ratio is 4%, margin order retracement is 0.3%, then it means when the pair is downtrend to another 4%, it just triggers the margin order ratio price while it will require another 0.3% retracement before Tamago Ai robot set the new margin order.

如果区块链货币价格一直下跌, 并且没有回调, Tamago Ai 不但不会自动补仓, 而且系统还会自动取消了补仓, 然后寻找适合的时机再继续补仓。打个比方, 补仓跌幅是4%, 补仓回调是0.3%。也就是说当区块链货币价格下跌到4%, 只是触发了补仓的那个价格, 再回调0.3%就自动补仓啦!

Important 注意：

If you feeling to buy it, you may proceed to click "Market Buy" immediately in Tamago Ai. Besides, do note that each new margin order ratio is calculated based on previous margin order price and not the current position mean price, which in this case, your position will have more resistance against over-bearish trend!

如果自己想买, 可以直接在 Tamago Ai 里点击 "一键补仓"。另外, 每次补仓是参照尾单价格跌幅, 而不是整体均价, 这样更加抗跌!

08

What is the advisable fund allocated in Tamago Ai?

在 Tamago Ai 的资金配比是多少?

Traditional 保守策略	Stable 稳健策略	Risky 激进策略
1.5%	2.5%	4%

For Example:

Your capital: **10000 USDT**, $10000 \times 4\% = 400 \text{ USDT}$, with rules of not exceeding 4% of total asset.

First order value set as **40 USDT**, maximum pairs can be selected is **400 USDT ÷ 40 USDT = 10 pairs**.

If first order value as **80 USDT**, then $400 \text{ USDT} \div 80 \text{ USDT} = 5 \text{ pairs}$.

You may also double your "first order value".

First order value **15 USDT × 2 = 30 USDT**, set your strategy to traditional.

比如：你有 10000U， $10000 \times 4\% = 400U$ ，遵循所有选择的币种首单额度加起来不超过总资金的4%的原则。

如果你首单额度设置为 40U，最多选 $400U \div 40 = 10$ 个币。

如果你首单额度设置 80U，就是选 $400U \div 80 = 5$ 个币。

你也可以设置激活“首单加倍”。

首单额度为 $15U \times 2 = 30U$ ，则策略可调节至保守策略

Important 注意：

For risky strategy, it is totally different from traditional strategy, asset ratio can be overloaded than the 4% rules, and pairs to be selected can be multiplied of traditional strategy. Always Do Your Own Research on pairs selected.

激进策略就是跟保守策略相反，资金配比超标，选择币种的数量也超标。

09

Capital Allocation Table

资金配比图表

Total Asset	Asset Ratio	First Order (U)	Total Coin Select
1000	4%	10	4
1000	4%	13	3
1000	4%	20	2
1500	4%	10	6
1500	4%	13	5
1500	4%	20	3
2000	4%	20	4
2000	4%	30	3
2000	4%	50	2
2500	4%	20	5
2500	4%	30	3
2500	4%	50	2

Total Asset	Asset Ratio	First Order (U)	Total Coin Select
5000	4%	30	7
5000	4%	50	4
5000	4%	60	3
10000	4%	50	8
10000	4%	60	7
10000	4%	70	6
50000	4%	200	10
50000	4%	400	5
50000	4%	600	3

10

In Tamago Ai, how is the price of second margin order calculated after first margin order triggered

Tamago Ai 机器人首次补仓后，第二次的补仓价格如何计算

Last Margin Order Price - (First Order Price × (Current Margin Order Ratio - Current Margin Order Retracement)).

尾单价 - (首单价 × (补仓比例 - 回调比例))

Important 注意：

In Tamago AI, the next recommended margin order price is displayed, due to market volatility, the margin order price will change to ensure position mean price is greatly reduce after margin order triggered.

Tamago AI APP 的参数设置页面会一直显示下次的补仓价格，但也因由市场浮动大小而定，进而确保补仓后均价拉低。

11

How to utilize "Market Buy" in Tamago Ai?

Tamago AI 机器人的“一键补仓”如何运用?

In normal market condition, it is not advisable to use "Market Buy". "Market Buy" will efficiently reduce the position mean price and having early position sell with profit.

一般的市场不建议用一键补仓。“一键补仓”能有效的拉低仓位均价，但若用户计算不当而会导致“一键补仓”的仓位数量影响最终总盈利与时间的所需周期。

Important 注意：

Wrong utilization will cause your strategy become risky and purchased position will stuck at higher mean price!

“一键补仓”不能随便启动，否则本来保守策略也变得激进策略啦，也将导致持有仓位均价变高!

12

The "Unrealized P/L" in Tamago Ai is refer to loss?

Tamago AI 机器人的“一键补仓”如何运用?

Unrealized P/L 保守策略	Market Trend (Currently) 激进策略
Positive 正数	Bullishi 牛市
Negative 负数	Bearish 熊市

Unrealized P/L is not the real loss. It is calculated based on current position mean price and current price of the pairs traded. If the display still in negative value, meaning the market is still having downtrend and next margin order is not yet triggered. Once profit and position cleared, negative value will be disappeared and concluded your position with profit.

浮亏不是真正的亏损。浮亏是参照你的持仓均价为标准线出现的，在你持仓均价以下就是负数，在你持仓均价以上就是正数。如果是负数，说明正在下跌补仓还没补进去，一旦盈利卖出，负的浮亏消失，转为盈利!

13

What is the "Margin Order Retracement %"?

什么是“补仓回调”?

Market Trend (Current) 市场走向 (当前)	Margin Order Retracement 补仓回调	Margin Order 补仓订单
Bearish & Recovery 熊市且正在回调	Meet 达成补仓回调	Waiting For Retracement 补仓订单触发
Bearish Without Recovery 熊市但无回调	Not Triger 未触发补仓回调	Waiting 等待补仓回调

Margin order retracement is refers to the pairs selected, when in downtrend, margin order will not trigger immediately, at the same time, when coin start recovery to the ratio set on margin order retracement, then next margin order will trigger.

补仓回调比例，是建立任务中所选的币种价格一直下跌不会自动买入，当币价下跌到低点又开始上涨达到您设置的回调比例才帮您买入。

Important 注意：

Margin order retracement is advisable to set as default from 0.3% to 0.5%. If risk level acceptable are higher, then user can set it based on their trading experience.

补仓回调比例按照系统默认设置为0.3%至0.5%之间即可，若风险承受度高，则可以自身经验进行设置。

14

What is "Take Profit Retracement %"?

什么是“止盈回调”？

Market Trend (Current) 市场走向 (当前)	Take Profit Retracement 止盈回调	Market Sell 清仓订单
Bullish & Recovery 牛市且正在回调	Meet 达成止盈回调	Sell 清仓盈利触发
Bullish Without Recovery 牛市但无回调	Not Triger 未触发止盈回调	Waiting 等待止盈回调

Take profit retracement is refers to when pairs selected, in uptrend, position sell will not trigger immediately. When coin start to pullback and reached the target setup of take profit retracement, position sell will be executed.

止盈回调比例，是指建立任务中所选的币种价格一直上涨不会自动卖出，当币价上涨到高点又开始下跌达到您设置的回调比例才帮您卖出。

Important 注意：

Take profit retracement is advisable to set as default from 0.1% to 0.3%. If risk level acceptable are higher, then user can set it based on their trading experience.

盈利回调比例按照系统默认设置为0.1%至0.3%即可，若风险承受度高，则可以自身经验进行设置。

15

What is "Single Strategy" and "Circular Strategy" ?

什么是“单次策略”与“循环策略”？

Strategy 策略	Take Profit Retracement 补仓	Market Sell 止盈
Single 单次策略	Until Meet Take Profit Ratio 直到止盈条件触发	Stopped After 1 Time Take Profit 完成一次止盈后停止交易
Circular 循环策略	Until Meet Take Profit Ratio 直到止盈条件触发	Repetitively Take Profit & New Order 不断重复补仓与止盈

Single strategy will be automatically stopped until the position was completely sold. Before selling all the position, it will still create new margin order when margin order ratio met.

For **Circular strategy**, it will keep on create new position for you. But just make sure you have sufficient USDT in Tamago AI wallet to get the robot actively running.

单次策略并不是停止了策略，是卖出盈利后自动停止，在没卖出之前还处于一直运行的状态。Tamago AI 机器人会继续分批建仓，全仓卖出，完成了这个过程Tamago AI机器人就自动暂停了，不再买入，这就是“单次策略”。

循环策略则是不间断分批建仓，全仓卖出，再次分批建仓，全仓卖出。期间请确保Tamago AI 内有足够的U作为机器人交易费抵扣。

16

When should user select "Single Strategy"

什么时候适合使用“单次策略”

Choose "Single Strategy", normally in common condition, as follow:

选择“单次策略”大概分为三种情况，分别如下：

i. Change to other pairs.

i. 更换币种时

Important 注意：

Please set the active pairs into Single Strategy, once position sell with profits, then you may switch to new pairs' robot.

提前选择单次策略，等盈利出局了再更换币种。

ii. Change Strategy setting/Strategy type

ii. 更改运行中的策略参数与类型

Important 注意：

Please set the active pairs into Single Strategy, once position sell with profits, then you may switch to new pairs' robot.

提前选择单次策略，等盈利出局了，再启动设置新的参数/策略类型，不建议中途改动，以影响仓位均价不平衡的问题

17

Manual trading and Tamago AI robot trading on the same account can select the same pairs to be traded? Any influence?

手动炒币和机器人炒币可同时选择相同的币种吗？会造成什么影响？

It is advisable not to select the same pairs for manual trading and Tamago AI robot trading. Users are advisable to trade different pairs or using subaccount of Huobi/Binance to perform both manual trading and quantitative trading via Tamago AI.

团队建议手动炒币和机器人炒币最好不要同时选择一个币种，应该尽量分开操作，或者单独申请一个全新的火币子账号，一个账号手动炒币，另一个账号进行量化！

If manual purchase token in Huobi / Binance, will Tamago AI robot sell it?

如果自己手动在火币网购买区块链货币，机器人会不会将其脱售？

No. As Tamago AI will only recorded all its buy and sell position and total token quantity holds, manually buy of the token in exchange will not be sell by Tamago AI robot.

不会。因为机器人只识别自己买卖的区块链货币数量，手动买的货币数量，机器人不会脱售的。

Important 注意：

It is advisable that the token purchased manually in exchange should not be the same as the pairs traded actively in Tamago AI, as you may accidentally sell the position of Tamago AI robot.

建议手动买的区块链货币不要和机器人里设置的货币相同，尽量分开，以避免操作时，错误卖出 Tamago Ai 机器人的持有仓位。
